POP-A-WAY®

Full or Part Circle

Impact Rotor Pop-up Sprinkler

Operating Range

Precipitation Rate:
.33 to .57 inches per hour
Spacing: 38 to 49 feet
Pressure: 30 to 50 psi

Features

- 2½" pop-up height
- Proven impact drive
- Straight-through flow
- Full circle or adjustable arc 20° to 340°
- Die-cast Precision Jet tube (PJ™)
- Wiper seal
- Positive sprinkler pop-down
- FP trip for full or part circle operation
- Side or bottom inlet
- Easy to service
- High strength plastic case

Specifications

- ¾" female threaded inlets
- Overall height - 10¼"
- Top diameter - 6½"
- For standard nozzle at 40 psi, the highest point of stream is 8' above nozzle at 29' from sprinkler. (Distance control deflector is completely out of stream.) Nozzle outlet trajectory is 25°

UNCLASSIFIED

OCT 21 1993

State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 47-08163

Priority: December 5, 1988 Maximum Diversion Rate: 0.09 CFS
Maximum Diversion Volume: 12.0 AF

This is to certify, that DAVID S KIESIG
VICKI L KIESIG

3983 N 3600 E
KIMBERLY ID 83341

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated December 5, 1988; and has submitted Proof of Beneficial Use on May 15, 1991. An examination indicates that the works have a diversion capacity of .090 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/01 to 10/31	0.09 CFS	12.0 AF

LOCATION OF POINT(S) OF DIVERSION: NENE , Sec. 9, Township 10S, Range 18E
TWIN FALLS County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
10S	18E	9	NENE	3		3

Total number of acres irrigated: 3

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 4.0 afa per acre for the lands above.
6. Irrigation use under this right is authorized only in connection with a domestic use.

OCT 21 1993

State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 47-08163

This license is issued pursuant to the provisions of Section 42-219, Idaho Code.
Witness the seal and signature of the Director, affixed at Boise, this 21st
day of OCTOBER, 1993.

2. Measurements: The average pressure in the line with 7 1511B Pop-a-Way Rainbirds with 5/32" nozzles was 30 psi.

307 2 1 1991

E. NARRATIVE/REMARKS/COMMENTS

This water system is somewhat unique. It waters about $2\frac{1}{3}$ acres with a drip system for trees & $\frac{2}{3}$ of an acre for pasture grass. A 3 H.P. submersible pump accomplishes this through a 6" well. The $\frac{1}{2}$ " mainline runs from the well to two hydrants. Another branch runs to the home & continues along until it reaches the pasture. All of the trees are watered from the hydrants. The owner hooks up a $\frac{5}{8}$ " hose from the hydrant to various $\frac{1}{2}$ " hoses with drippers. The owner runs a maximum of 900-1000 drippers at one time. The hoses have anywhere between 30-50 drippers on each one; depending on the length of the hose. The drippers are rated to produce 1 gph.

The irrigation system for the pasture consists of 3 different buried lines with either Maxi-Paw Rainbird or 1511B Rainbird pop-a-way heads. The Maxi-Paw had $\frac{1}{8}$ " nozzle diameters while the 1511B had $\frac{5}{32}$ " nozzle diameters.

I measured the average nozzle pressure in a buried line with 7 1511B hds running to be 30 psi. Also, the drip system was running 900 drippers at the time.

The owner recently had his pump changed so he knew the water level was at 152', the pump was set at 189', & the well depth was 300'. No well log was available for this well.

This information corresponded to the area's wells.

This well also supplies water for domestic use & 14 sheep, 4 pigs, $\frac{1}{2}$ horses. = #47-11970

MEMORANDUM

DATE: JULY 31, 1992

TO: WATER RIGHT HOLDERS AND APPLICANTS IN TWIN FALLS
LOW-TEMPERATURE GEOTHERMAL MORATORIUM AREA

FROM: NORM YOUNG

RE: EXTENSION OF MORATORIUM

139392

Enclosed is a copy of an order extending the order designating the Twin Falls Low-Temperature Geothermal Moratorium Area. I appreciated the attendance of many of the users at the public information meeting on this matter held in Twin Falls last week. I understood those in attendance favored an extension of the moratorium, and some of the users were encouraging that the size of the area be increased and that additional actions be taken to protect artesian pressures. I indicated at the meeting that the moratorium would be extended without modification to keep its continuity and that IDWR will schedule as time and resources permit a review of the following matters:

- Expansion of the area.
- The need for repair or reconstruction of wells in and adjacent to the area.
- Evaluate the adequacy of the agreement to manage pumpage to prevent withdrawal in excess of the average rate of recharge or to maintain artesian pressures in the public interest.
- Review need for and adequacy of monitoring programs.

With respect to monitoring, the data recorded by the USGS from the well at the Nazarene Church is an important part of the information now being collected. The Church will soon be finished and will be using water from the well. Data from an unused well is more reliable for evaluating aquifer conditions. USGS and IDWR are evaluating alternatives for replacing this source of data. If you are aware of a well that is finished into the low-temperature geothermal aquifer and is not being used, please call Loren Holmes, IDWR Regional Manager at Twin Falls, a call at 736-3033.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 47-08163

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)734-3578.

Sincerely,

Rita Fleck
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 47-08163

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before July 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

RE: PERMIT NO. 47-08163

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of

RECEIVED

AUG 21 1989

Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

GARY SPACKMAN, Supervisor
Water Right Permits Section

Re: Application for Permit No. 47-08163

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Times News on 4/6 & 4/13/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

James E. Stanton
Sr. Water Resource Agent
