CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Irrigation use under this right is authorized only in connection with a domestic use.
6. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 4.0 afa per acre for the lands above.

RE: Returning Beneficial Use Field Report to the Region

=====

As we discussed yesterday, I am returning the field report for 47-08220 to you for clarification of the diversion capacity and diversion rate. It appears from the report that the attempt to quantify the diversion occurred in the drain/waste ditch (the source) as it passes through the field. It does not appear that the diversion into and through the gated pipe was measured or estimated in any way. I appreciate your offer to take a look at this one.

* Dells has re-done the exam and I have checked it over. It now appears to address your concerns expressed above. Thanks for working with us to improve our exams.

RE: Water Right No. 47-08220

Dear Water Right Holder(s):

Department water right records show that you divert water from the Snake River or its tributaries under a water right that has a priority date later than December 29, 1976. This is the priority of the established minimum stream flow of the Snake River at the Weiser Gage (Weiser) in the amount of 4,750 cubic feet per second.

Because of the continuing drought conditions in the Snake River Basin, department hydrologists project that during 1992, there could be periods when the required minimum flow will not be satisfied due to low flows of the Snake River. The department urges you to not divert at a higher rate than authorized by your water right and to not use your right in any manner different than authorized. In addition, when the minimum flow will not be satisfied or is not being satisfied, you are required to cease diverting water under your water right, because your right is of later priority than the minimum stream flow at Weiser.

If the department determines the minimum flow will not be satisfied, the department will advise you and will provide as much lead time as possible in requiring that you temporarily cease your diversion of water. The greatest likelihood for this to occur is during a period from mid-June to late June.

While the department expects good cooperation from junior water right holders, water users should be aware that Section 42-352, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversions of water.

The department has contacted both the Idaho Power Company and the U.S. Bureau of Reclamation with respect to the timing of storage releases from upstream reservoirs for flow enhancement purposes. This type of coordination could minimize the impact on

NOV 08 1995

existing water users and reduce the need to curtail diversions.

The department has scheduled public information meetings relative to this potential regulation as follows:

Mountain Home - June 4, 1992 - 10:00 a.m. - gymnasium at
North Elementary School, 290 E. 12th N.

Caldwell - June 4, 1992 - 7:00 p.m. - Ballroom in the
Student Union Building, Albertson College of Idaho,
2112 Cleveland

If you have questions concerning this letter or wish to provide the name of a different contact person or address to receive department correspondence, please contact the department.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

RE: PERMIT NO. 47-08220

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)734-3578.

Sincerely,

Rita Fleck

RE: PROOF OF BENEFICIAL USE SUBMITTAL

On April 18, 1990, the permit holder submitted a partially completed proof of beneficial use form with no fee. Due to a backlog of work, the proof was not given any attention until January 3, 1991 which was after the proof due date of December 1, 1990. On January 24, 1991, the department received an acceptable proof with a fee.

I recommend that there be no delay in priority since the permit holder was not timely notified that an acceptable proof was due (proof due notice) and that when asked for more information and fee, the permit holder responded timely.

Dear Mr. Goffin:

Re: Permit No. 47-8220

Returned is the proof of beneficial use form submitted to this office on April 18, 1990. The form is incomplete and therefore, not acceptable. (A large backlog has prevented me from attending to this matter sooner).

Since submitting this document, the form has been revised. Enclosed is a partially completed revised form. Please review, complete and submit this new one within 30 days. Note the instruction sheet to determine if a fee is required.

If you have questions, please contact me.

Sincerely,

Dear Doug:

The subject application submitted with your letter of July 17, 1989 has been reviewed. The diversion in the application is for waste water beyond the end of our system and should not interfere with operation of the Canal Company system.

The applicant should be aware that he establishes no right to the continued delivery of water by the Twin Falls Canal Company. The flow of waste water is dependent upon the practices of the irrigators upstream. There may or may not be water at the point of diversion in the future if irrigation practices change.

The applicant should also be aware that chemicals are used on an ongoing basis by the Canal Company for control of moss.

Any degradation of the water quality through use of water by the applicant is the responsibility of the applicant.

Very Truly Yours,

Jack H. Eakin

Re: Application for Permit No. 47-08220

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Times News on 8/3 & 8/10/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.
