} ss.

Rellis Murphy

, being first duly sworn, deposes and says:

That his name is Rellis Murphy; that he is of lawful age, a citizen of the United States and of the State of Idaho, and that his postoffice address is

Box 82, Route 1, Hazelton, Idaho

That he is the owner and using a certain water right, bearing date of priority of May 17, 1948, for .31 cubic feet per second of the waters of Subteranean

County of Twin Falls, State of Idaho, decreed to

by decree of Judge of the Judicial District of the State of

Idaho, in and for the county of, in the case of

vs. , said decree bearing date of

(or obtained by virtue of License No. 20475, issued by the State Department of Reclamation of the State of Idaho, dated Feb 2, 1951, bearing date of May 17, 1948)

for the purpose of irrigating the following described lands situate, lying and being in Water District

No. in the County of Twin Falls and State of Idaho, to-wit:

S2SW1/4 Section 24, Township 11S, Range 19E.

and is the person (or representative of the corporation) to whom such right so issued, or has become the owner thereof in the following manner, i.e.

as per abstract of title of said water right hereto attached and made a part of this statement;

That said waters are now diverted from said stream in the NE1/4SW1/4 Sec of Section 24, Township 11S, Range 19E, B. M., and conducted to the above described lands through Main Line

as per map herewith and of this affidavit made a part.

CHANGE IN PLACE OF USE

That affiant and petitioner desires to abandon the use of cubic feet per second of said water upon the above described land, and to convey and use same upon the following tract, situate, lying and being in the County of and State of Idaho, to-wit:

That reasons for desiring to make such transfer are as follows:

The well originally under this permit has failed to produce any water

and has been abanded. All the water to be taken from the new point

of diversion.

That he intends to divert and convey said .31 second feet of water to the tract of land last above described in the following manner and as per map accompanying this application:

Note—If this water right has heretofore been carried jointly in a ditch with other water, affiant should secure written consent of other owners or users to removal from its original carrier and file such consent with this affidavit.

CHANGE IN POINT OF DIVERSION

That affiant desires to change the point of diversion of said waters from the point above described to a point located in NE $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 24, Township 11S, Range 19E, and thereafter conduct same to the above described land through the Main Line ~~ditch~~, as per map appended.

That his reasons for desiring to make such change are as follows:

Well previously applied for on this permit does not produce any water.

Petitioner asserts that no one will be injured by such transfer, or change in point of diversion, and that the change will be made at petitioner's own risk.

WHEREFORE, Affiant and Petitioner prays that the State Reclamation Engineer of the State of Idaho issue to him the proper certificate authorizing such change in point of diversion and/or place of use, in accordance with the provisions of Sections 42-108 and 42-222 of the Idaho Code.

Dear Mr. Keenan:

In reply to your letter of May 4th inquiring as to the status of Permit No. 20475 in the name of Zylpha Lincoln Kirkman.

Our records show that License for 0.31 second foot of water from a well in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 24, Township 11 South, Range 19 East B.M. was issued February 1, 1951 and was sent to Mr. Frank L. Stephan.

However, the enclosed copy of letter addressed Mr. Rellis Murphy on April 1, 1954, may be of interest to you in this connection.

Dear Sirs:

Please advise us what your records show as to the status of Permit No. 20475 in the name of Zylpha Lincoln Kirkman on a well in $W\frac{1}{2}$ $SW\frac{1}{4}$ of Section 24, Township 11 South, Range 19 East.

Our files have become misplaced and my general recollection of this permit is that final proof had been made and accepted, but the well was later re-drilled and apparently some extra water developed.

We will appreciate such aid as you can give.

RE: Permit No. 20475

Mr. Rollis Murphy
Hazelton
Idaho

Dear Mr. Murphy:

Complying with your request for procedure required to make supplementary proof of beneficial use on Permit No. 20475 in the name of Zylpha Lincoln Kirkman.

Since this permit was filed originally for 1.6 second feet of water or 80 inches and beneficial use proof only showed .31 second foot or $15\frac{1}{2}$ inches that could be licensed, it will be possible for Mrs. Kirkman to make supplementary proof of beneficial use for the difference.

In order to do this, notice must be published once a week for four weeks in a county newspaper before the proof is made. This notice should be made in duplicate on Form 10 enclosed, setting the time and place and naming the Notary Public before whom the proof is to be made.

Both copies of form 10 to be returned to this department together with form 11 which is authorization for us to have the notice published at Permit holder's expense in the designated county newspaper.

Of course the priority that can be established under this later proof will not be the same as the original priority, but will be approximately four years later, as this proof was due in May, 1950 and the priority must be as much later as the proof is past due.

Very truly yours,

Dear Mr. Stephan:

We now have on file the report of our Field Engineer on examination for beneficial use under Permit No. 20475 in the name of Zylpha Lincoln Kirkman.

This report shows that the well located in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 24, Township 11 South, Range 19 East, B.M. is capable of delivering 15 $\frac{1}{2}$ inches of water which is being used for the irrigation of 60 acres in the S $\frac{1}{2}$ SW $\frac{1}{4}$ of said Section.

Therefore, upon receipt of the statutory fee of \$4.00, a License will be issued for .31 second foot of water from said well for the irrigation of the above described land.

We understand that Mrs. Kirkman has transferred this property and Permit to her son, and if the License is to be issued in his name rather than Mrs. Kirkman's, the enclosed form of Assignment should be executed and returned to this Department with the recording fee of \$.50.

Permit No. 20475.

Mrs. Kirkman was contacted regarding this Permit and she advised that the farm had been sold to her son. The son was requested to accompany me and see exactly how this inspection was made. He was badly disappointed in the performance of the pump and advised that he was going to get rid of the whole property this fall.

He had been out on a party the night before and refused to accompany me on this inspection, and stated that he would be satisfied with the findings. He stated further that the pump should pump 40 inches, but it didn't quite do that much but he used 40 ciphons out of the ditch for irrigating.

This water was measured over the weir very close to the delivery sump and there is no error in the reading.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use.

Ans. 300 foot well located as above set forth, cased with 135 feet of 14-inch steel casing, and equipped with a 40 H.P. Deming Electric Turbine Pump. Water is conveyed from well to the high point of SE $\frac{1}{4}$ SW $\frac{1}{4}$ of said Sec. 24 through 860 feet of 10-inch pipe, and thence conveyed to places of use through open ditches. Works are capable of conducting to a place of use 1.60 cubic feet per second of time. Works and ditches are unnamed being all located on SW $\frac{1}{4}$ SW $\frac{1}{4}$ and SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Sec. 24-11-19

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is used for irrigation of 40 acres of SW $\frac{1}{4}$ SW $\frac{1}{4}$ and 40 acres of SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Sec. 24-11-19. Said 80-acre tract was irrigated from said well during entire crop season of 1949 from March, 1949 through October, 1949. All land is cultivated there being no natural meadow land. Improvements consist of irrigation works in question, fences, a 2-room residence, granary and corrals. It was also necessary to clear a part of said land from sagebrush and to do some leveling for proper irrigation.

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. _____

20475

E. W. H.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. Fifty inches of water is minimum amount of water required

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Water used during entire irrigation season of 1949 for production of potatoes, beans and grain. Average yields of said crops were produced and I believe better crops will be produced during season of 1950

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. There is no other water appurtenant to said premises. Irrigation works cost in the neighborhood of \$10,000.00 and land would be unfit for production of crops without water produced from said well and said irrigation works.

PERMIT NO. 20475

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. MERL BRONSON, age 25 years, residence and post office address
R.F.D. 2, Twin Falls, Idaho, occupation farmer.

Ques. 2. Are you acquainted with Zylpha Lincoln Kirkman, the holder of Permit No. 20475? How long have you known ^{her} ~~him~~ and where does ~~he~~ ^{she} reside?

Ans. Yes, I have known Mrs. Kirkman about ten years. She lives at Twin Falls, Idaho at 130 Walnut Street.

Ques. 3. Have you read or heard read said Permit No. 20475, and are you familiar with its provisions and conditions?

Ans. Yes I have read the Permit and am familiar with its provisions.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Water is obtained from subterranean sources from a 300 foot well, located about the center of SW $\frac{1}{4}$ SW $\frac{1}{4}$ of 24-11-19, which well is cased with 135 feet of 14-inch steel casing and equipped with a 40 H.P. Deming Electric Turbine pump. Water is conveyed through about 860 feet of 10 inch steel pipe from said well to the high point of the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of said Sec. 24, and thence distributed to the points of use through open ditches.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. Water will safely conduct to place of use 1.60 cubic feet per second
I have seen approximately 65 inches of water conveyed through said works

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water was used for irrigation of 40 acres of SE $\frac{1}{4}$ SW $\frac{1}{4}$ and 040 acres of SW $\frac{1}{4}$ SW $\frac{1}{4}$ of said Sec. 24-11-19 through all of irrigation season of 1949 and potatoes, beans and grain were produced on said 80-acre tract from such irrigation. All of said 80-acre tract is cultivated - none is natural meadow land. Improvements consist of the irrigation works above described, fences, a 2-room residence, granary and corrals. Sagebrush was cleared from said land and some leveling done to permit economical irrigation of said tract.

20475

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. _____

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Land reclaimed was sagebrush land - soil is deep lava ash with no rocks and will require at least one cubic foot per second for profitable cultivation of crops.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I have no interest in the works, water or lands above described.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I helped instal the above described irrigation works on said premises. I saw all water produced from the well being used for irrigation of crops on said 80 acre tract at numerous times during the crop season of 1949. Average crops of potatoes, beans and grain were produced for the crop season of 1949 - undoubtedly the crops will be better the second season.

State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water was used for irrigation of SE $\frac{1}{4}$ SW $\frac{1}{4}$ and SW $\frac{1}{4}$ SW $\frac{1}{4}$ of said Sec. 24 during crop season of 1949 for production of potatoes, beans and grain. The well produced sufficient water to produce an average crop of said products during said crop season. All of said 80 acres is cultivated - there being no natural meadow land. The above described irrigation works was installed, together with fences for said 80-acre tract, a 2-room and bath residence, granary and corrals. It was necessary to clear sagebrush from land also. Said water was used on all of said 80-acre tract during 1949 crop season.

20475

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. _____

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Land was sagebrush lava ash deep soil with no rocks. Some leveling was done for running of water for irrigation. Fifty inches would be required for said eighty acres to profitably irrigate and farm the same.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I have no interest in the works, water or lands above described.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I was on the above described 80-acre tract four or five times during the crop season of 1949 and on each occasion the well was pumping and the WATER was being used on said 80-acre tract for irrigation of the crops above described. The 80-acres is watered very well from the high point in SE $\frac{1}{4}$ SW $\frac{1}{4}$ above mentioned.
