CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 47-8085, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before September 1, 19 90.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other:

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Irrigation use under this permit is authorized only in connection with a domestic use.

This permit is subject to the agreement dated 7/19/88 between permit holder and protestant(s) to the extent such agreement covers matters within the jurisdiction of the Department of Water Resources.

Use of water under this permit is supplemental to all existing water rights with the same purpose and place of use.

MEMORANDUM

TO: File 47-8085
FROM: Sharla

RE: Conditions of Approval

This permit, when approved, contained a condition authorizing irrigation use only in connection with a domestic use. While the permit identified domestic use, no domestic unit was found by the examiner.

The irrigated place of use receives water from Twin Falls Canal Co. during the normal irrigation season. The application stated that the groundwater would be used prior to and after the water was delivered by the canal company. This is further confirmed by the periods of use requested in the application - 2/1 to 4/15 and 10/1 to 11/30. A condition stating that this permit was supplemental to all existing water rights was also added.

After considering the above, it appears that the condition requiring the irrigation use to be connected to a domestic use was inappropriate. A license should be issued for the irrigation use and the condition showing this right as supplemental will be carried forward to the license.

Re; 47-8085

Dear Mr. & Mrs. Wright

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

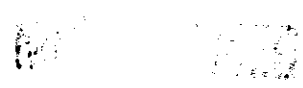

Field examinations must be done while the system is in operation. For this reason we concentrate on irrigation permits during the summer months and do examinations on permits for other uses during the non-irrigating months.

If you have any questions regarding the field examination, please contact our office.

Very truly yours,

Lloyd Payne

The approval of this permit authorizes the construction of a well as described on this application subject to the conditions on this permit.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. The permit holder or his representative shall notify the Department ten (10) days prior to the start of construction unless good cause for later notification can be shown.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.

Dear Mr. Wright:

Re: Permit No. 47-8085

The department recently received the proof of beneficial use for this permit and as a matter of practice, I coordinated the water right file, the drilling permit and well driller's log together. Upon review of these documents, I find a discrepancy between the drilling permit and proof.

The well drilling permit indicates that the well is for domestic purposes only. The proof indicates water is being used for domestic and irrigation of three acres. Since the drilling permit is for other than domestic use, you must now pay the difference between the fee for domestic use and the fee for other uses. That fee is \$90.

Please return the \$90 fee within thirty days.

If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

RITA I. FLECK

ACTION OF IDWR

(X) Approved () Denied

The approval of this permit authorizes the construction of a well as described on this application subject to the conditions on this permit.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards..
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. The permit holder or his representative shall notify the Department ten (10) days prior to the start of construction unless good cause for later notification can be shown.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

SUBJECT *Processing of Application*

The irrigation use in this application is for watering a commercial tree nursery when the regular supply of canal water is not available.

The land watered is not a "residential lot" as defined under the 1180 Contract, but the application was processed with the theory that the use is DCMR under the Contract.

RE: Application for Permit #47-8085

Dear Mr. Holmes:

I want to address each of the items of consideration for our application one by one:

(A) Will the proposed use reduce the quantity of water under existing water rights?

Response: It is our intent to use a maximum of 40 GPM from our 5 hp pump. This will be only in early Spring or late Fall. We don't need water during the time the city or other irrigators are pumping.

Also the city pump is set at 350' and ours is at 270'. I see no way that our well could affect the city water. Please see the enclosed letter from Ken Story, City of Kimberly Public Works Supervisor.

(B) Is the water supply insufficient for the purpose intended?

Response: There is ample water. The city hole is 730' deep with water standing at 195' and has never pumped itself dry.

Our well is 310' with water standing at 170' and draws down to 210' after one hour of pumping, then remains constant.

(C) Is the application made in good faith or for delay or speculative purposes?

It is our intent to use the water for early Spring and late Fall occasional watering of some trees and turf on our farm, and for a sod farm manager residence to be constructed in the future.

(D) Has the applicant sufficient financial resources with which to complete the project?

DEC 07 1988

Response: Yes, we are in our 81st year of growing trees and horticultural projects in the Kimberly area and are listed in Dun & Bradstreet with the highest classification given to a business our size. Our DUNS #06-331-3209.

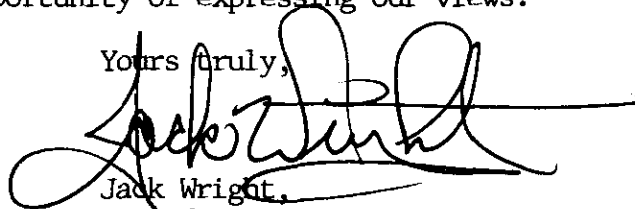

(E) Will the proposed use conflict with local public interest?

Response: To the best of our knowledge, all of our neighbors are very pleased to live next to a tree and sod farm.

It is my opinion that this project is only a political issue. I was instrumental in getting Mrs. Jones' husband recalled from the position of Mayor for unprofessional conduct of a public official. The Jones' and a handful of their supporters will from that time on be opposed to anything I want to do or propose, but that's life.

Thank you for the opportunity of expressing our views.

Yours truly,

Jack Wright,
President

Dear Mr. Wright,

In reference to your request for information concerning the specifications of the City of Kimberly's well # 3, I submit to you the following data extracted from our records.

Well # 3 - NW 1/4 of SE 1/4 of NW 1/4; SEC.28, TOWNSHIP 10 S, RANGE 18 E, B.M. Twin Falls County.

Water Right Number - 47-7306

Diversion rate .620 CFS (Reapplied April 1988 for an increase to 1.020 CFS, I.D. #47-8091).

Hole Diameter - 20 inch 1 ft. to 330 ft.
12 inch 330 ft. to 660 ft.
10 inch 660 ft. to 730 ft.

Casing - 40 ft. of 20 inch.

Static Water Level - 195 ft.

Pumping Water Level - 220 ft.

Bowl Setting - 350 ft.

Water Quality - Good - 72 Degrees - Sandy.

Your well, drilled to 310 feet, bowl setting at 270 feet and pumping only .1 CFS should have no effect on City well # 3. We seldom use our well in the months of October through April, which I understand would be the time you would be using yours.

Very Truly Yours

On March 28, 1988, Jack Wright, applicant, filed with the Department of Water Resources an application to appropriate the public waters of the State of Idaho. On April 27, 1988, the Department received a protest against the approval of said application from Margaret Jones.

The Department has set the matter of protest for conference and/or hearing for Tuesday, July 19, 1988, at 10:00 AM in the Twin Falls City Hall Council Chambers, 321 2nd Ave. East, Twin Falls.

The hearing will be held in accordance with chapter 2, Title 42 of the Idaho Code and the adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded to all parties to respond and present evidence and argument on all issues involved.

Dated this 6 day of July, 1988.

Re: Application for permit No. 47-8085

Dear Mr. Wright:

Enclosed is a copy of a protest filed against the issuance of a permit pursuant to your above referenced application. The Department suggests you contact the protestant directly in an effort to determine nature of the protest and to attempt to resolve the protest.

This office is tentatively scheduling the matter of protests for conference and/or hearing for July 19, 1988. Notices giving the time and place for the hearing will be mailed about July 6.

At such a conference and/or hearing, the following are the principal items the Department can consider in either approving or denying an application for permit (Section 42-203, IDAHO CODE):

- 1) Will the proposed use reduce the quantity of water under existing rights?
- 2) Is the proposed water supply insufficient for the purposes intended?
- 3) Is the application made in good faith or for delay or speculative purposes?
- 4) Has the applicant sufficient financial resources with which to complete the proposed project?
- 5) Will the proposed use conflict with the local public interest?

Dear Mr. Holmes:

I wish to protest the above mentioned Application for fear his irrigating from his well will endanger the water level in our well East of his well and as a citizen of Kimberly for protection of the city wells in that area.

Sincerely,

Margaret Jones

Re: Application for Permit No. 47-8085

Dear Mr. Wright:

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned identification No. 47-8085. Please refer to this number in all further correspondence.

This office will be advertising the application in the Times News on 5/5 & 5/12/88. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Loren O. Holmes, P.E.
Southern Region Manager
