

APPROVAL OF STATE RECLAMATION ENGINEER

I, Mark R. Kulp, State Reclamation Engineer of the State of Idaho, hereby extend the time for the completion of construction work under Permit to appropriate the Public Waters of the State of Idaho, No. 20486 to September 7, 1950.

Witness my hand this 8th day of September, 1948.

MARK R. KULP
State Reclamation Engineer

APPLICATION FOR AMENDMENT
TO PERMIT TO APPROPRIATE THE PUBLIC WATERS
OF THE STATE OF IDAHO, NO. 20486.

Comes now Richard L. Smith and represents to the State Reclamation Engineer of the State of Idaho:

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. 20486;

That the point of diversion is described in said Permit as being located approximately on the center line of the West line of the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 21, and conveyed to the place of use through ditches on the land, as per map filed herewith.

That he now requests that the point of diversion be changed to a point located in SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 21, and conducted to the place of use through the same ditches, as per map above referred to.

That his reasons for desiring to make such change are as follows: The location of the well remains the same and is not moved, but the first description of its location was in error some 53 feet, and closer inspection of its location actually is as last stated.

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

Signed at Burley, Idaho, this 18th day of August, 1950.

RICHARD L. SMITH

Date of receipt at Department of Reclamation August 19, 1950.

APPROVAL OF STATE RECLAMATION ENGINEER

I, Mark R. Kulp, State Reclamation Engineer of the State of Idaho, hereby approve the above and foregoing application for amendment to Permit to appropriate the Public Waters of the State of Idaho, No. 20486. This approval constitutes a new permit and is issued as an amendment to the original permit to which it refers, and of which it becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected thereby.

REPORT OF ENGINEER

Permit No. 20486

This proof is for Beneficial use In Water District No. _____

1. Name of applicant Richard L. Smith, Route 2, Burley, Idaho
2. Source of water supply: A deep well (subterranean)
3. Location of point of diversion: Is in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 21
T. 10 S. R. 22 E. County of Cassia
4. Describe works as they exist, giving dimensions and capacities of same: Well is 30' deep by 42" in diameter. H. equals 15', drawdown is to 22'. Well is cased to the bottom with reinforced tile. There is no well house and no cover over the well whatever. The pump sets 15' down in the well and has a suction reaching approximately the bottom of the well. This is a hand dug well. 10 h.p. motor, 3 ph., 60 cycle, 220 volts, 3450 r.p.m., no markings, believed to be a Peerless Motor. Has recently been rewound.
5. Water is used for: Irrigation and culinary purposes. (Straight irrigation)
6. State whether or not water has been turned into works of diversion: yes
7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):
S $\frac{1}{2}$ NE $\frac{1}{4}$ and E $\frac{1}{2}$ SE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 21, Twp. 10 S., Range 22 E., B.M.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: Pump is a Peerless Centrifugal, 2 $\frac{1}{2}$ " intake by 2" discharge. Switches and Controls are Mongerson Panel, Serial #29492. Meters and Switches are mounted on a Pole approximately 40' Southeast of the well. Meter is a 240 volt Westinghouse, Serial #19026519. Discharge is through a 5" pipe. Pressure at present is 50 lbs. Earlier in the season it is 40 lbs. Water is higher now by 4 to 5 feet than at beginning of season. This is a sprinkler irrigation system. There are 650' of 5" aluminum main and 650' of 4" aluminum main. There are 1240' of 4" aluminum lateral. There are 32 Rainbird #40 sprinklers. Nozzles are 3/32 x 3/16, at 50 lbs. pressure. These deliver slightly over 9 gallons per minute each. This farm is hilly, sandy soil, just South of Snake River, approximately 5 miles West of Burley. Crops are hay and beans.

This examination was made on the 1st day of August, 19 51.

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Dear Mr. Smith:

The report of our Field Engineer on examination for beneficial use under your Permit No. 20486, shows that your well in the ~~SW~~^{SE} Section 21, Township 10 South, Range 22 EBM, will deliver 32 inches of water.

Therefore, upon receipt of the statutory fee of \$6.00, which is at a rate of \$2.00 for each 40 acre subdivision in which the land is located, a license will be issued for 32 inches, or .64 second foot of water for use on 84 acres in the ~~SW~~^{SE} and ~~SE~~^{SE} of said section.

Mr. Herman E. Bedke
P. O. Box 204
Burley, Idaho

Dear Mr. Bedke:

In reply to your letter of December 8, 1950, inquiring as to inspection for beneficial use under Permit No. 20486 of Richard L. Smith:

As mentioned in a former letter, this Department has but one Field Engineer who makes examinations all over the State and we try to make these inspections as nearly as possible in the general order that the proofs are made, and at the same time, combine as many inspections as possible in one locality in order to save time and expense.

Mr. Smith's proof was not made until September 23, 1950, and it has not been possible to arrange for an inspection this season. We also have in mind that it is more than likely the power would be shut off before an inspection could be made this Fall.

The Permit is in good standing since all the statutory requirements have been made by the Permit holder and we shall try and make an inspection sometime during the early part of the next irrigation season.

Dear Mr. Smith:

We acknowledge receipt of the depositions of yourself and two witnesses, also Affidavit of Publication in the Burley Herald; all submitted in Proof of Beneficial Use under Permit No. 20486.

Before final action is taken in the matter, the law requires that a field examination be made by an Engineer from this Department.

We are unable to say just when this examination will be made as this Department has but one Field Engineer who makes examinations all over the State.

However, the Field Engineer for this Department will try and contact you at the time he makes the examination in order that you may arrange to show him over the grounds.

Dear Mr. Smith:

We are in receipt of your letter of July 27, and note that the well described in Permit No. 20486 is really located in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 21, instead of on the West line of the SE $\frac{1}{4}$ NE $\frac{1}{4}$.

We therefore enclose an Application for Amendment which you may execute and return to this Department for approval by the State Reclamation Engineer.

Gentlemen:

The location of the well in the permit says that it is approximately on center line of the West line of the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 21, but upon closer survey the well is actually located in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec 21 as stated in the Proof of Completion.

The second well described in the amended permit has not been dug and I have no present intention of digging it for the reason that the use of the sprinkling system on the well above describe is adequate.

Dear Mr. Smith:

We acknowledge receipt of your Proof of Completion of Works under Permit No. 20486, and your check for the \$5.00 fee in connection therewith, also duplicate notice of Beneficial Use Proof to be made on this Permit on September 5, 1950.

*In cash

We note a little discrepancy in the description of the well location, and before issuing Certificate of Completion of Works, we would like to have this clarified. Your Affidavit states that the point of diversion is in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 21, Township 10 South, Range 22 East, B.M. However, the Permit first described the location as in the center line of the West line of the SE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 21, and this was amended later to include a second well in the center point of the East boundary line of the SE $\frac{1}{4}$ NE $\frac{1}{4}$.

Please advise exactly where the one well is located on which you are making Completion of Works Proof.

Gentlemen:

Enclosed herewith is application for amendment of permit to appropriate the public waters of the State, and application for extension of time for completion of works, together with two copies of maps showing the location of proposed well, in addition to that shown in the map attached to the original permit.

As I have heretofore advised you, Mr. Smith states that the well described in the original permit has been drilled, but the same produces only one second foot and it is therefore necessary that he drill an additional well in order to obtain the water required for the irrigation of the land specified in the original permit.

Will you please advise me of the action taken by the State Reclamation Engineer in connection with these applications and oblige.

Dear Mr. Lowe:

Reference is made to your letter of August 30 in regard to Permit No. 20486 in the name of Richard L. Smith.

One of two additional wells may be included in this same permit by executing the enclosed form of application for amendment of point of diversion.

We enclose application for extension of time for completion of works which Mr. Smith may also execute and return for approval.

Very truly yours,

MARK H. KULP

Dear Mr. Kulp:

On June 7, 1948, you approved an application filed by Richard L. Smith, Route 2, Burley, Idaho, for permission to appropriate three second feet of underground water, Application No. 28122, Permit No. 20486.

This application has been prepared by me at the request of Mr. Smith and it showed that the work had been completed and the waters completely applied to beneficial use. According to your approval, the proof of the completion of works and of the application of water appropriated was to be made on or before September 7, 1948.

Mr. Smith was in my office this morning and he advises me that the well which was described in the application for permit does not produce more than one second foot of water and he is desirous of constructing one or two additional wells to enable him to appropriate the quantity of water specified in the permit.

In order to do this, however, it will be necessary that he have at least one year additional time before being required to make proof of the completion of works and application of beneficial use.

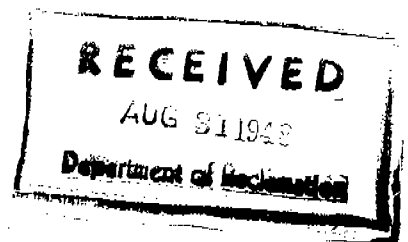

Would it be possible for you to grant to Mr. Smith the requested extension of time until September 7, 1949?

Yours very truly,

Kales E. Lowe

Dear Mr. Lowe:

We enclose Permit No. 20486 and direct the holder's attention to the limitations and conditions of same as given on the fourth page under approval of State Reclamation Engineer.

Since the application states that the works are completed, we have allowed three months or until September 7, 1948, to make the two statutory proofs necessary to complete the water right. These proofs, however, may be made at any time prior to that date.

The first proof or proofs of completion of works is made by executing Form 8 enclosed before a Notary Public, and returning to this department with a statutory fee of \$5.00, upon receipt and approval of such a certificate of completion of works will be issued.

The final or beneficial use proof requires publication once a week in a county newspaper for four consecutive weeks prior to the date set for making proof. Notice should be made in duplicate on Form 10 enclosed, setting the time and place and naming the Notary Public before whom proof is to be made. Both copies of the notice to be returned to this department together with Form 11 which is your authorization for us to have the notice published in the designated newspaper at permit holders expense.

We shall then send a copy of the notice to the newspaper with instructions in regard to publishing, and on the date set you should appear before the Notary Public together with two disinterested witnesses to execute depositions of proof on forms furnished by this department.

Very truly yours,

MARK R. KULP
State Reclamation Engineer
