Application for Amendment ✓  
POINT OF DIVERSION  
Permit No. G-30735

Comes now MEZ McMURRAY, acting in behalf of McMurray Land & Livestock Co. and represents to the State Reclamation Engineer of the State of Idaho:

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. G-30735.

That the point of diversion is described in said Permit as being located: SW<sup>1</sup>/<sub>4</sub>NW<sup>1</sup>/<sub>4</sub>, Section 15, Twp. 12 S., Range 22 EEM, Cassia County.

That he now requests that the point of diversion be changed to a point located: NW<sup>1</sup>/<sub>4</sub>SW<sup>1</sup>/<sub>4</sub>, Section 15, Twp. 12 S., Range 22 EEM, Cassia County.

That the reason for desiring to make such change is as follows: An error was made at the time the application was sent in, putting the point of diversion in the wrong quarter section.

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.  
Signed at Burley, Idaho, this 16th day of October, 1962.

s/ McMURRAY LAND & LIVESTOCK CO.  
s/ Mez McMurray  
Secretary

Date of Receipt at Department of Reclamation: November 19, 1962.

#### APPROVAL OF STATE RECLAMATION ENGINEER

I, RALPH W. THOMAS, Deputy State Reclamation Engineer of the State of Idaho, hereby approve the above and foregoing application for amendment to Permit to appropriate the Public Waters of the State of Idaho, No. G-30735. This approval constitutes a new permit and is issued as an amendment to the original permit, to which it refers and of which it becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected thereby.

Dear Mr. Nielson:

We are returning your partially prepared application for transfer filed in the behalf of the above referenced parties.

We would note that the legal description is not complete under item 8 and 11. Once the application is signed and returned with the \$30.00 filing fee, processing can begin. It will be approximately 5 - 6 weeks before a decision can be made whether or not it will be approved.

As you have noted it will be a permanent transfer; however, the applicant will have the right to apply for the transfer in reverse at any time providing that ownership of that portion of the water right vested in Section 9 is not a problem. We also understand that no new well will be drilled under this proposal. If this is not correct, then the transfer must be changed accordingly. Again we should point out that ground water may not be used on Section 9 until the transfer is completed.

Your assistance in this matter is greatly appreciated.

Very truly yours,

Donald W. McEldowney  
Appropriation Supervisor

Dear Mr. Higginson:

You no doubt remember our visit to you on behalf of the Howard R. Adams and Cranney matter, over transfer of water.

My understanding is that a few days ago Bill Cranney discussed with you and your department prepared an application for transfer which I am returning. This transfer which your department prepared was sent to Mr. Adams. If we understand the matter correctly the transfer was to be only for this year to help the three hundred and some odd acres of potatoes which had been planted before we first came to Boise.

The answer to question ten F, says that the transfer is to be made permanently. The transfer, if you will remember was to be only for one year.

What would be your suggestion regarding the situation now to enable the transfer for the year 1971?

Sincerely,

NIELSON, NIELSON & NIELSON

Dear Mr. Adams:

On July 6, 1971, the Crannies were in our office and we helped them to prepare a transfer of a portion of the lands covered under the above referenced water license. At that time, they indicated that the application should be sent to you for your signature. Please sign this application for transfer and return it with a \$30.00 fee and we shall begin its processing.

If you should have any questions in this matter, please do not hesitate to contact this Department.

RE: McMurray Land & Livestock Co.  
Permit No. G 30735

Attention: Donald W. McEldowney

Dear Mr. McEldowney:

Thanks for your letter of December 4, 1967, designating the quantity of water diverted in the amount of 4.78 C.F.S. and showing the priority date established as August 22, 1962.

In accordance with your request on the bottom of the letter, I am enclosing our check, No. 9681, for \$37.00 as the fee for issuance of the Certificate of Completion of Works and the License and Certificate of Water Right.

Would you please forward this to us by return mail, if possible, as we have an urgent need for it. If possible, we would like to have this issued in duplicate. If you can, it would be fine to mark one "duplicate".

Thank you,

Yours truly,

of the law set forth  
on this page.

(42-233a and 42-233b)

This law was  
revoked March  
25, 1963

42-232a. NOTICE OF APPLICATION. — Within a period of ten days after the filing of an application for permit with the state reclamation engineer, as hereinafter provided, the state reclamation engineer in a critical ground water area, as hereinafter defined in this section, shall issue a notice of such application stating the name of the applicant, the location of the well or wells, the amount of the flow of water proposed to be used, and the description of the premises upon which the water is proposed to be used. Such notice shall also state that all persons having an interest in the critical ground water area desiring to oppose the issuance of a permit pursuant to such application, must within a period of thirty days from the first publication of such notice file in the office of the state reclamation engineer a protest to such application. A copy of the notice shall be furnished to the applicant, who shall cause the same to be published in a newspaper published in the county where the well described in said application is proposed to be located; or if no newspaper is published in such county, then in a newspaper of general circulation in such county. Publication of such notice shall be made two times, once each week for two consecutive weeks, and proof of such publication shall be furnished by the applicant to the state reclamation engineer. "Critical ground water area" means any ground water basin, or designated part thereof, not having sufficient ground water to provide a reasonably safe supply for irrigation of cultivated lands in the basin at the then current rates of withdrawal, as may be determined, from time to time, by the State Reclamation Engineer.

In the event the application for permit is made with respect to an area that has not been designated as a critical ground water area the State Reclamation Engineer shall forthwith issue a permit in accordance with the provisions of Section 42-234 without requiring compliance with the provisions of the preceding paragraph of this section or the provisions of Section 42-233b.

42-233b. PROTEST AND HEARING. — All persons desiring to be heard in protest of the granting of a permit pursuant to an application made under this act must file with the state reclamation engineer within thirty days after the first publication of the notice of such application as hereinabove provided, a protest against such application; provided, that for good cause shown the state reclamation engineer may permit protests to be filed any time prior to the completion of the hearing on such application. After the lapse of thirty days following the first publication as hereinabove provided, the state reclamation engineer shall, if any protests against the application have been filed, fix a time and place for the hearing of such application. The time for holding such hearing shall not be more than fifty days from the first publication of said notice. Notice of the hearing shall be given by registered mail to the applicant and to all protestants.

The hearing shall be conducted before the state reclamation engineer under reasonable rules and regulations of procedure promulgated by him. Technical rules of pleading and evidence need not be applied. The state reclamation engineer may adjourn said hearing from time to time and place to place within the reasonable exercise of his discretion. All parties to the hearing as well as the state reclamation engineer shall have the right to subpoena witnesses, who shall testify under oath at such hearing. The state reclamation engineer shall have authority to administer oath to such witnesses as appear before him to give testimony. A full and complete record of all proceedings had before the state reclamation engineer on any hearing had and all testimony shall be taken down by a reporter appointed by the state reclamation engineer and all parties to the hearing shall be entitled to be heard in person or by attorney.

If no person protests an application within the period of thirty days following the first publication of notice thereof as hereinabove provided, and if the state reclamation engineer has determined from investigation that there probably is ground water subject to appropriation at the location of the proposed well, the state reclamation engineer may issue a permit pursuant to such application forthwith and for an amount of water not to exceed the amount of water determined to be there subject to appropriation; but if the state reclamation engineer, from the investigation made by him on said application as herein provided or from other information that has come officially to his attention has reason to believe that said application is not made in good faith, is made for delay, or that there is no water subject to appropriation at the location of the proposed well in said application described, then the state reclamation engineer shall issue a citation to the applicant to appear and show cause, if any there be, why such application should not be denied for any of those reasons. The hearing on said citation shall be fixed, noticed and conducted in the same manner as hearings on protest of application as in this section hereinabove provided.

If, at the conclusion of any hearing held pursuant to this section the state reclamation engineer finds that there is ground water available for appropriation at the location of the proposed well described in the application, and that said application is made in good faith and not for delay, then the state reclamation engineer shall issue a permit pursuant to such application; otherwise, the application shall be denied; provided, however, that if ground water at such location is available in a lesser amount than that applied for, the state reclamation engineer may issue a permit for the use of such water to the extent that such water is available for appropriation.

POINT OF DIVERSION

Permit No. G-30735

Comes now Mez McMurray, acting in behalf of McMurray Land & Livestock Co. and represent      to the State Reclamation Engineer of the State of Idaho:

That he is (are) the owner      and holder      of Permit to A appropriate the Public Waters of the State of Idaho, No. G-30735.

That the point      of diversion is described in said Permit as being located:

SW4NW4 Section 15, Twp. 12 S., Range 22 EBM, Cassia County

That      he      now requests that the point      of diversion be changed to a point      located: NW4SW4 Section 15, Twp. 12 S., Range 22 EBM, Cassia County

That the reason for desiring to make such change is as follows:

An error was made at the time the application was sent in,

putting the point of diversion in the wrong quarter section.

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

Signed at Burley, Idaho, this 16th day of October, 19 62.

Gentlemen:

Enclosed are original and two copies of a legal notice for publication in a Cassia County paper for once a week for two successive weekly issues. Kindly fill in blank spaces at the bottom of each notice. Give original to the paper, retain one copy for your file and return one copy to this office.

Send the affidavit of publication to this office prior to last date for protest.

This publication is necessary as the Statutes define an amendment as constituting a new permit and is issued as an amendment to the original permit, to which it refers and of which it becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected thereby.

Dear Sir:

Returned herewith is your permit with attached papers. You do not need to send the permit as we have the record in this office. Also enclosed is form to apply for a change in point of diversion.

Return the completed application with the fee of \$1.00 for recording.

As the location is in a Critical Ground Water Area, we believe that a notice of the proposed change in point of diversion must be published similar to the notice of the original application for permit.

Please refer to your letter of October 5, 1962.  
Would you please amend the description to read NW Quarter,  
Southwest Quarter, Section 15, Township 12 South, Range 22  
EBM. We inadvertently showed the location as Southwest Quarter  
Northwest Quarter, Section 15, Township 12 S., Range 22 EBM.

We are enclosing the application as you may want  
to make the amendment on it.

We would appreciate your returning it as soon  
as possible.

Yours truly,

McMurray Land & Livestock Co.,  
Box 368,  
Burley, Idaho.

Gentlemen:

~~XXXXX~~

We enclose Permit No. G-30735 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

We also enclose Departmental Receipt No. G-7282 which was issued covering payment in the amount of \$6.00 for the filing fee of the above mentioned permit. ~~XXXXXXXXXXXXXXXXXXXX~~

Well logs are an important part of your recorded water right and State Statutes require that well drillers' supply logs on all wells, whether irrigation, domestic, drain or stock wells, to be filed in the Department of Reclamation. In view of the rapidly increasing demand for ground water, the lowering of the ground water level, and the creation of critical ground water areas, it is important that you, as owner, make sure a log on your well is filed in this office.

Very truly yours,

GEO. N. CARTER  
State Reclamation Engineer
