CARBON COUNTY ABSTRACT

14

The image is a severely degraded scan of a document page. It is characterized by extreme noise, including vertical streaks, horizontal banding, and a high level of contrast that obscures most of the original content. In the upper left corner, there are faint, illegible markings that appear to be the start of a list or table. A small, dark, rectangular mark is visible in the lower right quadrant. The overall quality is poor, making any original text or graphics nearly impossible to discern.

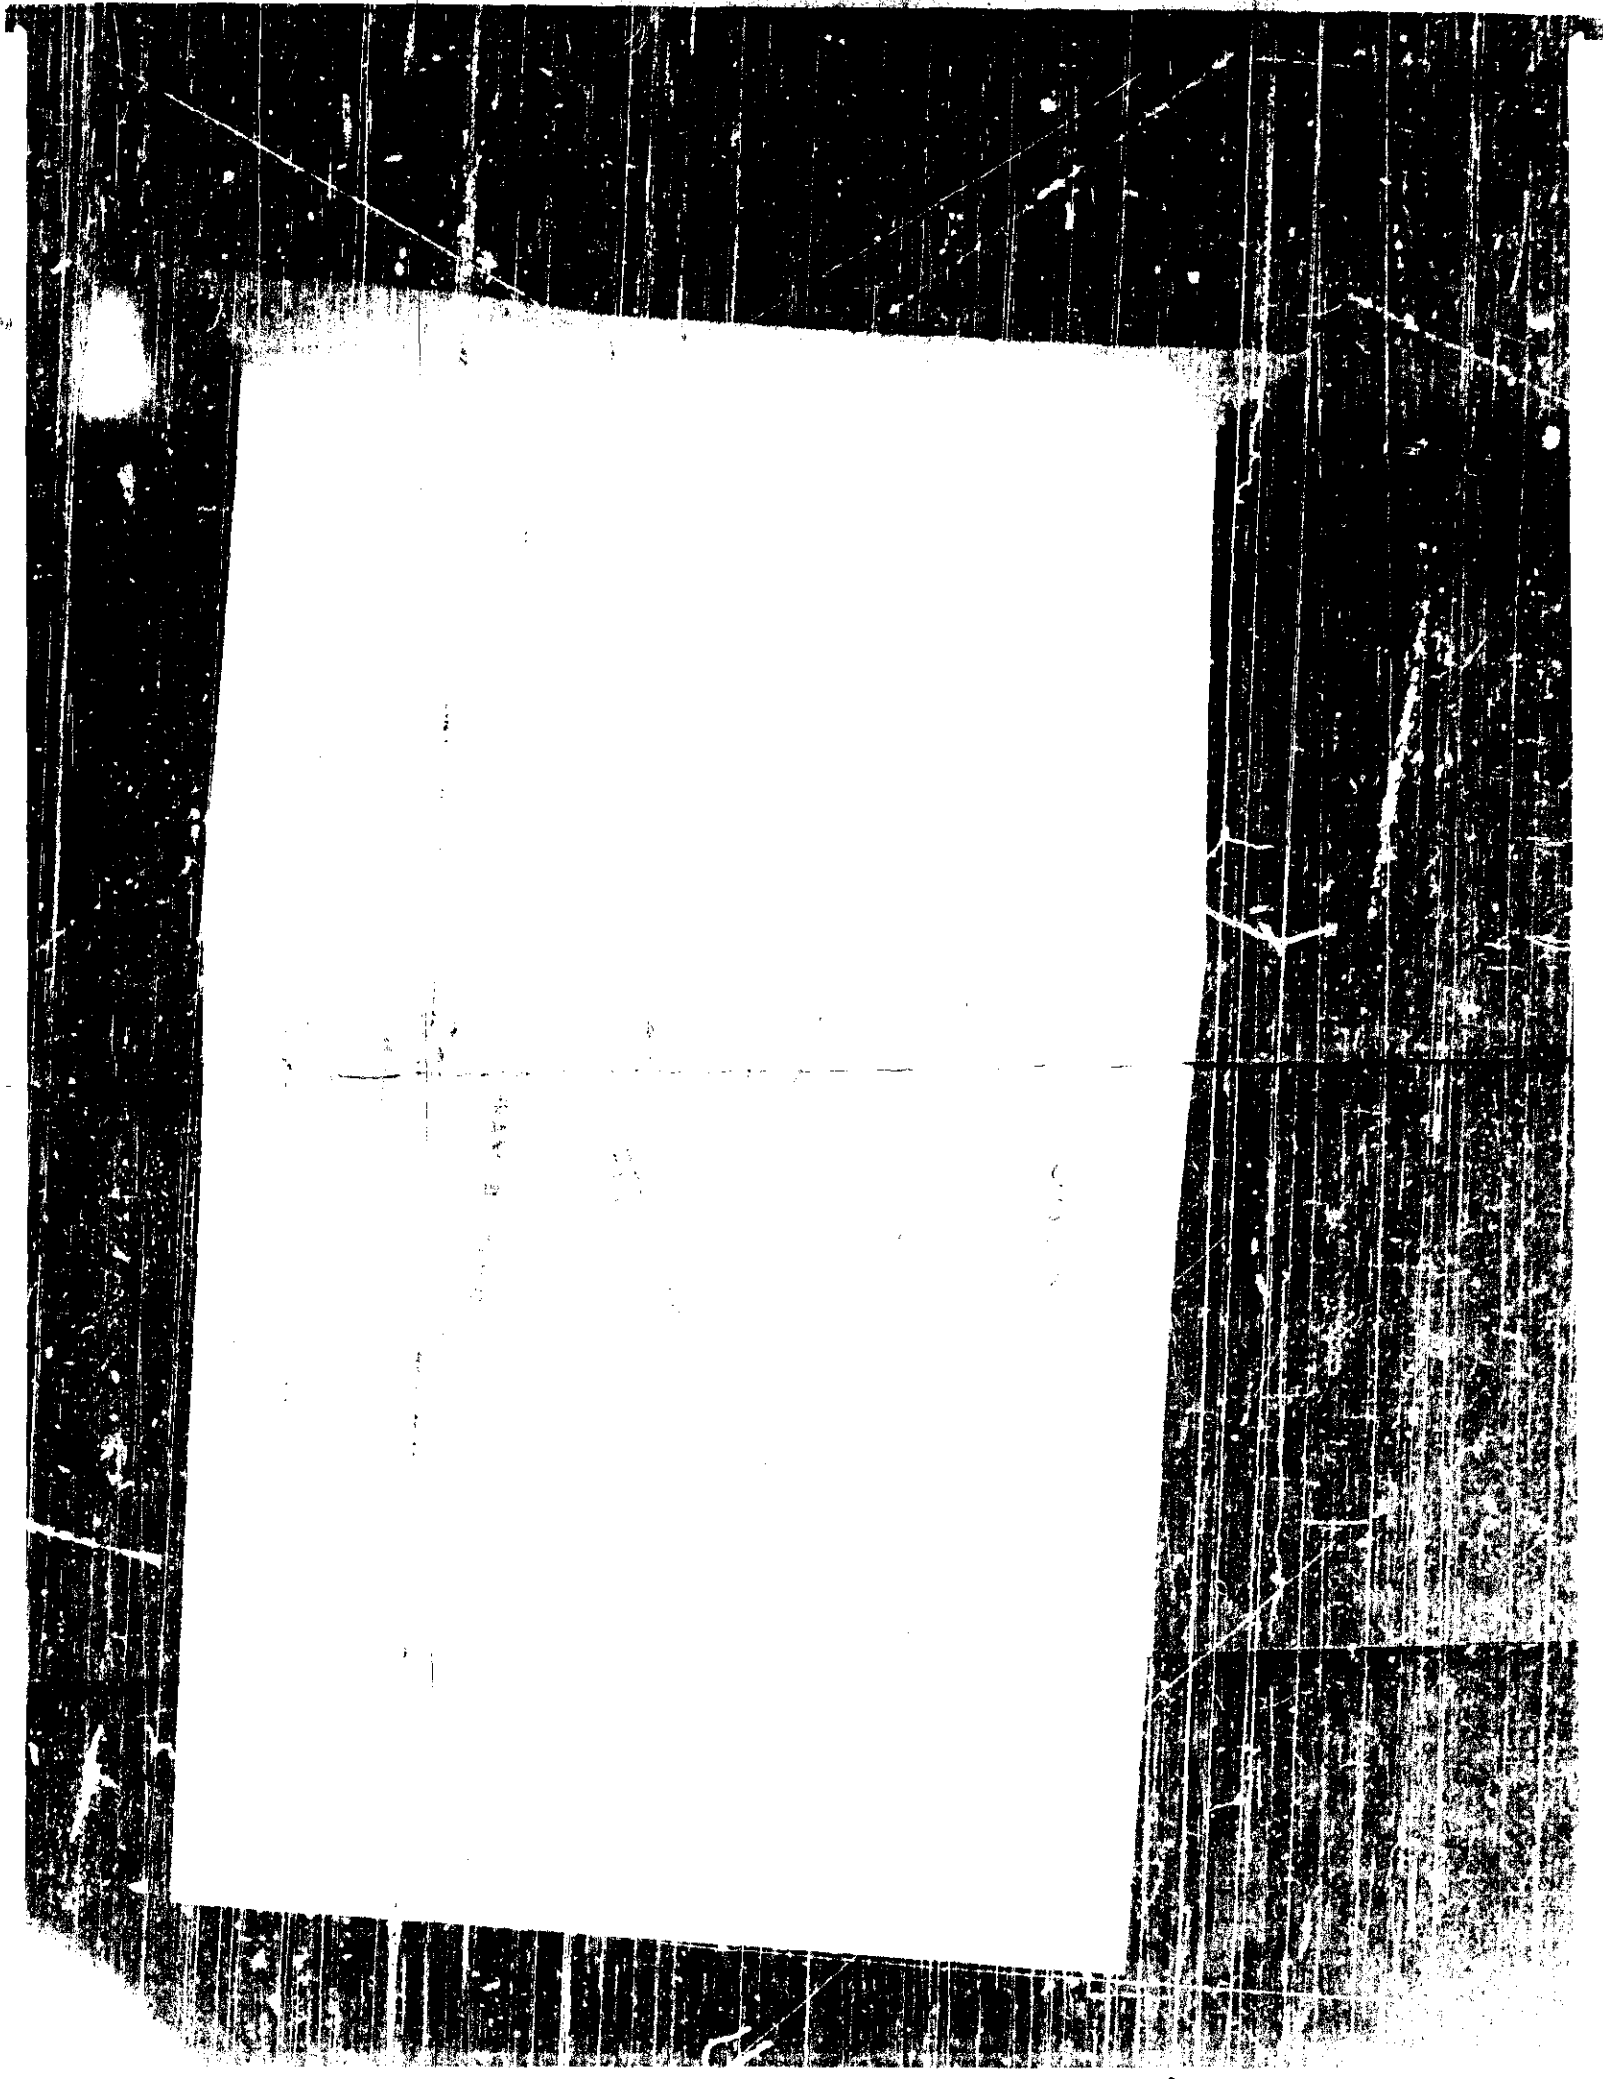

The image is a high-contrast, black-and-white scan of a textured surface. It appears to be a book cover or a similar material, but the image is severely degraded with heavy noise, vertical streaks, and horizontal banding. The texture is dense and irregular, with many small, dark, vertical marks and larger, lighter, horizontal streaks. The overall appearance is grainy and noisy, with a lot of visual clutter. There are no discernible text or figures.

Dear Mr. Giles:

Our office acknowledges receipt of Assignment of the above referenced water rights. However, in reviewing the files I find that the water rights are Licenses.

In Idaho, a licensed water right is considered real property and is acquired when the property to which it is appurtenant to is purchased. Proof of owning the land is proof of owning the water right license.

Therefore, I have put the Assignment into the files for future reference only and no other action will be taken. I have also enclosed copies of the Licenses for your records.

If you have any questions please feel free to contact our office.

Sincerely,

ROBYN CARLSON

ASSIGNMENT OF WATER RIGHTS

The undersigned (hereinafter "Grantor"), for good and valuable consideration, receipt of which is hereby acknowledged, does hereby sell, assign, transfer, grant, convey and warrant to FIRST SECURITY BANK OF IDAHO, N.A. (hereinafter "Grantee"), all right, title and interest in the licenses, decrees, adjudications, claims, permits, written agreements and stock in water companies, listed in Exhibit J attached hereto and incorporated by reference, along with any and all interest the Grantor may have, acquire, claim or otherwise hold over any other unspecified public waters of the State of Idaho (hereinafter "Water Rights") which have been or are now used and applied to beneficial purposes upon the real property described in Exhibits A and C attached hereto and incorporated by reference.

Grantor warrants that it has performed all acts and made all filings necessary to maintain in full force and effect all of the Exhibit J Water Rights, and that there are no written or oral agreements which adversely affect or change the aforementioned Water Rights.

Grantor further covenants and warrants that a notice of claim has been or will be filed prior to June 30, 1983, pursuant to Idaho Code Section 42-243 by Grantor for the benefit of Grantee for all unspecified public waters of the State of Idaho which have been or are now used and applied to beneficial purposes upon the real property described in Exhibits A and C attached hereto and by this reference incorporated herein.

IN WITNESS WHEREOF, the Grantor has caused its corporate name to be hereunto subscribed by its President and its corporate seal to be affixed by its Assistant Secretary effective January 31, 1983.

I can find no reason not to allow the transfer of the points of diversion. In fact, pumping the same Q from 3 wells widely spread, rather than from 1 well, should have less of a local pumpage drawdown (interference) effect on nearby wells.

Dear Mr. Anderson:

The report of our field engineer on examination for completion of works and beneficial use on your Permit No. 21766 shows that your well in the $SE\frac{1}{4}SE\frac{1}{4}$ Section 2, Township 13 South, Range 22 East, B.M. has been used to irrigate 150 acres in the $NE\frac{1}{4}NE\frac{1}{4}$ Section 11, $SW\frac{1}{4}NW\frac{1}{4}$ and $W\frac{1}{2}SW\frac{1}{4}$ Section 1, Township 13 South, Range 22 East, B.M.

A Certificate of Completion of Works and License can, therefore, be issued for 150 inches or 3 second feet of water upon receipt of the statutory fees. These amount to \$5.00 for completion of works and \$8.00 license fee or a total of \$13.00.

Dear Mr. McDowell:

This morning's mail brings us a very courteous letter from Mr. Brown of the Oakley Herald enclosing affidavits of publication in connection with the above numbered permits in the name of Vanness Anderson.

This completes the proof but before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made but our field engineer will try and contact Mr. Anderson at the time he makes the examination so that arrangements may be made to show him over the grounds.

Gentlemen:

On October 5, 1954, we sent you two notices for publication on Permits Nos. 21766 and 21767 in the name of Vanness Anderson which we understand from the copy sent us, were published from October 7 to October 28, 1954 inclusive.

In our letter sending you these notices we requested that you send affidavits of publication to Mr. Vanness Anderson of Oakley.

Mr. Anderson has made his proofs in accordance with the published notices but the affidavits of publication are necessary to complete his proofs.

Since we have been unable to obtain these affidavits from Mr. Anderson or Mr. Harley H. McDowell, his agent, we would appreciate it very much if you would send to this Department an affidavit of publication in connection with each of these notices.

Dear Mr. McDowell:

On December 7 you handed us depositions of Vanness Anderson and two witnesses in proof of Completion of Works and Beneficial Use on Permits Nos. 21766 - and 21767.

The affidavits of publication in the Oakley Harold which are a necessary part of these proofs did not accompany the proofs, but we understood that these would be submitted later.

To date the affidavits have not been received and we can not accept the proofs without the affidavits.

The Oakley Harold was instructed to send these affidavits to Mr. Anderson and if he is interested in keeping these Permits in good standing it is important that the matter be given prompt attention.

Permit No. 21766

Proof of Application of Water to Beneficial Use and Completion of Works

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. My name is Vanness Anderson; residence, Burley, Idaho; occupation, farming and agriculture; postoffice address, Oakley, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. I am acting as an individual.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. The number of my permit is 21766 dated October 31, 1950. I propose to establish priority of October 24, 1950.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. The source of my water is subterranean water that is raised through a drilled well located approx. 40' east and 150' north of the SW corner of SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 2, T 13 S - R 22 E., B.M. and is in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 2.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. My works consist of a well drilled to a depth of 465' (with a lift of 380'), has an 18" casing, equipped with turbine type pump and motor, 300 h.p. I have two main ditches for the distribution of this water, the ditches are approx. $\frac{1}{4}$ miles in length, 2' bottom, 2 $\frac{1}{2}$ ' deep and 3-4' top. The discharge from my pump would be estimated at 325 miner's inches. This is based on my experience with irrigation water and having seen several pumps measured. This is gravity irrigation, no sprinkler.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. The purpose of this water is for agricultural irrigation. Place of use would be: 40 acres in SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 1; 40 acres in NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 1; 35 acres in SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 1; 25 acres in NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 11, T 13 S - R 22 E., B.M. All of this land was cultivated by clearing, levelling and preparation of seed bed for irrigation. There is no natural meadow on this land. All of these improvements which consist of a well costing \$8,000, pump and motor \$17,000, land preparation \$6,635, ditches \$300, fencing \$1,500 were a direct result of this said use. (This use is made in connection with permit #21767 and I believe half the water to be allocated on each permit).

21766

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. This is not used for any purpose except irrigation.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. The minimum amount of water required for the purpose specified above, in my opinion, would be at least 1 inch to the acre. In fact on some row crops we may use a little more

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned water permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am the person who originally applied for this permit and the individual to whom the permit was issued.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. This water was used by pumping and distribution through a gravity system over the described 140 ~~acres~~ apprx. 300-320 miner's inches of water was produced and the entire amount of water was diverted under this permit and under Permit # 21767 (140 inches on 21766 and the remainder on 21767). All of this was used for agricultural production.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. There are no other waters diverted on these lands and no beneficial use of any water on these lands, other than that claimed from this well; however, as mentioned above, from this well, I also use water distributed as per permit #21767.

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is W. F. Speckman; age, 56; residence, Oakley, Idaho; occupation, hardware dealer and agriculture; postoffice address, Oakley, Idaho.

Ques. 2. Are you acquainted with Vanness Anderson, the holder of Permit No. 21766? How long have you known him and where does he reside?

Ans. I have known him for over 30 years and know that he resides in Burley, Idaho.

Ques. 3. Have you read or heard read said Permit No. 21766, and are you familiar with its provisions and conditions?

Ans. I am.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. The source of the water is subterranean raised through a drilled well. Place of diversion, SW corner of SE¹/₄ Sec. 2, T 13 S - R 22 E., B.M. Works are drilled well, turbine type pump and motor and gravity irrigation system.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I estimated that said works will safely convey 300 Miner's inches of water and, in my opinion, have seen this much so conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. About 300 miner's inches. This is an estimation based on my experience in agriculture over a period of years.

21766

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is used for irrigation of 40 acres in SW $\frac{1}{4}$ NW $\frac{1}{4}$, 40 acres in NW $\frac{1}{4}$ SW $\frac{1}{4}$, 36 acres in SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 1, 25 acres in NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 11 all in T. 13 S. - R. 22 E., B.M. There is no natural meadow and all improvements of well drilling, pump and motor, and irrigation system have been made as a direct result of this use.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. None.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The land is a sandy clay loam suitable for row cropping. I estimate the amount of water now in use (about 1 miner's inch to the acre) to be the minimum required for profitable cultivation.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. None.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I live in Oakley, Idaho and have farm land in this vicinity and have had occasion to see the land development contained at least once a month since the time of first works. I have seen this water applied to beneficial use, as provided under the permit.

Deposition of Witness **and Completion of Works**

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is P.G. Clark; age, 53; residence, 8 miles northeast of Oakley; occupation, farming; postoffice address, Oakley, Idaho.

Ques. 2. Are you acquainted with Vanness Anderson, the holder of Permit No. 21766? How long have you known him and where does he reside?

Ans. I have known him for over 30 years and that he now resides at Burley, Idaho.

Ques. 3. Have you read or heard read said Permit No. 21766, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. I know that the source of the water supply is a drilled well; place of diversion, SW corner of SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 2, T 13 S - R 22 E., B.M. The works consist of a drilled well with 18" casing from turbine type pump and motor, 300 h.p. and the water is spread through a surface gravity system to the place of use.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I feel that at least 300 miner's inches of water can be produced by these works and safely conducted to the place of use by the distribution works. I have seen this amount so conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I have seen this pump deliver/ what, in my opinion, would be 300 miner's inches. This estimate was based on my having seen water measured many times through pumps and from having used irrigation water for agriculture.

21766

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. ~~The purpose of this water is for agricultural production on the following subdivisions: SW1/4NW1/4, 40 acres; NW1/4SW1/4, 40 acres; SW1/4SW1/4, 35 acres, Sec. 1. NE1/4NE1/4, 25 acres, Sec. 11, T 13 S - R 22 E., B.M.~~ This land is all cultivated and the improvements including the pump, well, distribution works have all been made as a direct result of this use and the production of this land to raise agricultural crops in 1954, has all been made as a direct result of this irrigation water.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Only irrigation.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The character of the land is very high production, row crop land which can be economically farmed and I believe that the amount of water now being used on the land or approx. 1 M,ner's inch to the acre would be the least required for profitable irrigation.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I have no interest in the works, water or land mentioned above.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I live about a mile northeast of this land and have occasion to see it almost every day. I have seen it almost since the time the water was filed upon so have witnessed the entire development of this project.

ATT: Mr. A. H. Nielson

Dear Mr. Nielson:

We enclose Permits Nos. 21766 and 21767 in the name of Venness Anderson, together with Departmental Receipts Nos. 22767 and 22768 for the \$5.75 filing fees on each.

Since it is uncertain when the homestead filings on these lands will be approved by the Bureau of Land Management, we have allowed the maximum of five years within which to make Completion of Works Proof, or until October 31, 1955. Of course, if the works are completed in less time, the proof can be made at any time prior to the above date.

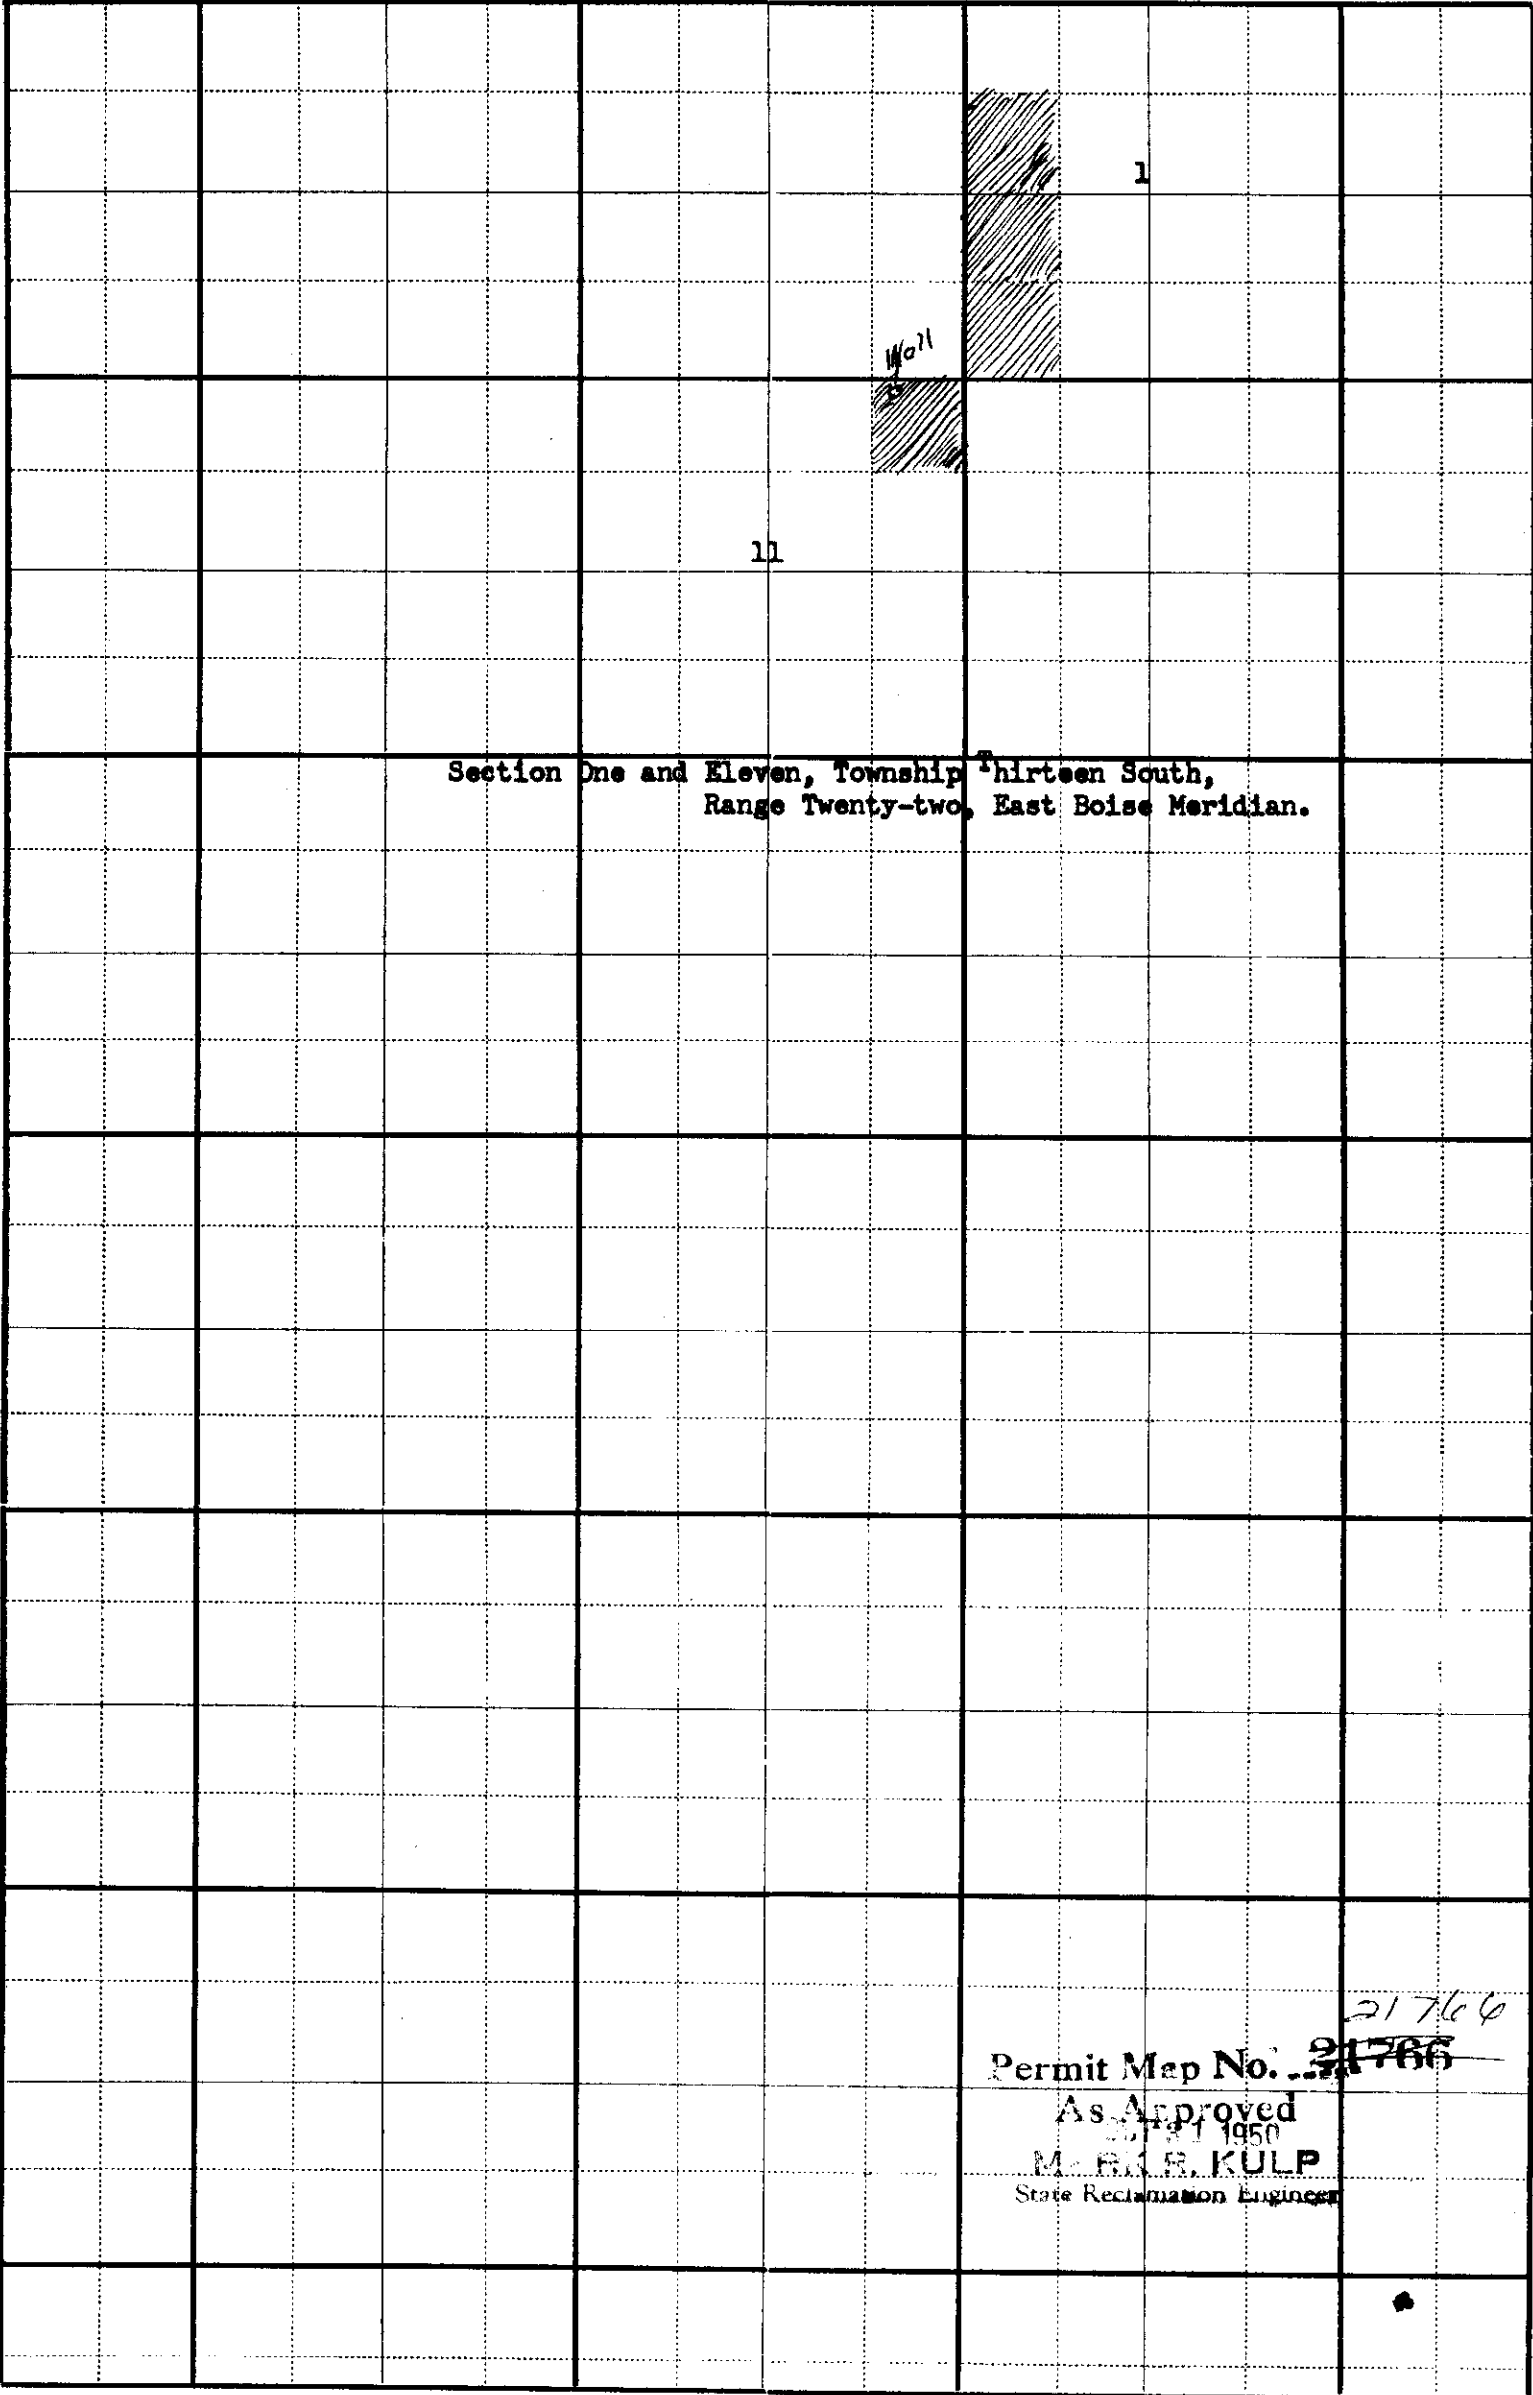

Very truly yours,

Gentlemen:

At the request of Vanness Anderson of Burley, Cassia County, Idaho, I am sending two Applications for Permit to appropriate the public waters of the State of Idaho.

I am also sending two checks, each in the amount of \$5.75, to cover the cost of filing these applications.

Mr. Anderson has made application to the Department of Interior Bureau of Land Management to have set aside the property described in these applications for homestead entry. Mr. Anderson is sure that a well drilled at the places designated would find sufficient water to properly irrigate the 320 acres described in these two applications.

If the applications have not been properly prepared, would you notify our office of any additional information necessary. Thank you.

Very truly yours,

NIELSON & NIELSON
