CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right is for the use of trust water and is subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.

E. NARRATIVE/REMARKS/COMMENTS

A 6" well, with a 3.0 hp submersible pump & motor, diverts water to a large church complex for domestic use, & to 11 separate plots of lawn, trees & shrubbery for irrigation. There are eleven (11) separate parcels of lawn, trees & shrubbery which are irrigated mainly by Toro underground pop-up sprinkler systems. The total acreage irrigated is about 1.9 acres. The irrigation system can operate 15 sprinklers at capacity, at a flow rate of .12 cfs. The 2 small orchards on the property are irrigated by consl water. The church has 6 full-time employees. The average weekly church attendance is 600 people for Sunday services; there are also Sunday school, Bible study & Potluck meetings. Of the total property area of about 7 (seven) acres, mostly 5 acres are occupied by parking lots, drive ways, & the church buildings. The limits for rate of diversion (cfs) are .05 for domestic, as listed on the permit, & .06 for irrigation (.03 per acre). Calculation for instantaneous demand: $36 \text{ (total fixtures)} \times 1.1 \text{ gpm} = .09 \text{ cfs}$

Measured Method:

$$15 (\text{sprinklers}) \times 3.5 (\text{gpm}) = \frac{52.5}{449.0} = \underline{.12 \text{ cfs}}$$

$$Q_a = \frac{(3.0)(8.8)(0.2)}{\Sigma(2.31 \times 40) + 42'} = \frac{18.48}{134.4} = \underline{.14 \text{ cfs}}$$

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = (1.9)(4.0) = .7.6 \text{ gfa}$$

$$V_{D,R} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = (1.2)(214)(1.9835) = 50.9 \text{ fa}$$

$$V = \text{Smaller of } V_{I.B.} \text{ and } V_{D.B.} =$$

2. Volume Calculations for Other Uses:

Summary of Annual Volume:

Church: $600(\text{people}) \times 10(\text{gals.}) \times 52(\text{weeks}) = .96 \text{ afa}$

Sunday School: $300(\text{people}) \times 10(\text{yrs}) \times 52(\text{wcks}) = 156,000$

Bible Studies: $200^{(1)} \times 10^{(11)} \times 26^{(Bi-weekly)} = .16^{(1)}$

Pot lucks : $150(11) \times 10(11) \times 12(\text{months}) = .06(11)$

Full-time employees: $6 \times (25(11) \times 260(4045)) = .12 "$

PROOF DUE NOTICE

RE: PERMIT NO. 47-08205

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before March 1, 1993.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

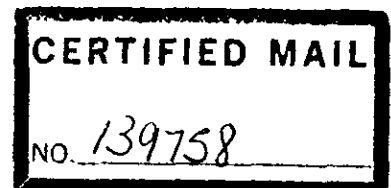

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

LOW-TEMPERATURE GEOTHERMAL MORATORIUM AREA
FROM: NORM YOUNG
RE: EXTENSION OF MORATORIUM

Enclosed is a copy of an order extending the order designating the Twin Falls Low-Temperature Geothermal Moratorium Area. I appreciated the attendance of many of the users at the public information meeting on this matter held in Twin Falls last week. I understood those in attendance favored an extension of the moratorium, and some of the users were encouraging that the size of the area be increased and that additional actions be taken to protect artesian pressures. I indicated at the meeting that the moratorium would be extended without modification to keep its continuity and that IDWR will schedule as time and resources permit a review of the following matters:

- Expansion of the area.
- The need for repair or reconstruction of wells in and adjacent to the area.
- Evaluate the adequacy of the agreement to manage pumpage to prevent withdrawal in excess of the average rate of recharge or to maintain artesian pressures in the public interest.
- Review need for and adequacy of monitoring programs.

With respect to monitoring, the data recorded by the USGS from the well at the Nazarene Church is an important part of the information now being collected. The Church will soon be finished and will be using water from the well. Data from an unused well is more reliable for evaluating aquifer conditions. USGS and IDWR are evaluating alternatives for replacing this source of data. If you are aware of a well that is finished into the low-temperature geothermal aquifer and is not being used, please call Loren Holmes, IDWR Regional Manager at Twin Falls, a call at 736-3033.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 47-08205

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

This permit authorizes the appropriation of trust water. Trust water is defined as that portion of a particular hydropower water right which exceeds certain minimum stream flows established by state action, and is held in trust by the State of Idaho for the use and benefit of the people within the state. Conditions pertaining to a term review, annual use fee and jurisdiction of the permit are trust water conditions.

RE: APPLICATION FOR PERMIT NO. 47-8205

Dear APPLICANT:

Due to the Swan Falls litigation, Department approval of the enclosed application may have been delayed. The Department is presently reviewing your application and may authorize the proposed development.

The purpose of this letter is to determine: (1) if you are still interested in developing the project, and (2) the extent of development, if any, that has already occurred under the application. Enclosed are two forms requesting information which will help the Department expedite the processing of the application.

1. If you have abandoned or have no interest in continuing with your plans for development of the project, please complete the enclosed withdrawal form and return it to the Department. If you request a withdrawal of the application and the application was not previously advertised, the department will refund your original filing fee.

2. If you wish to continue with your proposed development plans, or have completed all or a portion of the proposed development before October 1, 1984, then you must complete and return the enclosed questionnaire. You may use the questionnaire and enclosed application to make any comments &/or amendments concerning the application. Your completion of the questionnaire will expedite processing and help the department determine if the water diverted under the application is public water or trust water. Approved trust water applications may be subject to additional conditions.

Failure to return either of the above forms within thirty (30) days of the date of this letter is cause for the Department to void the application.

Please be further advised that if any undeveloped portion of your proposed project is greater than 200 acres, or if the application proposes diversion of more than 5.0 cfs, the department will issue a notice requesting additional information as required by Water Appropriation Rule 4,5. (copy enclosed). In particular, rules 4,5,3. through 4,5,3,5. apply to your project if it is more than 200 acres. If necessary, the rule 4,5. information notice will be sent to you after you return the questionnaire.

Re: Application for permit No. 47-08205

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

Because your application proposes to appropriate water which has been identified as "trust water" in the Swan Falls agreement, it will be processed under rules and regulations for water appropriation that have been adopted as required by law.

Under the rules, applications will be processed at a rate which allows development of 20,000 acres per year. The oldest applications will be processed first, provided that applicants are willing and able to proceed.

For this reason, it is not possible to estimate at this time when action will be taken on your application.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.
Water Resources Engineer
