TRANSFER NO. 4065
WATER RIGHT NO(S). 45-02283/45-02322/45-02575

CONDITIONS OF APPROVAL AND REMARKS

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. Use of water under this water right will be regulated by the watermaster of State Water District No. 45-O.
3. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.0 afa per acre for the lands above.
4. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
5. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
6. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
8. Right Nos. 45-02283, 45-02322 and 45-02575 when combined shall not exceed the total diversion rate of 5.52 cfs, a total annual diversion volume of 1663.0 af, nor irrigation of more than 733.2 acres.
9. Totalizing measuring devices and lockable controlling works of a type approved by this Department shall be maintained as a part of the diverting works of each authorized point of diversion in a manner that will provide the watermaster suitable control of the diversion.
10. Right Nos. 45-02283, 45-02322 and 45-02575 are subject to the conditions of the decree of Case No. 9818 dated 06-25-1980.
11. Two points of diversion are located in SWNW, S25, T12S, R20E.

Dated this 17th day of April, 1996.

4. Remarks (Continued)

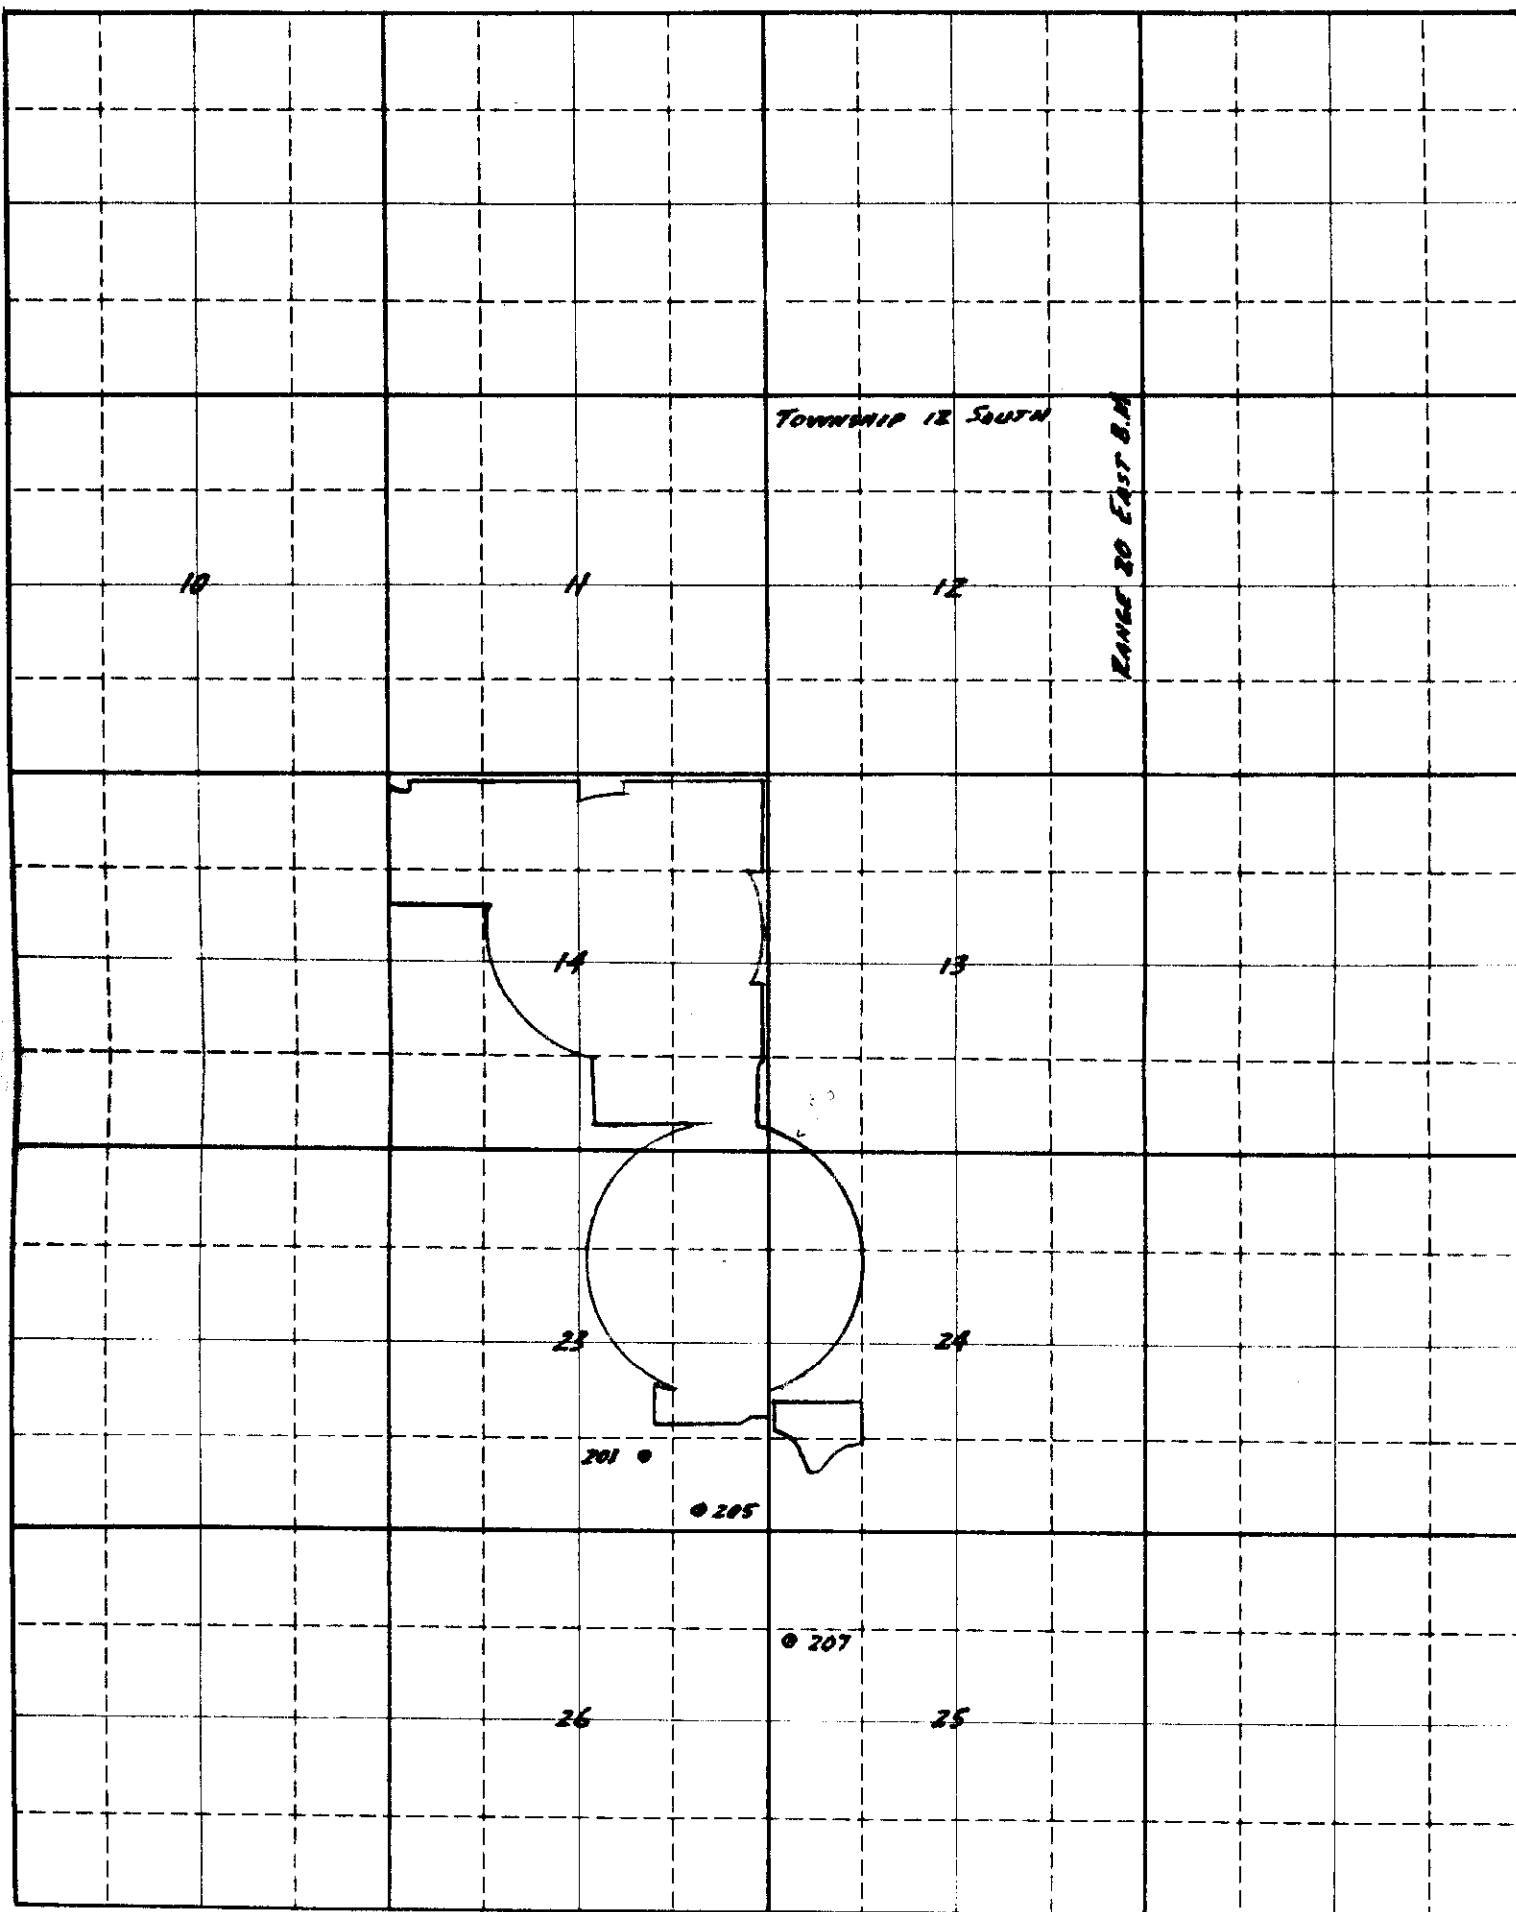

Thus, there is no actual change in point of diversion.

The locations of the 600 acres of land under paragraph A.8 herein were generally identified as such in said Transfer when the nature and extent of applicant's water rights were in dispute in the then pending litigation in Cassia County, Civil No. 9818. There, the director sought to limit applicant's rights to 1233 acre feet annually and applicant claimed 1982 acre feet annually. A final Judgment was entered in Cassia County, Civil No. 9818 on June 25, 1980, (copy attached) wherein applicant's water rights under the designated licenses were fixed and finally adjudicated at 1663 acre feet annually.

The purpose of this application is to conform the licensed water rights covered herein to the actual use of the waters, as confirmed by the final Judgment in Cassia County Civil No. 9818. The 1663 acre feet of water annually as confirmed under paragraph I thereof are diverted by any combination of the three wells specified and are used on the 733.2 acres of land described in paragraph C.2 above, all of which overlay the Big Cedar Buckhorn Aquifer. Paragraph IX of said Judgment specifically confirms that applicant in fact is and has been applying the waters awarded to him under Paragraph I thereof to beneficial use in compliance with the statutes of the State of Idaho and the law as established in that case. Thus, the primary purpose hereof is to identify the lands upon which said waters are and have been applied to beneficial use as confirmed by Paragraph IX of said Judgment and to conform applicant's designated licenses accordingly.

4. Remarks Prior Transfer No. 45-2283/45-2232/45-2575 amended applicant's designated license rights to authorize the diversion of the waters by means of four wells located at Pole Nos. 201, 205, 207 and 208. This application proposes to eliminate the well at Pole No. 208 and to divert the waters by any combination of the remaining three wells. (See attached sheet).

I hereby assert that no one will be injured by such change and the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

O R D E R

WHEREAS, on August 28, 1981, the Department of Water Resources received from Joseph E. Tugaw an Application For Transfer of water rights Nos. 45-2283, 45-2322 and 45-2575; and,

WHEREAS, said Application For Transfer proposes to change the description of the place of use on said water rights from 600 acres to 733.2 acres to conform with the present use of the water rights; and,

WHEREAS, based on an initial analysis, the consumptive use of said water rights would apparently be increased if the number of acres irrigated is increased; and,

WHEREAS, under provisions of Section 42-222, Idaho Code, the director cannot approve a transfer application that constitutes enlargement in the use of the original rights; and,

WHEREAS, an Order to Show Cause why the Application For Transfer should not be denied was sent to the applicant on January 30, 1982, by the Director; and,

WHEREAS, the applicant has submitted evidence that indicates Paragraph IX of the District Court Judgment for Case No. 9818 signed by District Judge Theron W. Ward on June 25, 1980, was intended to affix irrigated acreage at the quantities irrigated at the time the judgment was signed; and,

WHEREAS, the applicant has demonstrated that the acreage irrigated by his system in 1980 was in fact the 733.2 acres described in the Application For Transfer; and,

WHEREAS, the applicant has provided affidavits signed by all parties presented in the final judgment, except the Idaho Department of Water Resources, which indicate that counsel for all parties concurred in the interpretation that said judgment, and particularly Paragraph IX thereof, awarded to the applicant the right to irrigate the full 733.2 acres of land

with the 1,663 acre feet of water awarded to him; and,

WHEREAS, parties submitting affidavits represent all of the parties presently entitled to use water from the ground water basin; and,

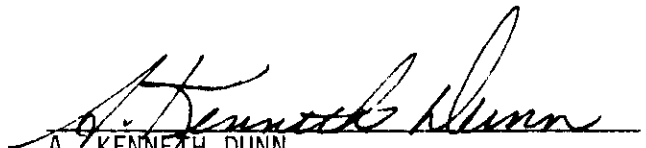

WHEREAS, the evidence submitted by the applicant is sufficient to interpret that the Judgment in Case No. 9818 dated June 25, 1980, allowed for the irrigation of 733.2 acres with 1,663 acre feet of water per annum:

NOW, THEREFORE, Application For Transfer No. T2603 is hereby APPROVED subject to the conditions:

1. Totalizing devices and lockable controlling works of a type acceptable to the department shall be permanently installed and maintained as part of the diverting works.

2. Use of water under this right is subject to control by the watermaster of State Water District No. 45-0, Golden Valley.

WHEREAS, on August 28, 1981, the Department of Water Resources received from Joseph E. Tugaw an Application For Transfer of water rights nos. 45-2283, 45-2322 and 45-2575; and,

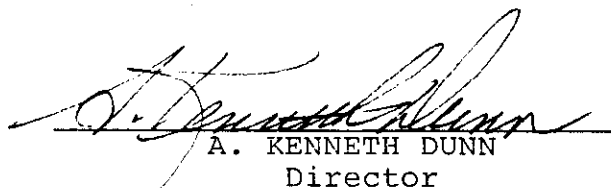

WHEREAS, said Application For Transfer proposes to change the description of the place of use on said water rights from 600 acres to 733.2 acres to conform with the present use of the water rights; and,

WHEREAS, the consumptive use of said water rights would apparently be enlarged if said Application For Transfer is approved; and,

WHEREAS, under provisions of Section 42-222, Idaho Code, the Director cannot approve a transfer application that constitutes an enlargement in the use of the original rights;

IT IS, THEREFORE, HEREBY ORDERED that the Applicant for Transfer of said water rights show cause before the Director of the Department of Water Resources on or before April 1, 1982, why Application For Transfer No. T2603 should not be Denied, by demonstrating how the water right can be spread on an additional 133.2 acres without causing an increase in consumptive use.

EXPLANATORY

Par. 8, continued

The 491 acres described herein are those specified in License No. G-27866 upon which proof was made during the period when junior wells had substantially reduced the water levels in the limestone aquifer known as the Big Cedar-Buckhorn aquifer, and by reason thereof applicant's predecessors were unable at that time to irrigate the total acreage theretofore irrigated of at least 580 acres, and applicant does not intend hereby to jeopardize his claim of right to irrigate the full 580 acres.

Par. 11, continued

Applicant proposes to install two center pivot sprinklers and hand moved sprinklers at the approximate locations shown on the included sketch. It is impractical at this time to specify the number of acres to be irrigated within each 40 acre tract because of the circular perimeter thereof and the positioning of the center of pivot. However, the total acreage will be embraced within the 40 acre tracts designated herein.

Applicant proposes to more efficiently use the full quantity of water awarded to his predecessors under the Amended Decree referred to above by means of the proposed sprinkler irrigation system, and by reason thereof applicant will be able to irrigate more acreage with the same quantity of water than under the prior corrugate system. In addition thereto, the waters covered hereby will be used supplementary to applicant's rights from intermittent surface sources as specified in par. 11(d) herein.

9. If applicant was not the original holder of this right explain how it was acquired: On December 8, 1971 William J. Brockman and Marie Brockman assigned their interests as purchasers from Glen Briggs and Hazel Briggs under Contract of Purchase and Sale dated May 27, 1966 to applicant. See attached Assignment.

10. CHANGE IN POINT OF DIVERSION

a. Quantity to be diverted at new point: - c.f.s. and/or 1982 acre feet
(205) SE $\frac{1}{4}$ SE $\frac{1}{4}$ (same well as par. 7)

b. New point of diversion: (201) SW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 23, Township 12 South, Range 20 East, B.M. (207) and (208) both in SW $\frac{1}{4}$ NW $\frac{1}{4}$, Section 25, Township 12 South, Range 20 East, B.M.

c. Description of method of diversion and conveyance from new points of diversion: Diversion - 4 wells with pumps; conveyance by means of concrete ditches and pipes from each well to boxes and/or supply lines to sprinkler system and corrugates

d. Is water to be conveyed to the lands previously irrigated? Yes x No x

If not, the place of use should be changed below.

e. Describe the reasons for applying for a change in the point of diversion:
Reductions in water levels in limestone aquifer necessitates utilizing additional wells to divert the 1982 acre feet of water awarded under the above amended decree to applicant's predecessors and to more efficiently use the waters so awarded by center pivot sprinkler system and corrugates

f. Do you intend to make the transfer permanent? Yes

g. Do you intend to abandon completely the old point of diversion? No

h. Indicate on the above plat the new point of diversion and lands to be irrigated.

11. CHANGE IN PLACE OF USE (See attached sheet - Explanatory)

a. Describe the new lands on which you wish to use your right.

TWP.	RANGE	SEC.	NE $\frac{1}{4}$				NW $\frac{1}{4}$				SW $\frac{1}{4}$				SE $\frac{1}{4}$				TOTALS

12 S	20 E	13											x						
12 S	20 E	14	x	x	x	x	x			x	x				x	x	x	x	
12 S	20 E	23	x	x	x	x									x	x			
12 S	20 E	24						x	x			x	x						

b. Do you intend to make the transfer permanent? Yes

c. Are you completely abandoning the lands previously irrigated by this right? If not, explain your plans:

Two center pivot sprinklers and hand move sprinklers will be used to irrigate in part lands presently irrigated and new lands as generally shown on the above sketch

d. Describe any other water rights that you claim for the new ground upon which you wish to transfer this right: License Nos. 4426 and 21358; 60 inches of water from Mountain Meadows Creek.

e. Indicate on the above plat the new land to be irrigated and the point of diversion.

I hereby assert that no one will be injured by such transfer and that the change will be made at my own risk. The information contained in this application is true to the best of my knowledge.

REMARKS

Started pumping well slowly: Increased speed and capacity as water cleared. Pumped some small rock, sand and fair amount of clay coloring.

Water level was starting to recover on final end of test. Shut pump down at 12:00 and checked well recovery. Well came back up to 40 ft. as fast as sounder could be pulled out of well. Recovery slow above 40 ft.

LAYNE & BOWLER PUMP COMPANY

2943 VAIL AVENUE, LOS ANGELES 22, CALIFORNIA. MAILING ADDRESS: P.O. BOX 6991

TELEPHONE: RAYMOND 3-3381

May 29, 1962

To whom it may concern:

The following are the results of a test conducted by LAYNE & BOWLER PUMP COMPANY of 1760 Kimberly Rd. Twin Falls, Idaho, for Mr. Glen Briggs of Murtaugh, Idaho. Well and pump being located on what is known as the Buckhorn Ranch.

This test done at the request of Glen Briggs. Testing equipment consisted of Mr. Briggs own pump set in at 280 Ft. with 3 stgs. 14" 'RH' bowl assembly and was fitted out with LAYNE & BOWLER'S gear drive and twin GMC diesel test engines.

The reason for using Glen Briggs own well pump was when test was finished pump could be left in well and customers electric motor put on and cost could of course would be hld down.

Pump had an air line installed to a depth of 280 Ft. with everything in order the test was started on the 12th day of May 1962.

After considerable pumping a check of the draw down was made, this was done after test engines had been held at full throttle for 2 hrs. time. Water table was at 200 Ft., capacity of pump was 3375 GPM or 375 inches of water.

This draw down and capacity was held for a period of 2 hrs. with no change in either. Plans were made to make several checks at different draw down points, but was unable to do so as either the air line became plugged or was dented in, not allowing us to take any more readings.

In our opinion at this point we had satisfied ourselves that we could not pull the water below the 200 Ft. pumping level. Capacity of 375" was held for the complete time of testing at full throttle.

This of course is only an opinion of myself as LAYNE & BOWLER PUMP CO. that if we had had more speed or could have pumped with a greater capacity this well at the time would have produced up to at least 500" of water and not to exceed the 250 Ft. pumping level.

Yours truly,

Glenn Briggs
Murtaugh, Idaho

Dear Mr. Briggs:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 27866 are due not later than April 8, 1964

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used, the point, or points, of diversion; and the location of use or the lands which are irrigated -- all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

Dear Mr. Briggs:

Enclosed are two forms, Transfer of Water Right, Form No. 20,
and form to amend the Land List.

You may complete the applications for transfer of water right
for change in point of diversion under the two water licenses
where the wells are dry. We would prepare two legal notices
for publication in two weekly issues of the county paper at
your cost which would probably be under \$10.00 each. In case
of protest, a hearing would be held. In case of no protest,
the certificates for change of point of diversion would be
issued upon receipt of the Affidavits of Publication, and a
fee of \$1.00 for each transfer. The Land List could also be
changed to make both licenses appurtenant to the same land.

Your area is in a Critical Ground Water Area and this office
is not approving any permits to divert subterranean water in
that area.

Mr. Julian S. Blays,
542 Addison Avenue West,
Twin Falls, Idaho.

Dear Mr. Blays:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. G-27866, in the name of Glen Briggs. Final Proof is to be made before you, as Notary on the 8th day of April, 19 64, at 9:00 o'clock A.M., at 542 Addison Avenue West, Twin Falls, Idaho.

As of this date, we have mailed the Notice to the Herald-Bulletin Burley, Idaho, with instructions to publish it once a week for 3 consecutive weeks prior to the date set for final proof and then mail the Affidavit of Publication and statement of costs to you.

It is important that the enclosed depositions be executed by the permit holder and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the time, on the date and before you, as Notary, as stated in the publication notice. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, that your Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the AFFIDAVIT OF PUBLICATION.

Very truly yours,

CARL E. TAPPAN

Dear Mr. Briggs:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the BURLEY HERALD-BULLETIN, all submitted in proof of completion of works and beneficial use on Permit No. **0-27866**.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

RE: Permit Nos. G-27866, G-28632, G-28649

Mr. Glen Briggs
Murtaugh, Idaho

Dear Mr. Briggs:

On September 16, 1966 Jack Barnett, Assistant State Reclamation Engineer, and I made an inspection of the above permits in the company of Mr. W. J. Brockman, the new owner.

Please find enclosed a copy of a photo map of the land which is being irrigated. The land outlined in blue is the land that is being irrigated that you amended from the original permits.

The red bordered land in the S $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 14 and the NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 23 was deleted in the amendment of all three permits. The photo map shows the land is irrigated and it is confusing to us as to why it was deleted.

To include this land in the licenses it will be necessary for you to readvertise at your expense and possibly take a loss in priority.

We found the wells produced as follows: No. 1, 2.38 c.f.s.; No. 2, 1.14 c.f.s.; No. 3, 1.74 c.f.s. or a total of 5.26 c.f.s. The black circled figures in each 40 acre subdivision of the map in the blue border total 376 acres to which water is being applied beneficially. The deleted land totals 113 acres. The combined acreage is 489 acres. Mr. Brockman stated he was irrigating approximately 500 acres. He also stated he was going to submit a formal protest in accepting the above measurements for license and is going to request a remeasurement.

All the licenses will be in your name unless you assign the permits to Mr. Brockman. May we hear from you in regard to the examination?

Dear Mr. Higgenson:

This letter will serve as a formal protest to the measuring of our wells by Mr. Jack Barnett and Mr. Loy Johnson on September 16, 1966.

It is to my knowledge that these wells are at their lowest point of production at this time. They were at a much higher production level in April 1966 and have been pumping constantly since.

I have been in Idaho for 2 years and had possession of the Buckhorn Ranch since March 1, 1966. I am not familiar with the Idaho Bureau of Reclamation or its procedure. I respectfully request a meeting with , at your convenience, to discuss this matter further.

Our pumps will be started about March 1, 1967, unless appreciable moisture is received before then.

I would appreciate your consideration in delaying the measurement of these wells until the spring of 1968 in hopes of normal moisture conditions by that time. We fully realize that our water level has dropped due to the record breaking two years of drouth in this area. We also realize by establishing our water rights at this time, we will be severly handicapped in making a sucess of this operation. In view of the past two years of drouth, we hope you will look favorably on this request.

Dear Mr. Brockman:

We are in receipt of your letter of February 27 concerning the above numbered permits. I feel that it is not reasonable or possible for us to delay the measurement of the discharge of your wells for another irrigation season. We were happy to extend the finalization of your water right from last fall until the present so that we might obtain a measurement of the spring discharge of the wells. I think that if you were to start the pumping of these wells almost immediately, as you have indicated in your letter, it will surely be to your advantage, and we will try to oblige as best we can with our limited staff to measure the discharge of the wells at the earliest possible date. We have an engineer in the field this week in the general area, and if I am able to get in touch with him by phone I will try to arrange for him to visit your property. If not we would appreciate correspondence from you indicating whether or not you have actually turned the wells on so that we might plan on a future examination as soon as it can be arranged.

I have enclosed herein a copy of a recent publication concerning the ground water conditions in Idaho. The area about which you are most directly concerned is discussed on pages 39 through 42. The hydrograph at the bottom of Figure 34 illustrates the water level declines in your aquifer as measured by the U. S. Geological Survey observation well. You will note that over the period of the last five years the water levels have declined 80 feet in this well, and that the recoveries of the water levels during the non-irrigation seasons have always been nonexistent. This would indi-

cate to me that it is very likely that you may be faced with continuing declining water levels even in periods of high precipitation. The fact that there is no winter and spring recovery of the water level would lead me to believe that there is very little recharge to your aquifer. With this in mind it would appear that our measurement last fall and one that we might make this spring may be the best measurement that can be expected. If this is true it would be to your advantage for you to proceed immediately with finalization of the water right.

Very truly yours,

Jack A. Barnett
Deputy State Reclamation Engineer

Glen Briggs
Murtaugh, Idaho

Dear Mr. Briggs:

The Department of Reclamation has recently conducted a field examination of the above referenced permits. During the field examination, it was noticed that there are lands being irrigated not covered under the permits.

Therefore, you are requested to amend the land list of all three permits to include the S $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 14; NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 22, T. 12 S, R. 20 E, B.M. Forms for amendment are enclosed. Please sign the three amendment forms returning them to this office with \$5.00 for each form for amendment totaling \$15.00.

Also enclosed please find form 11, authorization to publish at your expense. Please sign this form 11 and we publish your amendments so that we can proceed with the licensing.

Your prompt attention to this matter will be greatly appreciated.

Re: Permits G-27866, G-28632 and G-28649

Dear Mr. McEldowney:

Thank you for your letter dated July 24, 1967, with regards to amending the above captioned permits to include the $S\frac{1}{2}SE\frac{1}{4}$, Section 14; and $NE\frac{1}{4}NE\frac{1}{4}$, Section 23, T. 12 S., R. 20 E.B.M.

Enclosed are the three completed application for amendment forms, together with the \$5.00 fee required for each, along with the completed forms authorizing your office to publish the required notices at my expense.

It may be explained the above amended acreage was vacant public domain until Patent was issued to me on November 30, 1966, consequently it could not be included in the list of irrigated lands at the time of application, or at the time of submitting Proof of Completion of Works to your office.

We are most grateful for your courtesy in assisting us with this matter.

Sincerely yours,

Dear Mr. Briggs:

During our examination of your permits, this office found only one well located in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Sec. 23, T. 12 S, R. 20 E. According to our records, there is a well licensed for 1.64 c.f.s. with a 1948 priority in that subdivision. We need to know if the well we examined and the well licensed in 1948 are the same well or if you divert your 1948 right from the well examined in connection with Permit G-27866.

If they are not the same well, please submit a map showing the location of the well with the 1948 priority right and the location of the well under Permit G-27866.

Attn: Mr. C. Stephen Allred

Dear Mr. Allred:

Your letter of September 21st, to Glen Briggs of Murtaugh, has been referred to me in an effort to review the history of the above captioned permit.

Reference is made to License No. 20805, December 13, 1948, 1.64 c.f.s., with points of diversion (2 wells) located in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 23, T. 12 S., R. 20 E.B.M.

Reference is also made at this time, due to similar status, to License No. 21359, January 16, 1950, 3.33 c.f.s., with points of diversion (2 wells) located in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 23, T. 12 S., R. 20 E.B.M.

The development, by others, of wells in Section 25, T. 12 S., R. 20 E.B.M. and in Sections 5, 6, 7, 8 and 17, T. 13 S., R. 21 E.B.M., resulted in the above licensed wells going dry and the loss of use of 4.97 c.f.s. of irrigation and domestic water.

Application was made for Permit G-27866 in an effort to replace the above losses. A well was drilled December 24, 1959, between the two above well sites in SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 23. (The present well site.) Further improvements were completed on this well on May 5, 1962. On May 29, 1962 this well was tested, at that time it delivered 375 inches (7.5 c.f.s.) from 200 feet, with a potential of delivering 500 inches by installing larger equipment. See inclosed letter Layne Bowler Pump Co., dated May 29, 1962.

During this period close coordination was maintained with your office. The development of such water prompted the transfer of the above licenses to the new well. See Transfer of Water Right Nos. 1030 & 1031, your office, dated June 10, 1964.

27866

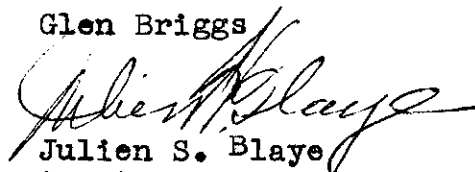

At that time your office explained, these transfers would account for 4.97 c.f.s., with priority of the licenses, of the production of the new well; thus leaving a balance of 2.53 c.f.s. for licensing under Permit No. G-27866.

The enclosed plat indicates the location of the subject well in Permit No. G-27866, together with indicating the locations of the abandoned wells and their transfers to the location of the subject well, which you examined.

It is hoped the above review and summary of our files contains the information you need. Your advice is sincerely requested in the event additional information is desired.

Very truly yours,

Glen Briggs

ATTENTION: T. M. Thompson, Manager

Gentlemen:

This office has received a copy of a letter written by Mr. Thompson in behalf of Glen Briggs of Murtaugh, Idaho, dated May 29, 1962, in support of Mr. Briggs' permit G-27866.

We would appreciate receiving more information regarding the test which is described in the letter. Could you furnish us with a copy of the test log and the size of the diesel engines used in the test?

Any assistance that you can give me would be appreciated.

Very truly yours,

C. Stephen Allred
Assistant State Reclamation Engineer

TO ALL WHOM IT MAY CONCERN:

This is to certify that GLEN BRIGGS
 of Murtaugh , County of Twin Falls , and State of
 Idaho , the holder of Permit No. G-27866... , issued upon
 Application No. G-35807. bearing date of priority of April 3, 1959 , authorizing the
 diversion of 18.0 second feet of waters of ... a well,.....

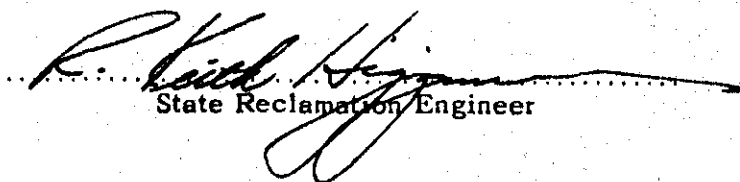

County of Cassia , State of Idaho, for irrigation
 purposes, ha. 9 fully complied with the provisions of the laws of the State of Idaho
 relating to the proof of completion of the works of diversion set out and described in said
 Permit; that said works are adequate for diverting and conveying to the place of intended
 use 0.55 second feet of the waters of a well, from subterranean

Dear Mr. Briggs:

We are enclosing the original copy of Water License No. G-27866. A copy has been retained by the Department of Reclamation.

You will note that there has been some changes made from our October 3, 1967 letter. Please note that the quantity of water indicated on our October 3 letter was in error. The amount licensed under this permit is .55 c.f.s. The 1.4 c.f.s. indicated in the letter was a figure covered under Permit No. G-28632.

Also, the priority of April 18, 1960 should have been April 3, 1959, the actual priority of Water License No. 27866.

Please forgive our inconsistency.

Very truly yours,
