Dear Mr. Boley:

We have received from Mr. J. R. Keenan the depositions of yourself and two witnesses; also Affidavit of Publication in the Twin Falls Times-News, all in Proof of Beneficial Use under your Permit No. 19487.

Before final action is taken in the matter the law requires that a field examination be made by an Engineer from this Department.

We are unable to say just when this examination will be made as this Department has but one Field Engineer who makes examinations all over the State.

However, Mr. Tolman, Field Engineer for this Department, will try and contact you at the time he makes the examination in order that you may arrange to show him over the grounds.

Re: Application No. 26994

Mr. Max M. Boley  
Murtaugh, Idaho

Dear Mr. Boley:

We acknowledge receipt of your application for permit to appropriate one cubic foot per second of subterranean water accompanied by the \$5.00 filing fee, for which we enclose Receipt # 18514.

However, you failed to state how much time you would require for making the two proofs necessary to obtain a water right under this permit.

The time required to make proof of completion of the works described in the permit should be designated and the law allows a maximum length of time of five years from date of permit.

Also what additional time will you require for making proof of the complete application to the proposed beneficial use of the water applied for?

Please let us hear from you in reply, so that your permit may be issued.

Very truly yours,
