- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
N/A. Land was gravity irrigated until 1985. Sprinklers were then installed. East part of farm went into CRP, & is now coming out. Due to conversion to pivot sprinklers, fewer acres may be irrigated in the future. However, we are not officially changing the place of use at this time.
- d. Remarks:
The "new" well was drilled under lapsed permit 45-7491 by a former owner but never put into service. Due to an incorrect survey, this well was shown as being in Sec. 22. It is actually about 22' inside Sec. 21.

FROM: PAM SKAGGS/³⁸STATE OFFICE

SUBJECT: TRANSFER NO. 4892

DATE: January 24, 1997

=====

Transfer No. 4892 was filed to change one point of diversion under Right Nos. 45-02466 and 45-07441.

The same two wells have served these rights and one has stopped being functional. The replacement "new" well is an existing well drilled under a lapsed permit. The lienholder's consent submitted with the application identifies the wrong QQ. Since no new well is being drilled and no physical change is being made to the property, the lienholder's corrected approval appears unnecessary.

The place of use under these rights was combined to reflect the single combined system used to serve the 456 licensed acres. The second license was issued for additional developed acres from the same system. The transfer approval describes these rights as historically developed and currently used with the changed point of diversion.

Recommended conditions include irrigation overlap, multiple points of diversion/measuring devices, future annual reporting, well abandonment, combined limits, permissible place of use and standard transfer conditions.

SUBJECT: App. for Transfer, Lynn Taylor

Today I visited the subject property accompanied by Mr. Taylor. We looked at the well to be replaced and the replacement well. The "new" well was drilled in 1983 under Lapsed Permit 45-07491 by a former owner; I took a photo of this well.

The eastern portion of this property has been in CRP but has now come out. The entire system is being redone by changing one point of diversion and replacing the existing handlines with 3 pivots and various corner lines. The number of irrigated acres will probably decrease, but the applicant chose to officially change only the p/d at this time. I discussed the forfeiture statute and Judge Hurlbutt's recent ruling. The SRBA findings may ultimately show fewer acres, depending on how the question of partial forfeiture comes out. As of now, however, the licensed rights still appear to be fully valid. Owner chose to keep the old irrigation season as stated on his license. Transfer appears routine, and should be approved.

Dear Mr. Bauscher:

After talking with you Friday, we find in the file of Permit No. G-24583 that this permit is ready to be licensed upon receipt of the statutory fee; that notice of proof was advertised in the Oakley Herald March 14 through April 4, 1957, that the depositions of proof were made before Harley M. Marshall of Jerome, acting in behalf of a partnership whose name is Deale Land Co., and that field inspection was made July 4th and 7th, 1957. Therefore, you will have no need to advertise your intention of proof again as was discussed when you were in the office.

Attached is a copy of our letter of September 18, 1957, to Mr. Charles J. Marshall of Jerome.

Enclosed is a blank form which when it is signed before a witness and returned to this department will relinquish Permit No. G-25880.

Your Loan Re: #126882 - Declo Land Co.

Dear Mr. Marshall:

Our records show that the land use under Permit No. G-24583 and G-25880 are identical or with a slight change.

Permit No. G-24583 consists of all the land in Section 21, Township 10 South, Range 25 East, except the $S\frac{1}{2}SE\frac{1}{4}$.

Permit No. G-25880, the land use is as follows: $NE\frac{1}{4}$, $NW\frac{1}{4}$, $S\frac{1}{4}$, $N\frac{1}{2}SE\frac{1}{4}$ and 20 acres in each 40 in the $S\frac{1}{2}SE\frac{1}{4}$ Section 21, Township 10 South, Range 25 East.

All of Section 21 is deeded lands and patented by the government years ago. Therefore, we have no record in our files stating any reason why the two different parties would be filing on the same land.

We are in possession of a certificate showing that Permit #24583 in the name of Ben and Violet Lasswell covers property in section 21 and we are also in possession of a certificate showing that Permit # 25880 issued to the Declo Land Company covers the identical land of the first mentioned permit.

Will you kindly advise the situation inasmuch as there appears to be an overlap or duplication in the description of the lands to be irrigated under these two permits.
