Dear Mr. Parsons:

Recently we advised our Southern District Office that since your letter of November 17, 1972, measuring devices are now installed on both wells questioned. Just when a field examination will be made is up to the Southern District Office. If you have any questions on the matter, please contact Bob Haynes, District Engineer in charge of the Southern District.

The quanity of water to be licensed will be based on the amount of water measured through the flow meter and limited by prior licenses and measurements established from these wells and the number of acres actually irrigated. Our previous examination totaled 442 acres in Sections 3 and 4, Township 11 South, Range 21 East. Following the field examination we will tell you what the Department proposes for licensing.

Permit G22802/45-2419 has been licensed and a transfer has been submitted for approval by the Department. We are enclosing a copy of the water license and transfer. We are also enclosing a copy of the Department's Memorandum Decision on the matter.

As to your last question, please be advised that our issuing the license is based on the re-examination and measurement of the water through the measuring devices.

Please contact us if we can be of further assistance.

Very truly yours,

RE: Permit 45-7005- license number G26747/45-2745 and G22803

Dear Mr. McEldowney:

I apologize for having to carry on additional correspondence regarding these permits and licenses, however, I don't understand the situation and my client cannot enter into a contract unless we fully understand it.

As I understand license G26747/45-2745 is licensed for .32 cubic feet per second.

As I understand there will be a license issued for permit number 45-7005 when the measuring device is installed (the measuring device is installed now) and I assume that the administration will soon make their inspection and issue the license based thereon. How much water will that be licensed for?

In your letter of October 27, 1972, to us you also mentioned G22803 as having been licensed for 2.8 cubic feet per second. If this is a correct number I do not have a copy of the permit and do not understand where this number arises. Could you please send me a copy of the same and make an explanation of where this is.

Could you also give me some idea as to when we might expect a license under 45-7005.

Again thank you for this inconvenience but it is imperative that we have a full understanding of the matter.

Very truly yours,

In case the property is operated as a unit, possibly the best method would be to amend the points of diversion to the three wells to irrigate all the land on each of the permits.

No. ~~of permit unknown~~.
we presume that you would want to test all three wells at one time. Three wells effect all of the above permits.

We donot know at this date when we will start pumping all three wells at one time, but it will probably be at least the latter part of May. We will probably operate one well about April 10th.

We will try to notify you when it looks like all three will be in operation.

Sincerely yours,

Dear Madam:

We would like to know the date on which you plan to start irrigation.

Due to the heavy work load of permits to be examined this year, this information would help to schedule and direct our attention to areas in which early irrigation has started.

We acknowledge receipt of the Deposition of Holder and two witnesses, also affidavit of publication in the Herald-Bulletin, all submitted in proof of Completion of Works and Application of Water to Beneficial Use on Permit No. G-26747.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

**Ques. 1. State your name, residence, occupation and postoffice address.**

Ans. Elta M. Arnold, I live just at the edge (on the west side) of Grangeville, Idaho. My occupation is radio commentator and my postoffice address is Grangeville, Idaho.

**Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.**

Ans. I am acting as an individual

Ans. Water is obtained from 3 wells: #1 in $SE\frac{1}{4}SE\frac{1}{4}$, Sec. 34, 472', 20" dia., cased 73', produces 340" & I get 52"; #2 in $SW\frac{1}{4}SW\frac{1}{4}$, Sec. 35, 473' deep, 20" dia., pumps from 434', cased 74', produces 330" & I get 40"; #3 in $NE\frac{1}{4}SE\frac{1}{4}$, Sec. 3 is 511' deep, 16" dia., water stands at 474', cased 491', produces 180" & I get 30".

Ans. Cont/ from #4: #1 has a 12" discharge, equipped with 350 hp motor. #2 has a 12" dishharge, 350 hp motor. #3 has 10" discharge, 200 hp motor. These have been designed to produce variable amounts, depending upon the horsepower, but having seen water, that is my best estimate because I have not tested it. There is no sprinkler system. Everything is irrigated by gravity. Wells # 1 and 2 are in Township 10 South - Range 21 East, and Well #3 is in T11S - R21E. My ditches will carry from 100" to 150".
