Department of Reclamation  
Mr. Mark R. Kulp  
State Reclamation Engineer  
Boise, Idaho

Dear Mr. Kulp:

This answers Mrs. Rutledge's letter of October 7 in regard to the above permits. Please see my letter of September 27, stating that there was no well on the SW $\frac{1}{4}$ SE $\frac{1}{4}$  of Section 20, and Mr. Humphrey's reply of October 1.

In accordance with that letter we should have license under Permit 20752 for 3.2 second feet for the NW $\frac{1}{4}$  of Section 27, and license for 1.08 second feet under Permit G-24982 for E $\frac{1}{2}$ SW $\frac{1}{4}$  and W $\frac{1}{2}$ SE $\frac{1}{4}$  of Section 20, all for the two wells in the NW $\frac{1}{4}$  of Section 27.

Very truly yours,

ATTENTION: Mr. J. R. Keenan, Of Counsel

Dear Mr. Keenan:

This acknowledges receipt of your letter of October 3, 1957, with which was enclosed a check for \$21.00 to cover the fees for the certificate of completion of works and licenses to be issued under the above numbered permits.

It is necessary, before the certificate and license is issued under Permit No. G-24982, that the permit be amended to include the point of diversion located in the SW $\frac{1}{4}$ SE $\frac{1}{4}$  of Section 20, Township 11 South, Range 19 East, B.M. I believe an application for this purpose was enclosed with our letter of September 17, 1957. If not, we enclose another one and ask that you complete and return.

Very truly yours,

Attention: J. R. Keenan

Dear Mr. Keenan:

Reference your letter of September 27, 1957.

The two wells mentioned in paragraph three were measured by J. C. Marr from this department on July 6, 1957. The west well yielded 17 inches and the east well 197 inches. Three and two tenths cubic feet per second (3.2) can be licensed under Permit No. 20752 for the NW $\frac{1}{4}$  of Section 27. Proofs have been made. All that remains is payment of fees as per our letter of September 23, 1957.

The balance of the water from these wells or 1.08 cubic feet per second, can be licensed under Permit No. G-24982 for the E $\frac{1}{2}$ SW $\frac{1}{4}$  and W $\frac{1}{2}$ SE $\frac{1}{4}$  of Section 20. The fee will be the same as that given in our letter of September 17, 1957.

We are sorry that there was confusion with the well in Section 20. We trust that this is now straightened out.

Very truly ours,

Mr. Mark R. Kulp  
State Reclamation Engineer  
State Capitol

Dear Mr. Kulp:

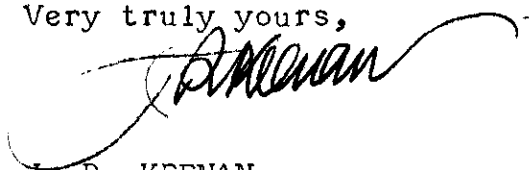

Please see your letters of September 23, and September 17, respectively, on W. B. Savage Permit 20752 and W. B. Savage Ranches, Inc., on Permit G24982.

I have checked this with Mr. Savage's office manager, and I am told that there is no well on the SW $\frac{1}{4}$  SE $\frac{1}{4}$  of Section 20-11-19, but that there is a well in the Southeast corner of SE $\frac{1}{4}$  SE $\frac{1}{4}$  of Section 20-11-19, under Permit 20581. Your file on that latter permit will show that August 11, 1953, we advised your office that the advertised offer of final proof on this last permit would be postponed to some future time inside that allowed by the terms of the permit.

The question, as we see it, is "What water will be allowed on the two wells in Section 27-11-19?" (one in SW $\frac{1}{4}$  NW $\frac{1}{4}$ , and one in SE $\frac{1}{4}$  NW $\frac{1}{4}$ ), at the present used primarily on NW $\frac{1}{4}$  of Section 27-11-19 under Permit 20752, and secondarily on West half SE $\frac{1}{4}$  and East half SW $\frac{1}{4}$  of Section 20-11-19 under permit G24982.

We enclose an extra copy of this letter for the benefit of your files.

Very truly yours,

  
J. R. KEENAN

ATTENTION: Mr. J. R. Keenan, Of Counsel

Dear Mr. Keenan:

Our field engineer's report on the inspection of the completion of construction work and application of water to beneficial use under the terms of Permit No. G-24982, W. B. Savage Ranches, Inc., Kimberly, Idaho, shows that three wells in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ , SW $\frac{1}{4}$ NW $\frac{1}{4}$  of Section 27 and the SW $\frac{1}{4}$ SE $\frac{1}{4}$  of Section 20, Township 11 South, Range 19 East, B.M. are capable of conveying 123 $\frac{1}{2}$  miner's inches (2.47 c.f.s.) of water for irrigation of 160 acres. The record of the permit lists only the wells in the NW $\frac{1}{4}$  of Section 27, therefore, we have enclosed an application for amendment to include the well in the SW $\frac{1}{4}$ SE $\frac{1}{4}$  of Section 20. Please complete this form and return it.

Upon receipt of the amendment, mentioned above, and the statutory fees, total of \$13.00, we will issue to W. B. Savage Ranches, the Certificate of Completion of Works (for which the fee is five dollars) and the License (eight dollars--based at the rate of two dollars for each 40-acre subdivision) confirming the right with priority of May 22, 1954, to the use of 2.47 second feet of subterranean water with the points of diversion in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ , SW $\frac{1}{4}$ NW $\frac{1}{4}$  of Section 27 and the SW $\frac{1}{4}$ SE $\frac{1}{4}$  of Section 20, for irrigation of 160 acres in the W $\frac{1}{2}$ SE $\frac{1}{4}$  and the E $\frac{1}{2}$ SW $\frac{1}{4}$  of Section 20, all in Township 11 South, Range 19 East, B.M.

Ans. Name of the corporation for which I am acting is W. B. Savage Ranches, Inc. and I am its President. Its place of business is Kimberly, Idaho.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. G24982, June 8, 1954; priority date, May 22, 1954.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Underground water, diverted by one deep well in SW $\frac{1}{4}$  NW $\frac{1}{4}$  Sec. 27, Twp. 11 S., Rge. 19 East, B.M. and one deep well in SE $\frac{1}{4}$  NW $\frac{1}{4}$  of same Section.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Water is taken off NW $\frac{1}{4}$  of Sec. 27-11-19 into 1 mile of pipeline from which ditches spread the water over W $\frac{1}{2}$  SE $\frac{1}{4}$  and E $\frac{1}{2}$  SW $\frac{1}{4}$  of Sec. 20, Twp. 11 S., R. 19 E.B.M. Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is used for irrigation; by its use a commercial crop of potatoes was grown in 1955 on all the acreage, less ditches and roads, in W $\frac{1}{2}$  SE $\frac{1}{4}$  and E $\frac{1}{2}$  SW $\frac{1}{4}$  of Section 20, Twp. 11 S., Rge. 19 E.B.M. Ans. Not used for other than irrigation purposes.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. Minimum amount of water for irrigation of lands described in answer to question 6 is 1" to the acre.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. -----

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. All the water available under this permit has been used in 1955 and 1956 for the irrigation of commercial crops, in addition to waste water supply.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. Said lands in Section 20-11-19 have no other appropriations than the instant water. Water wasting off other lands in the neighborhood increase the quantity of water available for the lands over the 115" which is the record amount under the instant permit. 275" is developed by pumps installed under permit No. 20752; 160" is assigned to Permit No. 20752 lands, leaving 115" for permit 624982.

Ans. I estimate said works will safely convey 275 inches of water and have seen that much being conveyed in such works.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. The well ~~is~~ in SE $\frac{1}{4}$  NW $\frac{1}{4}$  will deliver 225 inches and well in SW $\frac{1}{4}$  NW $\frac{1}{4}$  will deliver 50 inches; this is an estimate based on many years irrigation practice on the Twin Falls Tract.

824982

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is used for the irrigation of commercial crops on W $\frac{1}{2}$  SE $\frac{1}{4}$  and E $\frac{1}{2}$  SW $\frac{1}{4}$  Sec. 20-11-19. The entire acreage therein, save for roads and ditches, in 1955 was planted to potatoes; the entire acreage in 1956 has been planted to a crop of wheat.

Lands above described situate in Twin Falls County, Idaho.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Not used for other than irrigation purposes.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Character of the land is the normal loam soil of Twin Falls County, and requires 1 inch to the acre for profitable cultivation.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. Many times in the summer of 1955 I saw up to 275 inches of water used on lands above described for the irrigation of a growing crop of potatoes, and several times this year I have seen the same quantity of water used in the irrigation of a growing wheat crop.
