SUBJECT Field Inspection, Application for Transfer by Paul & Vaughn Woodhouse

Today I inspected the site of the proposed groundwater transfer. The NW $\frac{1}{4}$ Sec. 23 is owned by the applicants, and is irrigated with a pivot sprinkler. Mr. Woodhouse claims that Oakley Canal Co. water will be used on that portion of this ground not covered by the groundwater transfer, so I checked to see if canal water would be available. The attached copy of the quad map shows the path of canal water to this ground. The only problem at this time is at the SW corner of the NW $\frac{1}{4}$ Sec. 23. A culvert under the half-mile road is plugged by a high dirt mound on the north side of the road. If this mound were removed, water could flow north into the Woodhouse system if there was enough water into the ditch to push water into the culvert under the east-west road. Wayne Anderson, owner of land in Sec. 27, stated that he believed that this area has been served by the Oakley Canal system for many years. Mr. Paul ~~The/well~~ Woodhouse stated that water had been delivered thru the culvert earlier in the year. Water also comes from the well in the SW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 22 via a concrete ditch running east into the Woodhouse system. Paul Woodhouse states that 15 to 50" of excess flow comes at odd times (pivot stoppages, etc) from this well (owned by Trafford Woodhouse & Sons); records show no right to use this water in Sec. 23 (see 45-2470).

SUBJECT Application for Transfer, Vaughn & Paul Woodhouse

Today I discussed this irrigation system with Paul Woodhouse. He stated that both wells now are open discharge into ponds or ditches. The pivots are pressurized from the ponds, with surface irrigation of corners. They plan to remove the ditches and go to all pressurized mainlines. They plan to stop watering the corners. The pivot in the NW $\frac{1}{4}$ Sec. 23 will be supplied partly with groundwater under the transfer, and partly with Oakley Canal Co. shares that they own or will rent on an annual basis. Mr. Woodhouse stated that there is normally plenty of excess canal water available. Both the microfilm and the USGS map show that this area was not part of the Oakley Canal Co. system, so there does not appear to be any right to use canal shares on this property. Mr. Woodhouse stated that the pivot in question is rather old, and that it may be replaced with handlines or wheelines.

Paul Woodhouse

Dear Mr. Woodhouse:

Thank you for your response to my correspondence of 3/17/86. In your explanation of the plan to irrigate only the lands identified in your transfer application, it was not clear to me how your irrigation system operates.

Your letter appeared to state that you plan to use water rented from your neighbors and that you had a reservoir that was used. The application for transfer identifies two groundwater rights and it is unclear how these groundwater rights relate to the surface water identified in your letter.

Perhaps the best way to clarify this is to arrange for a meeting with Loren Holmes of our Twin Falls office and together you can explain your system and address the questions raised in my 3/17/86 correspondence.

I am returning the application for transfer to the Twin Falls office. If I can be of any further assistance, please let me know.

Sincerely,

JIM JOHNSON

RE: Transfer of Water Rights Nos. 45-2569 & 45-2651

Dept of Water Resources
Statehouse
Boise, Idaho 83720

Gentlemen:

When we first initiated steps to transfer water to sec 23 we visited with the Twin Falls office and explained our position and the need to make this transfer. Since the time that we have owned land in this vicinity the Oakley area has had a full water right. During those years we have been able to rent water from our neighbors if we were short. Three of those years water was turned to us to use whether we needed it or not to insure against our reservoir over flowing.

We also have ditches and ponds to collect water for use when there is a power outage. Most of the farmers in this area use booster pumps and sprinklers. When there is a power outage we who are on the tail end of the system have provided a way to handle the excess water until the power is restored.

Our concern is when the time comes that there is a shortage of water in this area. The water rights that we have requested to be transferred are assigned to eight small and separated plots. Getting the water to the land for irrigation uses more water than the actual irrigation. We very much need to have the land blocked into one location where we can run an underground mainline and sprinkler irrigate the land with wheel lines, solid set, or hand lines. In this manner we can maximize the use of the water.

When we first applied for the transfer we received notice that the transfer couldn't be made because there was an existing right that needed to be transferred first then the transfer could be made. We therefore proceeded with the land transaction and had that water right transferred off the land.

RECEIVED

We understand your concern. As you review our position and need for the transfer I'm sure you will agree that we have the same concerns. The third paragraph of your letter makes it critical to us that the transfer be made so that we will always have the option of maximising our water crop ratio.

I hope this explanation clarifies our position and need for this transfer. If you have any questions or if we can expedite this transaction any further please let us know.

Sincerely,

RE: Transfer of Water Rights Nos. 45-2569 & 45-2651

Vaughn &/or Paul Woodhouse
Rt. 1, Box 32F
Oakley, ID 83346

Gentlemen:

We are currently reviewing the above referenced application for transfer and are concerned that if the transfer is approved more lands will be irrigated than are identified on the transfer application.

Therefore, before any additional steps toward approving the transfer can be made, we must request how you plan to irrigate only the 48 acres in the E $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 23, Twp 12N, Rge 23E.

As you know, this area is within the Oakley-Kenyon Critical Groundwater Area and regulation of groundwater useage could be implemented whenever groundwater levels show additional declines. One of the first measures to regulate the groundwater withdrawals would be to restrict irrigation to only lands covered by valid water rights. Therefore, there is considerable risk to those groundwater users who irrigate land without water rights.

We understand that a land sale is pending the approval of this transfer and we wish to make it clear that the transfer cannot be approved unless it can be shown satisfactorily that only the land listed on the transfer application will be irrigated.

Please provide the requested information on or before April 15, 1986. If you have any questions or if I can be of any assistance on this matter, please let me know.

Sincerely,

Re: Application for Transfer of Water Right No. 45-2569 &

Dear Mr. Woodhouse:

There is a problem with the above-referenced transfer regarding the land in Sec. 23 that you propose to irrigate.

The First Security previously filed a transfer on License 45-2628 to move water from the W1/2NW1/4 to the E1/2SE1/4, Sec. 23. Under this license, 0.24 cfs is appurtenant to 48 acres in the E1/2NW1/4, Sec. 23. You propose to transfer an additional 0.91 cfs to this ground, which will exceed the allowable limit of 0.96 cfs (0.02 cfs per acre X 48 acres).

Your transfer will need to be modified, or some other action taken, to eliminate this.

Please contact this office for assistance.

FROM Jim S.

TO File

SUBJECT Application for Transfer of Lic. 45-2569 & 45-2651 (Woodhouse)

Applicant has filed for this transfer in connection with purchase of land in NW $\frac{1}{4}$ Sec. 23 T. 12S R. 22E. Purchase will not be finalized until approval of this transfer is assured, but applicant requests that the transfer not be approved until the purchase is completed. I told Mr. Woodhouse that this would be OK with us, as it does not appear that this situation would cause an unreasonable delay in our processing of this transfer.

Re: Application for Transfer of Water Rights 45-2569 & 45-2651

Gentlemen:

Now that Mr. Hepworth's application for transfer has apparently resolved the problem of overlapping rights on your new land, another question remains to be answered. Are you now ready for your transfer to be processed, or would you still prefer that we delay the processing until your purchase of the NW1/4, Sec. 23 is completed? In the later case, when do you expect the sale to completed?

Dear Mr. Whitaley:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the High Star, all submitted in proof of completion of works and beneficial use on Permit No. G-27401.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Permit No. 9-24401

Proof of Application of Water to Beneficial Use

Deposition of Holder and Completion of Works

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. My name is J. Reed Whiteley. I reside at Oakley, Cassia County, Idaho.
By occupation, I am a farmer. My post office address is the same as my residence.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. I am acting only on behalf of myself and no-one else.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Permit No. G 27401, dated June 20, 1958, Date of priority - May 22, 1958.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Water is developed from a well located in the SW $\frac{1}{4}$ of the SW $\frac{1}{4}$, Section 14,
Township 12 South, Range 22 East of the Boise Meridian in Cassia County, Idaho.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. A pump has been placed in the well and has been delivering 175 inches of water which the ditches from the pump are able to convey from the point of diversion to the place of use. All the water is diverted through ditches. The well is to a depth of 628 ft. There is 575 ft. of 16 inch casing. The water stands at a depth of 380 ft. The pump used discharges approx. 175 inches. This amount of discharge is a close estimate by people acquainted with the measuring of water. There is no sprinkler system used.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. The water is used for irrigation and it is used on the West Half of Section 14, Township 12 South, Range 22 East of the Boise Meridian in Cassia County, Idaho.

The entire 320 acres has been irrigated from the well. There was not any cultivated or natural meadow before the well was drilled and there is not any natural meadow now.

In addition to the digging of the well and the placing of the pump therein, the land has been leveled, ditches have been constructed and roadways put across the land,*
Ques. 6-a If this is a ground water permit, give name and address of person that drilled the well.

Ans. La Mar Davis of Burley, Cassia County, Idaho, was the person who drilled the well.

* (end of answer to Question 6.) all at a cost of \$40,000, which includes the drains.

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. _____

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. Approximately 1 inch to the acre.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I applied for the water right in my own name and I am the present holder thereof.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Since the 22nd day of May, 1958, during the irrigation season, there has been approximately 175 inches of water pumped from the well and has been used in irrigating the entire 320 acres mentioned in the Application for Permit.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. There are not any other water rights other than the well for the property.

It was all desert sagebrush land prior to the digging of the well.

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is William B. Thomas. I am 33 years of age. My residence is Oakley, Cassia County, Idaho. I am a farmer by occupation. My post office address is the same as my residence.

Ques. 2. Are you acquainted with J. Reed Whiteley, the holder of Permit No. G-27401? How long have you known him and where does he reside?

Ans. I have known J. Reed Whiteley for more than four years and I know that he resides at Oakley, Cassia County, Idaho.

Ques. 3. Have you read or heard read said Permit No. G-27401, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Water is drawn from a well in the Southwest Quarter of the Southwest Quarter of Section 14, Township 12 South, Range 22 East of the Boise Meridian, Cassia County, Idaho, and is used to irrigate the West Half, Section 14, Township 12 South, Range 22 East of the Boise Meridian, Cassia County, Idaho. The well has a pump therein and ditches from the well to transport the water from the well to the lands where it is used.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I have seen 175 inches produced by the well since May 22, 1958 during the irrigation season.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. As above mentioned, I have seen 175 inches of water produced from the well. I have never actually measured it, but I am very well acquainted with the use of water and I believe that that is the amount that the well produced.

Ans. The water is used for irrigation on the West Half, Section 14, Township 12 South Range 22 East of the Boise Meridian, Cassia County, Idaho. All the land is cultivated; there are no natural meadow lands. The improvements placed on the property include the well, pump, clearing the land of brush, leveling it, the construction of ditches and drains.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. The water from said well has been used to irrigate the entire 320 acres.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. In my opinion the land is very productive and from 1 inch per acre profitable crops can be raised.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I do not have any interest in the works, water or land above described.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I am a neighbor of I. Reed Whiteley and we visit back and forth and I have a personal knowledge of all the statements made herein, and have seen the pump in operation many times.

Attention: A. H. Nielson

Gentlemen:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. G-27401, in the name of J. Reed Whiteley. Final Proof is to be made before you, as Notary on the 17th day of March, 1961, ~~at 10:00~~ at 10:00 o'clock A.M., at Fouts Bldg., Burley, Idaho.

As of this date we have mailed the Notice to the Burley Herald Bulletin with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof and then mail the Affidavit of Publication and statement of costs to you.

It is important that the enclosed depositions be executed by the permit holder and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the time, on the date and before you, as Notary, as stated in the publication notice. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, that your Notary's seal has been placed on each and that all depositions, (Holder and two witnesses) are being returned. Also be sure to enclose the Affidavit of Publication.

Very truly yours,

GEO. N. CARTER

Gentlemen:

In regards to the above permit numbers, we are sending in duplicate Form No. 36 in each of the permit matters and Form No. 11 in each of the well matters.

Would you set the time in March so that we can comply with the required time for notice. If possible we would like the hearings set at the same time so that the witnesses can appear only the once, as the same witnesses know about the two wells.
