Dear Mr. Grigg:

We received your protest of the amounts of water determined by the field examiner from the wells in Sections 11 and 12, T. 12 S., R. 22 E., and Section 6, T. 12 S., R. 23 E., B. N.

The water from two wells was measured with a current meter and from the other well over a Cipolletti weir. Both methods are good procedures when the meter cannot be attached to the pump discharge.

Your reference to the pump company's tests shows considerable more water. Those tests may have been made when other wells were not competing for the available water or were they made with the test pumps before your pumps were installed?

Another inspection will be made next season.

It is important that the enclosed depositions be executed by the permit holder and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the time, on the date and before you, as Notary, as stated in the publication notice. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, that your Notary's seal has been placed on each and that all depositions, (Holder and two witnesses) are being returned. Also be sure to enclose the Affidavit of Publication.

Very truly yours,

GEO. N. CARTER
