G-27993-

January 13, 1967

Dear Water User:

As you are aware a large area in Twin Falls and Cassia Counties was designated as a critical ground water area in 1962. Since that time the State Reclamation Department has entered into a cooperative agreement with the U. S. Geological Survey to study the ground-water resources of the area. That study is now completed, and a report is being prepared. The state reclamation engineer is reviewing the hydrology and water level changes while considering the possibility of modifying the area that is designated as critical and closed to additional water development.

With regard to this the State Reclamation Engineer, R. Keith Higginson, will conduct a public meeting in the Murtaugh High School Auditorium at 7:30 P.M. on January 25, 1967. The locations and amounts of present water rights will be reviewed, and alternatives for modification of the area will be presented. In addition U. S. Geological Survey personnel will be present to relate what is now known of the ground water resources of the area.

Water users are encouraged to participate in the discussion, and all interested parties are urged to attend.

Very truly yours,

Jack A. Barnett
Assistant State Reclamation Engineer

Dear Mrs. Garner:

We have the report of the field examiner of the works under Permit No. G-27993. The report shows you have a well in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 9, which produces 1.82 cubic feet per second to irrigate 245 acres in S $\frac{1}{2}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$, Sec. 9, T. 11 S., R. 21 E. There is also a second well in SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 10, which produces 3.45 cubic feet per second used to irrigate the same land. The second well is not shown on the permit. The first notice we have of two wells is when the depositions were received April 20, 1962.

We can possibly recognize the second well with proof that it was drilled prior to the designation of your area as a critical ground water area. We do not have a log for either well.

The point of diversion, shown on the permit, will have to be amended prior to any certificates of water rights can be issued which show more than one point of diversion.
