Ans. 4.0 - approximately 4.0

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. 4.0 - by comparing the size of the stream with others which I had
previously seen measured.

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation - 160 acres in the NE Quarter and 320 acres in the South Half
of Section 15, Twp. 12 S., Range 22, EBM. This land was arid desert grazing
land prior to the well being drilled. It is now cultivated farm land.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation Only

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

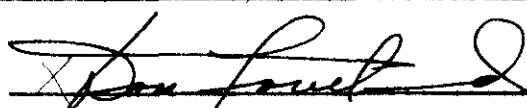

Ans. The land was arid desert grazing land of fine quality soil. The water
has made it a cultivated farm - 4.0 cubic inches

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent.

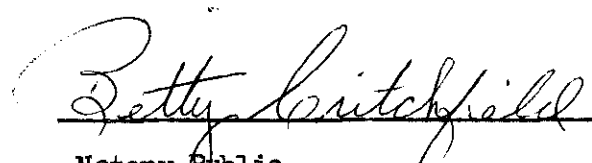

Ans. NO

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. Cropping seasons of 1960, 1961, and 1962. Irrigation - 4.0 cubic
inches. The water was used for cultivation of potatoes, hay and grain.

Gentlemen:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. G-28603. The proofs are to be made at 10:00 o'clock A.M., on the 1st day of October, 1962, before Betty Critchfield, 239 West 13th St., Burley, Idaho., Notary Public.

As of this date we have mailed the Notice to the Herald Bulletin Burley, Idaho, with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof then mail the affidavit of publication and statement of costs to you.

It is important that the enclosed depositions be executed by you and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the place, on the date, and at the time and before the Notary, as advertised. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, the Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the Affidavit of Publication.

Very truly yours,

Attention: Ralph W. Thomas

Dear Mr. Thomas:

Your letter of May 14, 1962 reached us shortly after that date, but was misplaced and we just found it today. We are returning the forms 36 and 11 which we have filled in as completely as we could from available information. We have misplaced the permit so we would appreciate your getting this information from your own files.

We would appreciate hearing from you as soon as possible regarding completion of the necessary advertising, etc.

Yours truly,

Dear Mr. McMurray:

Enclosed are Forms 36 and 11, legal notice and authority to publish, in regard to proofs of beneficial use of water from subterranean source.

There is no need to make an amendment to the point of diversion as the well is still in the same 40-acre subdivision.

RE: McMurray Land & Livestock Co.
Permit No. G 26827
Permit No. G 28603

Gentlemen:

Your Mr. Johnson made a test for water flow on our ranch, involving the two pumps under the two above numbered permits. He was to send me the necessary forms for depositions, etc. As soon as I receive them, I will complete the requirements.

He asked me to forward well logs and well tests, so I am enclosing them.

In Regard to G-26827, the well test shows a maximum of 173 inches. This was the maximum capacity of the test pump and this was the volume of water from 394 feet. The setting of the bowls is approximately 450 feet, enabling the pump to produce the amount of water as shown by Mr. Johnson's test, approximately 201 inches.

In regard to G 28603, you will notice that the maximum amount of the test was 208 inches from a pumping depth of 430 feet. This well, according to the test by Mr. Johnson, produces 188 miners inches. I believe that the original application shows the location of the well in the SE⁴SW⁴ of Sec. 15, Twp. 12 S., Rge. 22 E. I believe that it will be necessary to ammend this location to read SW⁴SE⁴SW⁴ of the same section, township and range. We thought we were correct in the original application for the permit, but measurements made by Mr. Johnson during his visit the other day showed that the location was just slightly over the line into the last mentioned location.

We are looking forward to receiving the forms for completion of your requirements.

Incidentally, both wells were drilled by R. T. McClure and R. W. Bushey of Kimberly, Idaho.

Yours truly,

McMURRAY LAND & LIVESTOCK CO.
