The following guidelines should be used in completing a transfer application:

The first page should include the description of the entire water right as it is shown on the decree, license or claim. For example, on transfer 45-2588, all of the points of diversion and the entire place of use should be listed.

Items 10 and 11 should again describe the entire right as it will exist after the change has been made. Unless this is done, it is impossible to know which land remains under the right.

I realize there are complex situations where these guidelines will be difficult or impossible to follow, but in most instances the applications should be completed indicating the entire right.

We have re-typed the forms as far as possible, but could not complete the second page. Please complete that page and have the applications signed then return to us for final action. Re-advertisement of the transfers is not needed. If you have any questions, please contact me.
