RE: Permit No. 20848

Mr. W. J. Langley
248 Third Avenue East
Twin Falls, Idaho

Dear Mr. Langley:

Reference is made to your letter of June 22, 1953, in regard to Permit No. 20848 in the name of J. W. Beck and Paul Wm. Beck.

The records in this department show that this application was originally filed for 3.2 second feet and the proof of completion of works showed works sufficient to deliver 2.1 second feet or 105 inches of water.

However, when beneficial use proof was made, field inspection showed that that well was only producing 41 inches and for that reason, license was issued for that amount, or 0.82 second foot. A supplemental license can be issued under the same permit for an additional amount, up to the 105 inches shown in completion of works proof. However, this license would take a later priority than the original license by the length of time that has elapsed since the date set for beneficial use proof.

This would require publication of a notice once a week for four weeks in a county newspaper the same as in making the first beneficial use proof.

On the other hand, if Messrs. Beck should file a new application at this time for additional water from the same well it could be approved and permit issued, but it would take the present priority.

Very truly yours,

MARK R. KULP

Dear Mr. Kulp:

Recently Mr. J.W. Beck and Paul Wm. Beck obtained permit No. 20848 license to .82 second feet of water for irrigation purposes on their farm east of Twin Falls. Since that time they have expended some \$5500.00 more on the same well and for the same purpose in digging the well deeper and increasing pump power and now obtain 115 inches or 2.3 second feet of water from same well.

I do not find any procedure in the Idaho Code as to a supplemental or amended permit and apparently it is necessary that they file a new application for permit to appropriate the difference between what they already have license for and new quantity of water.

Would you please advise me what procedure you recommend in light of fact that I do not want to disturb original permit and date thereof, and also the fact that the works are already completed.

Your advise will be greatly appreciated.

Very truly yours,

Before final action is taken in the matter, the law requires that an examination be made by an engineer from this department.

We cannot say just when this examination will be made as this department has but one field engineer who makes examinations all over the State.

However, he will try to contact the permit holders at the time the examination is made so that arrangements may be made to show him over the grounds.

PROOF OF COMPLETION OF WORKS

Messrs. J. W. Beck and Paul Wm. Beck
Twin Falls
Idaho

Boise, Idaho

Dear Sir:-

Under the terms of your Permit No. 20848.....you are required to complete your diversion works on or before January 7, 1952..... I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Attention: Mr. Marshall Chapman

Dear Mr. Chapman:

We acknowledge receipt of your letter of December 28 enclosing the application of J. W. Beck and Paul Wm. Beck for permit to appropriate 3.1 second feet of water from a well for the irrigation of 120 acres in the NE $\frac{1}{4}$ of Sec. 35, Twp. 11 S., Range 19 E. B.M., accompanied by Mr. Beck's check for \$5.25.

We return the application herewith in order that the acreage in each 40 may be indicated under Question 14.

As only 120 acres are to be irrigated the permit can only be approved for 120 inches of 2.4 cubic feet per second.

The filing fee on this amount is \$5.50, being at the rate of \$5.00 for the first second foot and 25 cents for each additional second foot or fraction thereof.

We, therefore, return Mr. Beck's check with the request that he substitute for it one in the amount of \$5.50.
