Dear Mr. Jarolimek:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Burley Herald & Bulletin, all submitted in proof of completion of works and beneficial use on Permit No. G-30562.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

This Application
was APPROVED
under the provisions
of the law set forth
on this page.

(42-233a and 42-233b)

This law was
revoked March
25, 1963

42-233a. NOTICE OF APPLICATION.—Within a period of ten days after the filing of any application for permit with the state reclamation engineer, as hereinafter provided, the state reclamation engineer shall cause a notice of such application stating the name of the applicant, the location of the well or wells, the amount of the flow of water proposed to be used, and the description of the premises upon which the water is proposed to be used. Such notice shall also state that all persons having an interest in the critical ground water area desiring to oppose the issuance of a permit pursuant to such application, must within a period of thirty days from the first publication of such notice file in the office of the state reclamation engineer a protest to such application. A copy of the notice shall be furnished to the applicant, who shall cause the same to be published in a newspaper published in the county where the well described in said application is proposed to be located; or if no newspaper is published in such county, then in a newspaper of general circulation in such county. Publication of such notice shall be made two times, once each week for two consecutive weeks, and proof of such publication shall be furnished by the applicant to the state reclamation engineer. "Critical ground water area" means any ground water basin, or designated part thereof, not having sufficient ground water to provide a reasonably safe supply for irrigation of cultivated lands in the basin at the then current rates of withdrawal, as may be determined, from time to time, by the State Reclamation Engineer.

In the event the application for permit is made with respect to an area that has not been designated as a critical ground water area the state reclamation engineer shall forthwith issue a permit in accordance with the provisions of Section 42-234 without requiring compliance with the provisions of the preceding paragraph of this section or the provisions of Section 42-233b.

42-233b. PROTEST AND HEARING.—All persons desiring to be heard in protest of the granting of a permit pursuant to an application made under this act must file with the state reclamation engineer within thirty days after the first publication of the notice of such application as hereinabove provided, a protest against such application; provided, that for good cause shown the state reclamation engineer may permit protests to be filed any time prior to the completion of the hearing on such application. After the lapse of thirty days following the first publication as hereinabove provided, the state reclamation engineer shall, if any protests against the application have been filed, fix a time and place for the hearing of such application. The time for holding such hearing shall not be more than fifty days from the first publication of said notice. Notice of the hearing shall be given by registered mail to the applicant and to all protestants.

The hearing shall be conducted before the state reclamation engineer under reasonable rules and regulations of procedure promulgated by him. Technical rules of pleading and evidence need not be applied. The state reclamation engineer may adjourn said hearing from time to time and place to place within the reasonable exercise of his discretion. All parties to the hearing as well as the state reclamation engineer shall have the right to subpoena witnesses, who shall testify under oath at such hearing. The state reclamation engineer shall have authority to administer oath to such witnesses as appear before him to give testimony. A full and complete record of all proceedings had before the state reclamation engineer on any hearing held and all testimony shall be taken down by a reporter appointed by the state reclamation engineer and all parties to the hearing shall be entitled to be heard in person or by attorney.

If no person protests an application within the period of thirty days following the first publication of notice thereof as hereinabove provided, and if the state reclamation engineer has determined from investigation that there probably is ground water subject to appropriation at the location of the proposed well, the state reclamation engineer may issue a permit pursuant to such application forthwith and for an amount of water not to exceed the amount of water determined to be there subject to appropriation; but if the state reclamation engineer, from the investigation made by him on said application as herein provided or from other information that has come to his attention has reason to believe that said application is not made in good faith, is made for delay, or that there is no water subject to appropriation at the location of the proposed well in said application described, then the state reclamation engineer shall issue a citation to the applicant to appear and show cause, if any there be, why such application should not be denied for any of those reasons. The hearing on said citation shall be fixed, noticed and conducted in the same manner as hearings on protest of application as in this section hereinabove provided.

If, at the conclusion of any hearing held pursuant to this section the state reclamation engineer finds that there is ground water available for appropriation at the location of the proposed well described in the application, and that said application is made in good faith and not for delay, then the state reclamation engineer shall issue a permit pursuant to such application; otherwise, the application shall be denied. However, that if ground water at such location is available in a lesser amount than that applied for, the state reclamation engineer may issue a permit for the use of such water to the extent that such water is available for appropriation.

Dear **Sirs:**

We enclose Permit No. **G-30562** in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

We also enclose Departmental Receipt No. **G-6964** which was issued covering payment in the amount of **\$ 6.50** for the filing fee of the above mentioned permit. ~~was handed to you~~

Well logs are an important part of your recorded water right and State Statutes require that well drillers' supply logs on all wells, whether irrigation, domestic, drain or stock wells, to be filed in the Department of Reclamation. In view of the rapidly increasing demand for ground water, the lowering of the ground water level, and the creation of critical ground water areas, it is important that you, as owner, make sure a log on your well is filed in this office.

Attn: Charles H. Creason

Dear Mr. Creason:

We wish to acknowledge receipt of your application for permit in the name of Robert Jarolinek for 320 inches from a subterranean source in the County of Cassia, for irrigation purposes.

The fee that should have accompanied the enclosed permit is \$6.50, which you may remit to the Department of Reclamation, Statehouse, Boise, Idaho. The permit is in good form.

We also wish to acknowledge receipt of the relinquishment on Permit No. G-26977, in the name of Robert Jarolinek. Kindly return the application with the fee.

Very truly yours,

GEO. W. CARTER
State Reclamation Engineer
