Gentlemen:

Enclosed is an application for transfer of a water right. The water involved is from a subterranean well.

You will notice that the water right was originally made appurtenant to 160 acres, of which only 100 acres was irrigated. The owner is in effect requesting that the water right be transferred only from 20 acres of the lands being irrigated. However, inasmuch as the water right was made appurtenant to all of the 160 acres, it appears that there will be less confusion if we transfer all of the water right from such 160 acres and re-apply it to 80 acres of the same, together with another 140 acres involved.

Let me know the amount of the fee for this transfer, and I will forward immediate payment.

Yours very truly,

ATTENTION: Mr. A. L. Blandford

Dear Mr. Blandford:

This is in reply to your letter of January 3, 1959, and we hereby acknowledge receipt of the depositions of the Holders and two witnesses and the affidavits of publication in proof of completion of works and beneficial use under each of the Permits above listed.

Before a permit can be licensed, the law requires that a field examination be made by an engineer from this department which will be made some time during the irrigation season of 1959. Our engineer will contact you or Mr. Uhlig prior to the time he is to make the inspection so that Mr. Uhlig can arrange to accompany him.

Fees required will be \$5.00 for Completion of Works on each of the Permits and a fee of \$2.00 for each 40 acre subdivision of portion thereof.

Very truly yours,
