RECEIVED

Department of Reclamation

Gentlemen:

I am enclosing herewith applications to amend five water permits, together with two copies of a map attached to each.

When the applications for these permits were originally filed, the applicant did not have all of the lands available for irrigation that he has now. In addition, he has combined all of the water diverted and the irrigation works for the same in one operation. The purpose of four of the enclosed amendments is to make the water under each permit available for irrigation of the same lands. Only the water right under Permit No. G-26269 is made appurtenant to different lands.

Also enclosed is a Notice of Proof of Completion of Works and Application of Water to Beneficial Use for the four permits which apply to irrigation of the same lands and a similar notice for Permit No. G-26269. You are hereby authorized to have the notice relative to the four permits published at my expense in the Times News, Twin Falls Idaho, and the notice relative to Permit No. G-26269 published in the Kimberly Advertiser, Kimberly Idaho. In other words, I would like one notice published in one paper and the other notice published in another paper, as I want to do business with both papers.

An extra copy of each notice is enclosed to send to the publishers. It is requested that you send me the necessary forms for statements of witnesses and holder.

Though Permit No. G-26269 was filed for 6.4 cubic feet per second, there is not this much water being produced from the well and no reason to publish a notice for more than one inch per acre.

Yours very truly,

BLANDFORD and BLANDFORD
