The pump used for statutory claim # A47-04050

This is the inflow of water into the area where the two fish ponds are located. The water comes from the unnamed stream and from waster water from the neighbors pond and the neighbors field and from seepage water. The pipe running across the stream is from the statutory claim # A47-04050.

The above picture is of the unnamed stream and the location of the fish ponds. The picture below is on the two fish ponds. There is a double wide four foot weir positioned at the beginning and the end of the ponds and one double wide four foot weir positioned in the center to sperate the two ponds.

E. NARRATIVE/REMARKS/COMMENTS

The water for this permit comes from an unnamed stream in the SE - NE - NE 1/4 of section 29 - township 11S - range 18E. This stream carries waste water and seepage water to Cottonwood Creek. There are numerous rights that draw water from this stream. The closest of these rights is a pump that draws water from the stream approximately 160 feet east of the point of diversion or first weir gate. This permit is for an on stream use and has no other water rights attached to it.

The owner uses these ponds to raise trout for commercial use. The ponds are used between mid May and the end of December depending on the amount of water that is available and the growing time needed for the fish.

Have conditions of permit approval been met? X yes no

RE: PERMIT NO. 47-08367

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before July 1, 1996.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

1. Will the proposed appropriation injure other water rights?
2. Is the water supply sufficient for the purpose for which it is sought to be appropriated?
3. Was the application made in good faith or for delay or speculative purposes?
4. Does the applicant have sufficient financial resources with which to complete the proposed project?
5. Is the proposed appropriation in the local public interest, which is defined as the affairs of the people in the area directly affected by the proposed use?
6. Is the proposed use contrary to conservation of water resources within the state of Idaho?

BURDEN OF PROOF

The applicant has the initial burden of proof for issues 1, 2, 3, 4, and 6 above and must provide evidence for the department to evaluate these criteria.

The initial burden of proof on issue 5 above lies with both the applicant and protestant as to factors of which they are most knowledgeable and cognizant. The applicant has the ultimate burden of persuasion, however, for this issue.

PROCEDURE

The department generally conducts an informal conference with the parties to determine the issues and to try to settle a protested matter before a hearing is scheduled. If a hearing is held, the department will issue a written decision based on the hearing record.

CONFERENCE

The purpose of a pre-hearing conference is to provide the opportunity for the parties and the department to familiarize themselves with a contested matter and to attempt to resolve the matter. At the conference, the department may also formulate and simplify the issues, identify documents to avoid unnecessary proof, exchange proposed exhibits or prepared testimony, limit witnesses, discuss settlement or make settlement offers, schedule hearings, establish procedure at hearing and address other matters that may expedite orderly conduct and disposition of the proceeding or its settlement.

HEARING

The department will tape record the hearing. Copies of a hearing tape are available upon request and the payment of the cost of reproducing the tape.

The hearing likely will be conducted by a hearing officer appointed by the Director rather than by the Director himself. If so, the hearing officer will prepare a recommended order for the Director's consideration. Parties can file exceptions to a recommended order, briefs in support of the exceptions or may request oral argument. Parties may seek judicial review of any final order issued by the Director.

Parties may by written stipulation waive the right to a recommended order, particularly when a shortened decision process is desirable or necessary. Such a waiver does not eliminate any rights of the parties in connection with the final order of the Director and judicial review of the order.

EXHIBITS

A party who plans to offer an exhibit as part of the hearing record must provide a copy of the proposed exhibit to the parties and to the hearing officer.

AMERICANS WITH DISABILITIES ACT

Any hearing scheduled will be conducted in a facility which meets the accessibility requirements of the Americans with Disabilities Act. If you require special accommodations in order to attend, participate in or understand the hearing, please advise the department within (10) days prior to the hearing.

Re: Water Right Applications 47-08367 Tributary to McMullen Creek (Roberts)

Dear Loren,

The Idaho Dept. of Fish and Game protests water right application # 47-08367 for diversion of 5.0 cfs of tributary water to McMullen Creek for fish propagation. During critical low flow periods, 5.0 cfs constitutes a major portion of the flow within the identified reach of McMullen Creek. Further withdrawal has the potential to degrade water quality and damage aquatic and terrestrial resources which is not in the public interest.

We would be willing to meet on-site with the applicant and a representative of IDWR to further concerns and issues. To coordinate a meeting please contact Dave Parrish, Environmental Staff Biologist at this office, (208) 324-4359.

Sincerely,

Carl H. Nellis
