INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights, and, if a required claim for the water right has not been filed, to file the needed claim.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures, or if you have questions about completing this form, please contact your nearest IDWR office or call 1-800-451-4129.

If you need additional space to describe or explain any of the items on the form, please attach additional sheets to the form as you may require.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believe there are water rights for the property but the numbers are unknown, you may wish to call IDWR or come into an office of IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector "and", "or" or "and/or". If an "and" is used, all parties must sign this form. If an "and/or" or "or" is used, all parties may sign, however only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. If the property you have purchased is only a portion of the property owned by the former owner/seller, you may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

RE: Telephone conversation

=====

Chris Hedrick called today to double-check what paperwork we needed to have him send with the Assignment of Permit that had been requested. During the conversation he informed me that he had purchased the property from Vergil L. & Delores A. Owen. He also told me that Garlon Wallace had died and the widow, Gladys Wallace, has relocated to an unknown address in California

This information put a different slant on the request for Assignment of Permit. I discussed the situation with Jim Johnson and he said that we will accept the Notice of Change of Water Right Ownership form with a warranty deed showing title passing from Owen to Hedrick. We will provide the WRM17 Brief Report to Mr. Hedrick.

I called Chris Hedrick back and gave him that information and he was willing to accept the brief report in lieu of the Water Right License being reissued in his name. He said he will send the paperwork we need by UPS to us today.

RE: Assignment of Permit 47-08314

Dear Mr. Hedrick:

As we discussed by telephone this morning, I have enclosed an Assignment of Permit form for your convenience.

You can ignore the part of the assignment form asking for notarization of permit holders signature since the copy of the deed that you send will be acceptable documentation for the change of ownership.

I will be happy to reissue the water right license in your name upon receipt of the completed assignment of permit form and the \$25.00 filing fee.

If you have any questions regarding this matter, please call me at 208-327-7941.

RE: Returned Mail

=====

The license that was mailed to Garlon Wallace on 7-6-98 was returned today as not deliverable by the post office.

I looked back through the file and found the names of Christopher and Lisa Hedrick on the B/U Field Report listed as owner(s). There was no "flag raised" by the field examiner that the person claiming to be the current owner was not the same as the original owner or owner of record.

The license review checklist has a notation that no assignment was made to Hedricks. At least by this point in time had mention been made of the name difference we could have processed an assignment of permit, collected the filing fee and issued the license in the name of the **current** owner.

I called the phone number on the field report, talked to Mr. & Mrs. Hedrick's daughter. She gave me the work phone number for Mr. Hedrick. I spoke to him and explained what had happened. He told me that when he bought the property in June 1996 the realtor told him all the change of ownership processing had been taken care of. He wasn't too happy to find out that the license was in the name of Wallace but understands that we will update our database upon receipt of the completed Notice of Change of Water Right Ownership form.

Mr. Hedrick also was concerned about his rights to geothermal water on the property. I told him I would check the database for any information I could find regarding that.

RE: WATER RIGHT NO. 47-08314

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If an party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

JUL 23 1998

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

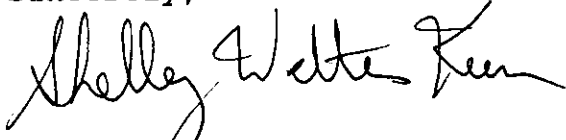

MICROFILMED

AUG 23 1999

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have any questions, please call me at 208-327-7946.

E. NARRATIVE/REMARKS/COMMENTS

The water for this permit is drawn from a well located in the SE 1/4 - SE 1/4 - SE 1/4 of section 32, township 8S, Range 14E. The water is drawn out of the well and travels in an underground pipe approximately 100 feet in a northwest direction to the northwest corner of the house located on the property. In the house the well empties into a pressure tank that distributes water as needed throughout the house. The lawn and all outside use of water uses the Banbury Pipe Line Company in which the owner has 1 share of water. There is a hookup to use hot water for heating from the hot water well of Johnny Kuest (licenses 47-07146 and 47-07263). However, there is no license allowing for the use of geothermal water for the Hedrick's place of use. Therefore, there is no valid water right for heating for this place of use and the heating use can not be developed until a valid water right has been obtained.

Therefore, the only use established for this permit is the domestic in house use of water for 4 people. There is no irrigation use or any other uses allowed by this permit.

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = \underline{\hspace{2cm}}$$

2. Volume Calculations for Other Uses:

Volume was calculated using the Rural and Domestic Water Uses table (exhibit 13) in the Field Examiner's Handbook. This table states that Residence - Rural: is 60 gallons per day per person.

$$60 \text{ gpd} \times 4 \text{ people} \times 365 \text{ days/year} = 87600 \text{ gpy} / 325850 = .27 \text{ afa}$$

PLEASE NOTE: The standard recommendation for in house use is .6 afa which will be used for this permit.

RECOMMENDATIONS:

I recommend that this permit be licensed under the following conditions:

1. That this water right be licensed for .03 cfs and annual consumptive use of .6 afa.
2. That this water right be licensed for domestic use only. All of the irrigation use for this property is done through the Banbury Pipe Line Company. There is no other use now being used for this place of use.
3. That this water right should not be used for heating of the house. The owners have the ability to develop hot water from another water right to heat their home, but do not have a valid right to use that water on their property. Therefore, the owners will have to acquire a new water right to use any hot water to heat the home.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 47-08314

Dear Permit Holder(s):

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

BRENDA L. MILLER
Water Resource Agent
