Re: Permit No. 27269

C. P. Parrish
Twin Falls, Idaho

Dear Mr. Parrish:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department, stating that you have been issued a permit and are now submitting proof of beneficial use. Previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply it upon request at any time.

Re: Permit No. 27269

Jan. 2, 1963

C. P. Parrish

Dear Mr. Parrish:

Under the terms of your Permit No. 27269 you are required to complete your diversion works on or before March 4, 1963. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public, or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Dear Mr. Parrish:

The depositions of you and your two witnesses do not agree. Your deposition shows the dam 50 feet long and 8 feet high. The witnesses show the dam to be about 100 feet long and 20 to 25 feet high. State Statutes provide that no water rights may be obtained by construction of a dam over 10 feet high without approval of the plans for the dam by this office. The file does not contain a set of plans for your dam which have been approved.

Your permit claims 1.6 cubic feet per second. You claim on the deposition that you have used about 0.3 c.f.s. June, 1961. You do not show the capacity of your equipment.

Kindly notify this office the true size of the dam and the capacity of the pumping system at your earliest convenience.
