We have a tentative loan application from Norman Nielson of Burley on the following described property - SW $\frac{1}{4}$ of Section 10, Township 11 S., Range 22 E.B.M.

He reports that the well and land were inspected by your department but he was unable to locate the license and he asked that I write you for further information on the well.

We would like to know the following items if you have them in your file -

1. Number of miners inches that license is issued for -
2. The static water level of the well and the level when pumping -
3. The amount of casing used and the total depth of the well.

We would also be interested in knowing if there has been any change in the pumping levels in this particular area during the past several years that you have been making inspections.

Any information that you can give us on the above matter will be greatly appreciated. Thank you.

Yours truly,
Arthur T. Duncan
