Mr. Donald W. McEldowney

Department of Reclamation

Dear Mr. McEldowney

I received your notice of water measurement of our newest well yesterday, and last night I went out on the town to celebrate. Every time we get a new well I tell my sons I am going out and get drunk. I have made the statement so many times they do not believe me any more. If any well should be celebrated thusly, this better than 500 inch one should. Some drank wine, some brandy, but all I did was take a sniff, and issued up a prayer of thankfulness. I really think the others would have enjoyed seeing me drunk more than I would have enjoyed being drunk any way. To say the least, we were all so very happy and grateful for our good fortune. We do not forget that water is Idaho gold.

I do not believe I have ever written a check that I was so happy to write as this one which I enclose for \$51.00.

Sincerely yours

Esther O. Blei

Mr. and Mrs. Lawrence S. Bief
Murtaugh, Idaho

Dear Mr. and Mrs. Bief:

Enclosed herewith are forms for Notice of Publication partially filled out to cover all three permits listing the point of diversion and land lists, if correct please fill out the remaining blanks and return promptly.

Because you are the holder of three separate permits you are required to make proof on each, even though only one well is covered.

We are in receipt of the amendment to point of diversion on the same permits. However, before these can be recorded, we must be in receipt of \$3.00 recording fees.

Very truly yours,

Re: Applications for Permit

Mrs. Esther O. Blei
Murtaugh, Idaho

Dear Mrs. Blei:

Returned herewith are the two applications for permit, each with attached checks for \$5.75, which you submitted.

The application for irrigation of the N $\frac{1}{2}$, Section 3, can be approved for 3.77 c. f.s. License No. 20547 and No. 22382 total 131.5 inches of water for this land.

The application for irrigation of land in Section 4, is in conflict with the application of Mr. Blei in regard to 40 acres in the E $\frac{1}{2}$ of the section. Possibly one application showing the two points of diversion for all the land would be advisable. There is 21 inches of water from License No. 20547 to irrigate 54 acres in the N $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 4.

This application can be approved for 195 inches of water, 10 inches supplemental and 185 inches for new lands or the quantity can be reduced to 160 inches and 40 acres in the SE $\frac{1}{4}$ of Section 4, can be deleted.

The conflict in lands to be irrigated should be removed.

Very truly yours,

GEO. N. CARTER
State Reclamation Engineer
