IN THE MATTER OF APPLICATION FOR)
TRANSFER OF LICENSED WATER RIGHT)
NO. 45-2417/22801)

MEMORANDUM DE CISION

On May 23, 1952, Mr. Mark Edgar Moorman of Route 1, Murtaugh, Idaho, applied for a permit to appropriate the waters of the State of Idaho and was subsequently issued such a permit. On December 11, 1962, a license was issued confirming a right to 5.2 cubic feet per second of water for irrigation and domestic use with a date of priority of May 23, 1952. The license provided for irrigation of 725 acres in Townships 10 and 11 South, Range 21 East, B.M.

On June 5, 1968, Mr. Moorman applied to the Department of Reclamation to transfer 5.2 c.f.s. of water under this right to 725 acres of land lying in Township 10 South, Range 21 East, B.M., and to add a point of diversion in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 34, Township 10 South, Range 21 East, Boise Meridian.

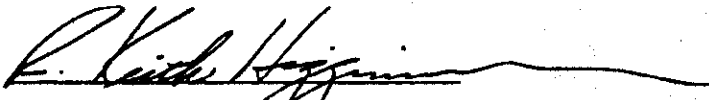

The State Reclamation Engineer having considered the application, hereby approves the transfer subject to the following conditions: 1) that when this right is combined with License 42-2418/22802 no more than 2238 acre feet of water per season may be pumped from the two points of diversion and 2) that permanent measuring devices of a type acceptable to the Department of Reclamation be installed.

The amount of water allowed under this transfer is subject to final determination upon adjudication of the right by the District Court. According to information available to the Department of Reclamation, the irrigation of crops common to the area requires 4 acre feet per acre per season at the point of diversion, or a total of 2900 acre feet per season as a full supply. Transfer No. 45-2419/22801 provides 662 acre feet of water for this land

under License 45-2419/22803 leaving 2238 acre feet to be supplied under License 45-2417/22801 and License 45-2418/22802 in order to meet the needs of the crops each season.

In case the property is operated as a unit, possibly the best method would be to amend the points of diversion to the three wells to irrigate all the land on each of the permits.

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list which has been recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the mentioned date, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point of, or points of diversion; and the location of use of the lands which are irrigated -- all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with Form 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.

Dear Mr. Moorman:

Reference is made to your letter of April 28, 1955, in regard to the above numbered Permits in the name of Mark Edgar Moorman, Lola Beth Moorman, and Celia Pauline Kusan all of which were issued in connection with Desert Land Entries.

Since special land use permits were not granted until March 21, 1955, there will be no loss of priority if well drilling is commenced right away.

An Extension can be allowed for making proof of Completion of Works and Beneficial Use equal to the time the Desert Land Entries were pending.

It will be necessary for the Applicants to notify this department when the Desert Land Entries are allowed and apply for such an Extension.
