PART 1**6. General Information:**

a. Description of diversion system 5 wells, pumps to buried main lines to a sprinkler system of center pivots and handlines.

b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? _____ Yes ☒ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:

Note: N $\frac{1}{2}$ Sec. 26 has been leased from Pickett Land & Livestock since 1978, & has been watered by us all that time. If SRBA claim is denied, they have agreed not to claim any water from our wells.

d. Remarks:

The number of wells and diversion rate for the system will be the same. The field exam needs to determine if the P/D in the SE $\frac{1}{4}$, S26 is in the SESE or the SWSE.

MEMORANDUM

DATE: 27-Aug-1993

FROM: Loren Holmes 

TO: Transfer files 4193, Hepworth Family Farms
4203, Jarolimek

SUBJECT: Analysis

Both the Hepworth and Jarolimek transfer applications propose to add a diversion point to an existing system to recover water production lost due to declining groundwater levels.

A question has been raised whether the Jarolimek transfer will violate other water rights by establishing a diversion within a CGWA that was closed prior to the priority date of the rights being transferred.

All existing wells for both the Hepworth and Jarolimek systems are within the West Oakley Fan CGWA, closed on 1/19/1982.

The lands irrigated by Jarolimek are within the Oakley-Kenyon CGWA, closed 1/19/1962.

The lands irrigated by Hepworth are within the West Oakley Fan CGWA.

The Jarolimek transfer proposes to add a point of diversion within the Oakley-Kenyon CGWA.

The Hepworth application proposes to add a well near an existing well in the West Oakley Fan CGWA.

Neither Hepworth or Jarolimek propose any change in place of use or amount of water.

Information has been developed by the USGS and documented in Water Resources Investigations Report 84-4231, "Potentiometric Surface Contours, Directions of Groundwater Movement, and Perched-Water Zones, Oakley Fan, Southeastern Idaho, March-April 1984".

The USGS report shows data for the existing Jarolimek wells and two of the Hepworth wells indicating that all of the wells have similar depths, construction and water levels, and are completed in the same basalt aquifer.

MINOR REVISION

FEB 07 1994

Groundwater levels and contours reported by the USGS give no indication of any geologic feature or condition which would result in significantly different geology or groundwater levels at the sites proposed for the new Jarolimek or Hepworth wells in comparison with the existing well sites.

Idaho Code Section 42-233a defines "critical ground water area" as any groundwater basin or designated part thereof, not having sufficient ground water to provide a reasonably safe supply for irrigation or other uses at the current or anticipated rates of withdrawal under valid water rights. Applications made to appropriate groundwater for new uses within a designated CGWA are subject to denial by the director on grounds that there is insufficient water available to appropriate.

Idaho Code Section 42-222 provides the process for holders of valid perfected water rights to make changes to the rights subject to determination by the director that a change will not cause injury to other rights, expand the right being changed, conflict with the local public interest or act against water conservation.

CONCLUSION

On the basis of the USGS report, I conclude that both the existing and proposed wells are within the same groundwater basin and situated so that similar conditions are likely to be encountered at the new drilling sites compared to the original well sites.

There is no basis in available published information to conclude that the location of Jarolimek's proposed new well will affect groundwater levels in the Oakley-Kenyon CGWA in a different way than the existing wells.

A CGWA designation by the director prevents new appropriations of groundwater in the designated area but does not prohibit drilling to maintain water production under existing rights.

Although the area in which the existing wells are located was closed to groundwater appropriation 20 years later than the area of the new Jarolimek well site, the two locations are within the same groundwater basin, and it is likely the wells will all be completed within the same formation in the basin.

NOTE: The actual well driller must be identified prior to drilling.

GENERAL CONDITIONS:

1. This well shall not be drilled more than 10% deeper than the proposed total depth or enlarged without prior authorization.
2. The well must be constructed or modified in compliance with the applicable statutes; specific conditions of approval shown on the water right permit, transfer, amendment, or injection well permit; and the rules and regulations of the Department for water appropriation, injection wells, and well construction.
3. This drilling permit is valid for two (2) months from approval date for the start of drilling.
4. This permit does not constitute any other local, county, state or federal approvals which may be required for construction or operation of a well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum distance of 50 feet and 100 feet respectively from a septic tank.
5. The well shall be constructed by a driller licensed in the State of Idaho.

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the required publication dates. If time allows, please submit a galley proof for review before publication.

We have attempted to submit this legal as camera ready. Please call me at your earliest convenience and prior to your staff re-typing the legal if it does not meet your specifications so I can possibly make adjustments.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

In order to receive payment, an affidavit of publication must be submitted to the Department along with the publication bill.

Dear Mr. Hepworth:

The Department of Water Resources acknowledges receipt of your Application for Transfer.

This office has scheduled advertising the application in the South Idaho Press for 8/6 and 8/13/93. The advertisement will be published for two weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

In order to complete regional review, a list of corporate officers and addresses should be submitted to this office.

State Office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review.

Please feel free to contact this office if you have any questions regarding this procedure.

SUBJECT: Hepworth Transfer

FROM: Jim Stanton

DATE: 7-22-93

Today I visited the site of the proposed transfer, accompanied by farm operator Ron
Hepworth. Both Sec. 25 & 26 are fully watered by this groundwater system. There are 7
pivots, and the rest is in handlines. A few acres are out for roads, buildings, etc.; all
all pivot corners are watered. The points of diversion shown in Part 1 appear correct.
A well just southwest of Mr. Hepworth's home is being abandoned due to lack of water at
that location. A new well drilled last year just north of the old well also came up dry.
The old well near the proposed new well still has plenty of water, according to Mr. Hepworth.
I see no reason to deny this transfer. Expansion claim is still subject to SRBA findings,
of course.

Dear Mr. Tilby:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Herald-Bulletin Burley, Idaho, all submitted in proof of completion of works and beneficial use on Permit No. G-24830.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Dear Mr. Tilby:

The date for proofs of Completion of Works and Application of Water to Beneficial Use, as set out under the terms of Permit No. G- **24830** are due not later than **April 18, 1963** **G-24889**

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list which has been recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the mentioned date, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point of, or points of diversion; and the location of use of the lands which are irrigated -- all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with Form 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.

RE: Permits Nos. G-24829 & G-24830

Mrs. J. O. Tilby
Route 1
Jerome, Idaho

Dear Mrs. Tilby:

In reply to your letter of June 4th, requesting extension of time for Completion of works on well described in the above numbered permits for the reason that you have not yet had permission to go on the land, which is included in desert land entries.

There is no provision in the statutes for extension of time for commencing of work, but obviously this work cannot be commenced until such permission is obtained from the Bureau of Land Management.

Therefore, if you will notify this Department immediately upon allowance of your desert land entries an extension will be allowed for all the acts required under the above numbered permits for a length of time equal to the time you have been prevented from proceeding, awaiting such allowance.

Very truly yours,

MARK R. KUIP

TRANSFER OF WATER RIGHT
TRANSFERRED RIGHT NO. 1063

THIS IS TO CERTIFY, That JAY O. TILBY, Box 265, Burley, Idaho, is the owner of and using a certain water right of 4.61 cubic feet per second of the waters of subterranean flow, said water being obtained by virtue of License No. G-24830, issued by the State of Idaho, Department of Reclamation, dated August 3, 1965, bearing priority date of March 29, 1954, for the purpose of irrigating the following described lands situate, lying and being in the County of Cassia, State of Idaho, to-wit:

8 $\frac{1}{4}$, Section 26, Township 11
South, Range 21 E. B. M.,

That said license has been entered in the records of the Department of Reclamation of the State of Idaho in Volume No. 13 at Page 8201;

That said Jay O. Tilby has become the owner of said water right by virtue of License No. G-24830;

And that now, upon the application of Jay O. Tilby for the transfer of 2.28 cubic feet per second, made before the State Reclamation Engineer of the State of Idaho, and said application having been granted, the right to the use of 2.28 cubic feet per second of the waters of subterranean source by well upon the above described lands is hereby abandoned, and the place of use of said water under such right is HEREBY CONFIRMED, shall by this Certificate become appurtenant for irrigation purposes, is described as follows, to-wit:

N $\frac{1}{4}$, Section 25; 8 $\frac{1}{4}$, Section 26,
Township 11 South, Range 21
E. B. M.,

That said water is to be limited at any given time to an amount actually needed and beneficially used for such purposes and shall not exceed the following amount, to-wit:

2.28 cubic feet per second of the
waters of subterranean source with
priority of March 29, 1954;

Said water to be limited in use to
320 acres of land at any one time;

T-1063
