Permits will be subject to
all prior water rights. Pro-
tests may be submitted
based on the criteria of
Sec. 42-203A, Idaho Code
and/or the public interest
criteria of Sec. 42-203C,
Idaho Code. Protests must
be filed with the Director,
Dept. of Water Resources,
Statehouse Mail, Boise,
Idaho 83720 on or before
JANUARY 21, 1991.

R. KEITH HIGGINSON,
Director

PUBLISH: Thursday, Jan-
uary 3 and 10, 1991.

Affidavit of Publication

STATE OF IDAHO

COUNTY OF TWIN FALLS } SS.

No 21925

I, Linda Capps McQuinn being first duly sworn upon oath, depose
and say that I am Bruce Clark of the TIMES-NEWS, published daily, at
Twin Falls, Idaho, and do solemnly swear that a copy of the notice of advertisement, as per
clipping attached, was published in the regular and entire issue of said newspaper, and not in
any supplement thereof, for Two consecutive weeks,
commencing with the issue dated January 3, 1991,
and ending with the issue dated January 10, 1991.

And I do further certify that said newspaper is a consolidation, effective February 16, 1942, of the Idaho
Evening Times, published theretofore daily except Sunday, and the Twin Falls News, published theretofore daily ex-
cept Monday, both of which newspapers prior to consolidation had been published under said names in said city and
county continuously and uninterruptedly during a period of more than twelve consecutive months, and said TIMES-
NEWS, since such consolidation, has been published as a daily newspaper except Saturday, until July 31, 1978, at
which time said newspaper began daily publication under said name in said city and county continuously and
uninterruptedly.

And I further certify that pursuant to Section 60-108 Idaho Code, Thursday of each week has been designated
as the day on which legal notice by law or by order of any court of competent jurisdiction within the state of Idaho,
to be published weekly, will be published; and that at the head of the editorial column of said combined newspapers,
and in each issue thereof, Thursday is announced as the day on which said legal notices will be published.

STATE OF IDAHO
COUNTY OF TWIN FALLS

On this 10 day of January in the year of 1991, before me,
a Notary Public, personally appeared Linda Capps McQuinn,
known or identified to me to be the person whose name subscribed to the within instrument, and being by me first
duly sworn, declared that the statements therein are true, and acknowledged to me that he executed the same.

Heva R. Feltman
Notary Public for Idaho

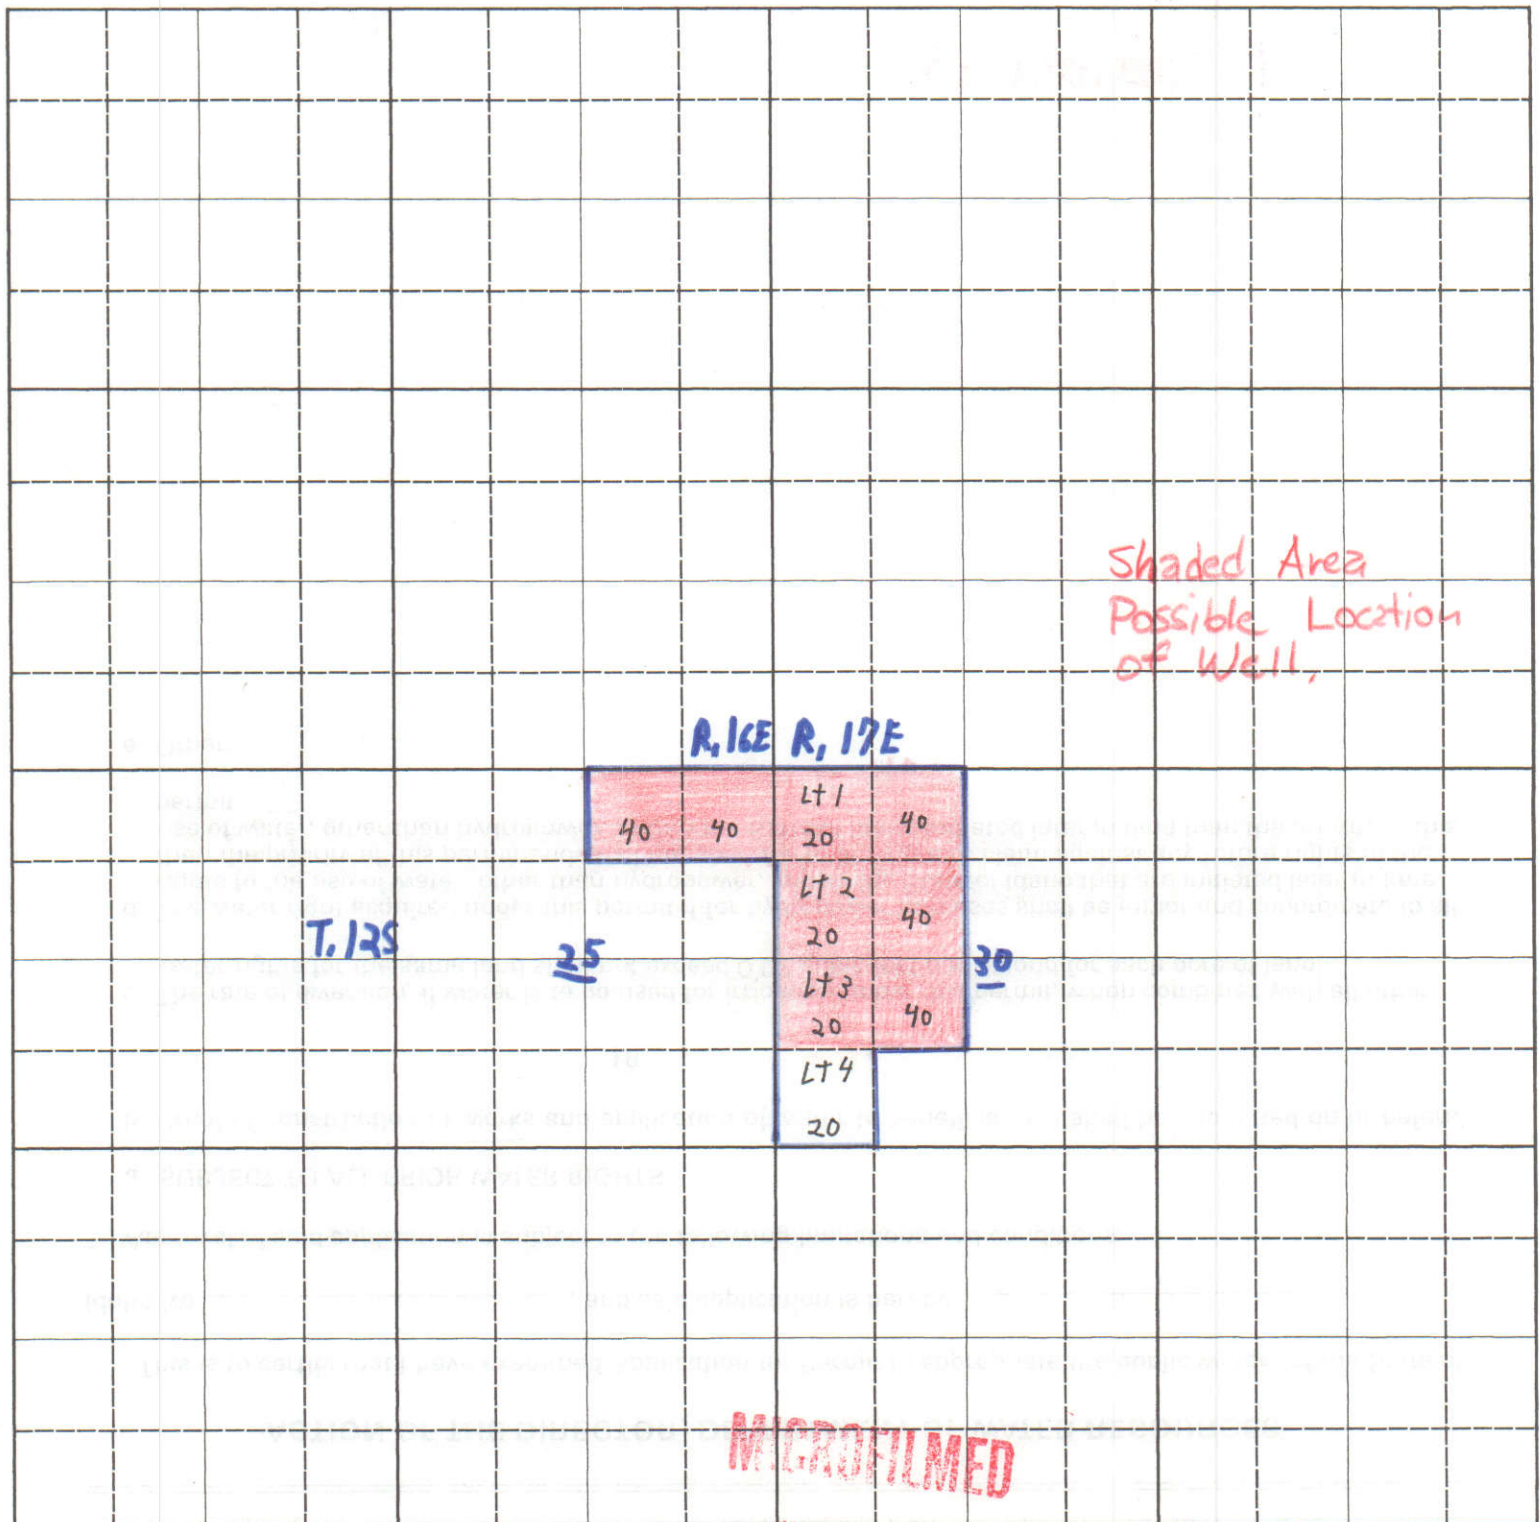

Residing at Twin Falls County

My commission expires: 5/19/94

JUN 25 1991

OK
1-15-91

13. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

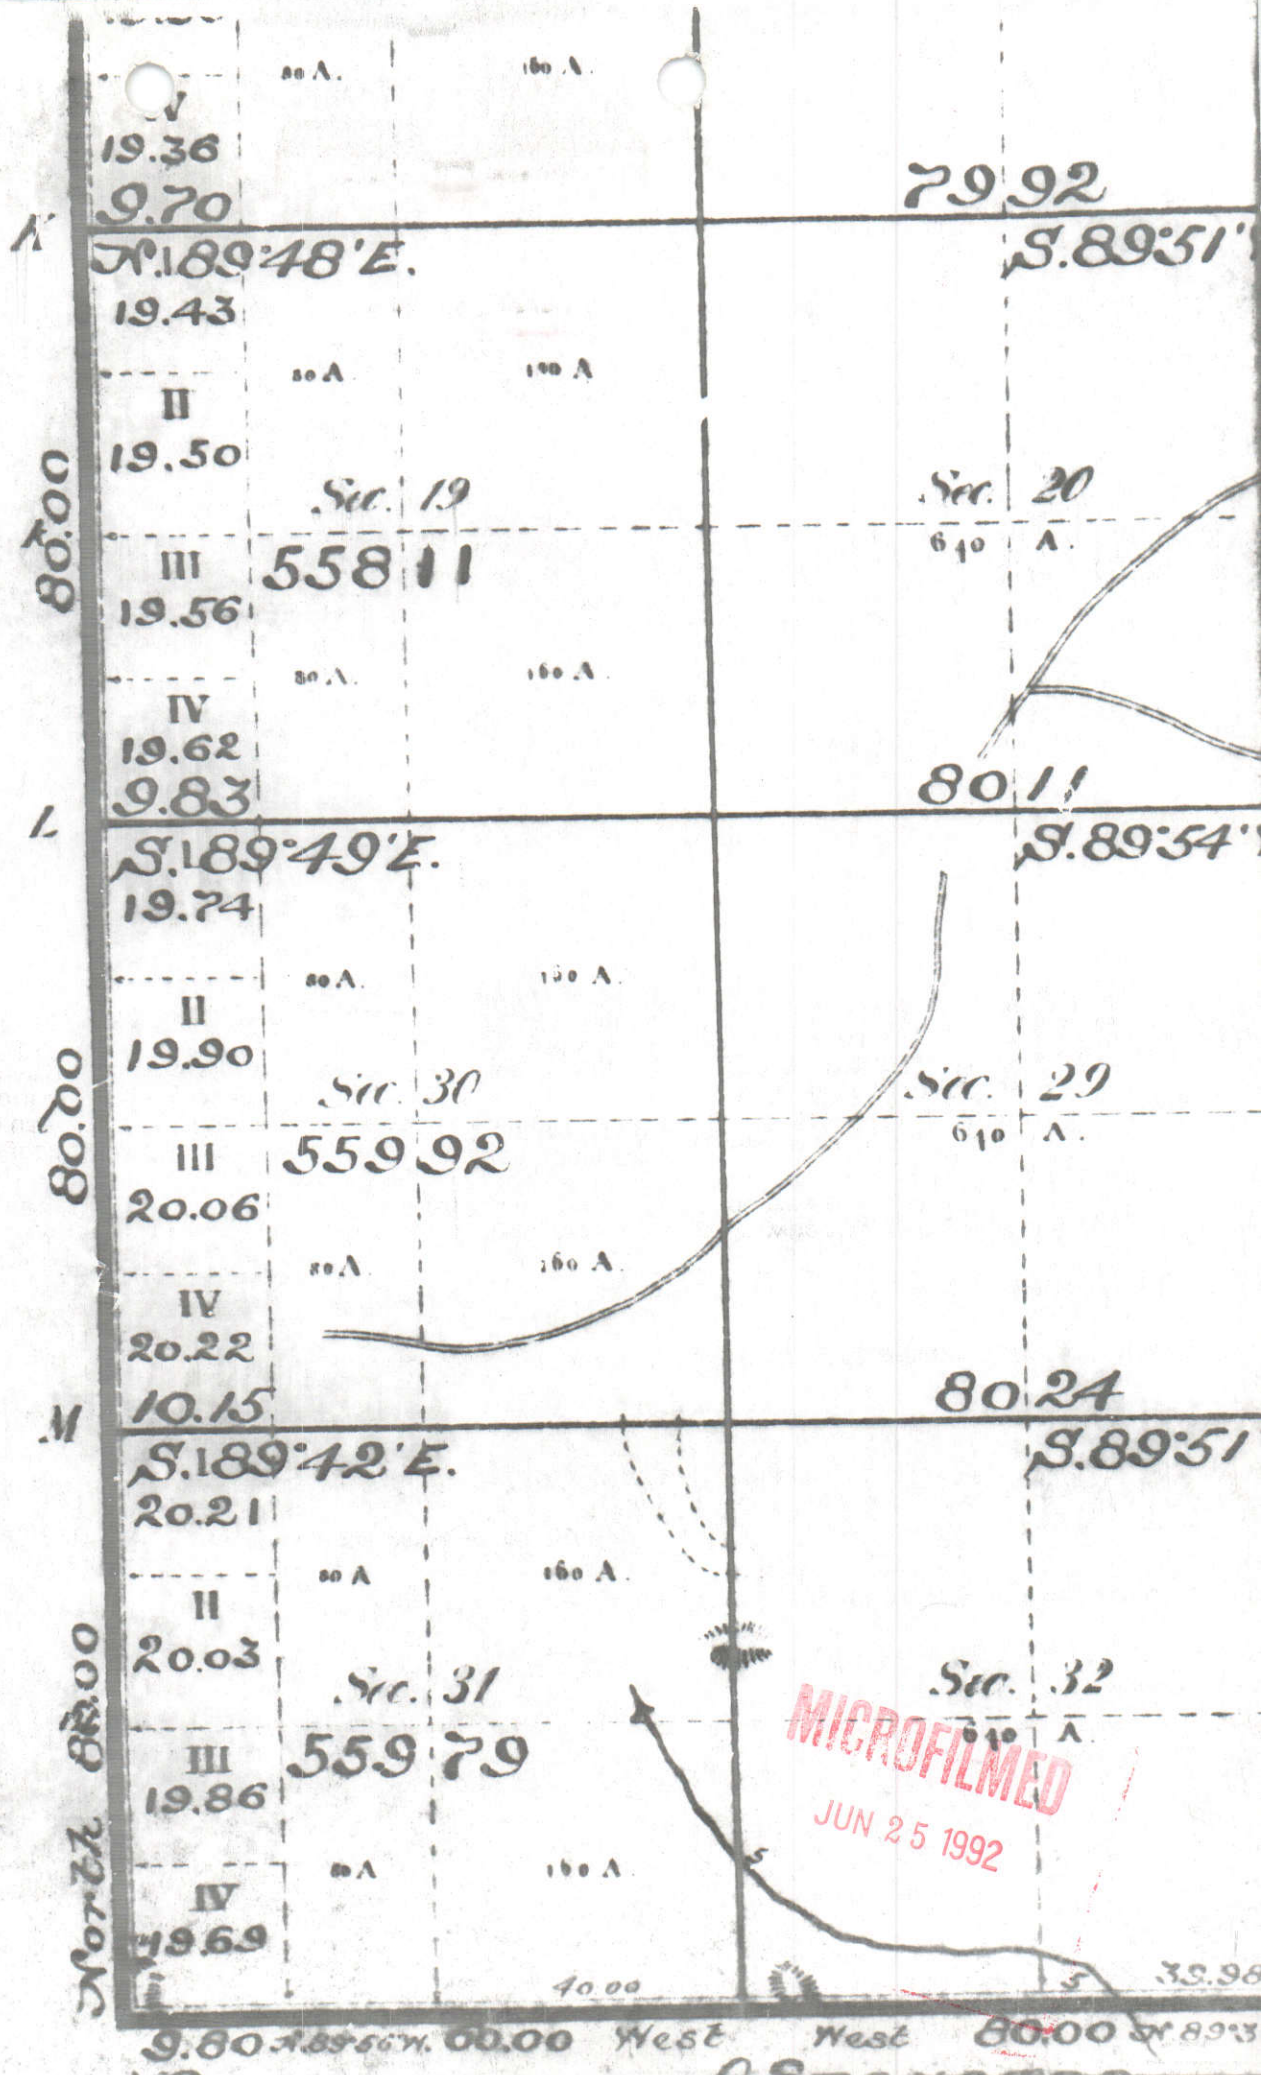

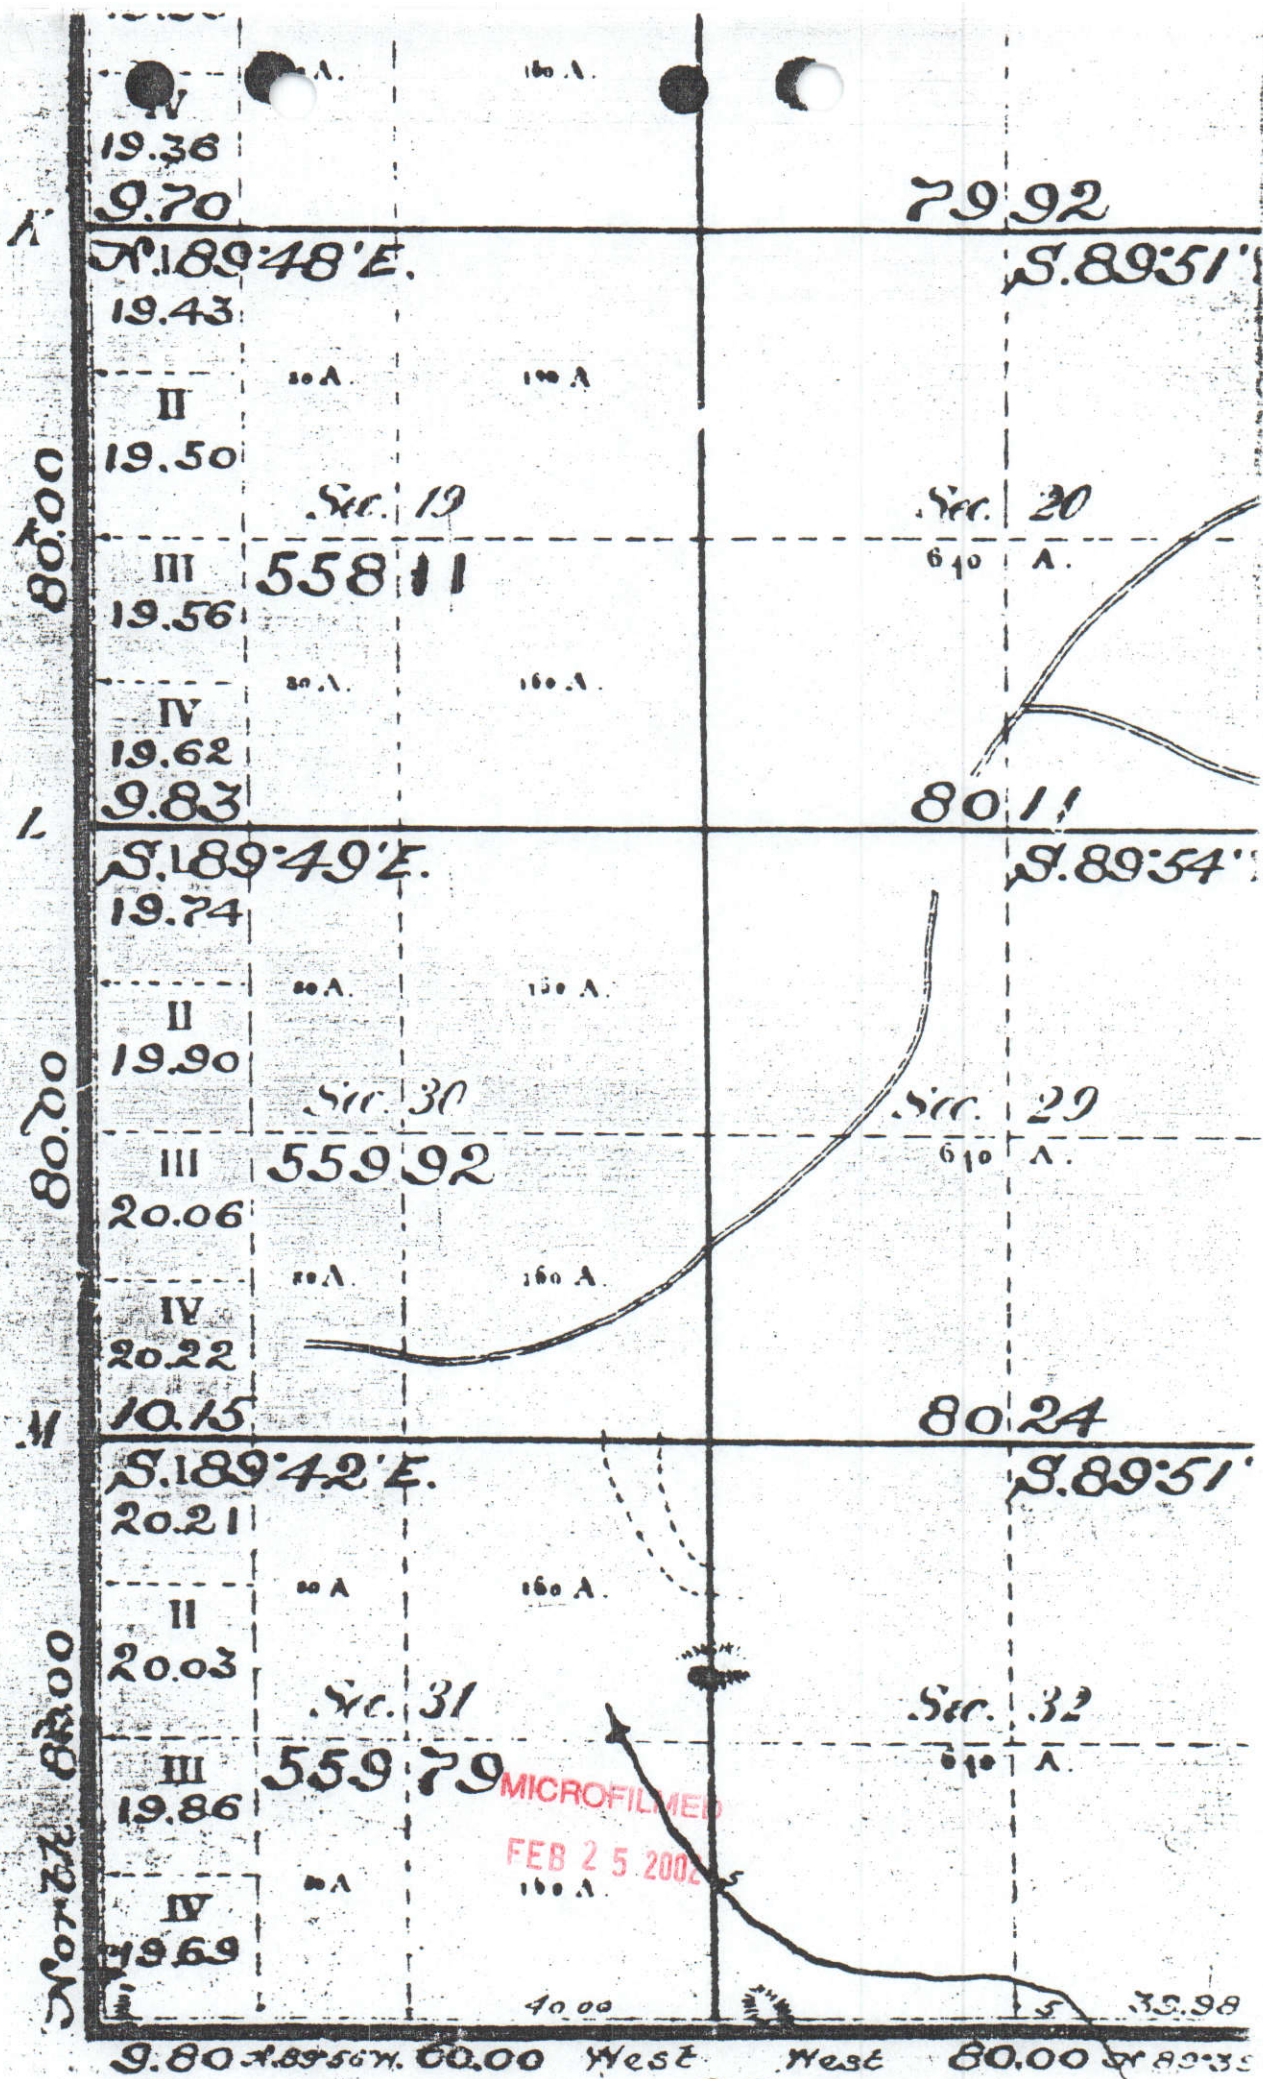

Scale: 2 inches equal 1 mile.

REPROFILMED
JUN 25 1992

State of Idaho
Department of Water Resources
Water Right License

WATER RIGHT NO. 47-08075

Priority: December 21, 1987

Maximum Diversion Rate: 1.30 CFS

It is hereby certified that JOHN D COURTNEY
2664 E 2400 N

TWIN FALLS ID 83301 has complied with the terms and

conditions of the permit, issued pursuant to Application for Permit dated December 21, 1987; and has submitted Proof of Beneficial Use on June 15, 1995. An examination indicates that the works have a diversion capacity of 1.3 cfs of water from:

SOURCE

GROUND WATER

and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>DIVERSION RATE</u>	<u>ANNUAL DIVERSION VOLUME</u>
IRRIGATION	3/15 to 11/15	1.30 CFS	

LOCATION OF POINT(S) OF DIVERSION:

GROUND WATER NE¼NW¼NE¼ Sec. 25, Twp 12S, Rge 16E, B.M.

TWIN FALLS County

GROUND WATER SW¼NE¼SW¼ Sec. 30, Twp 12S, Rge 17E, B.M.

TWIN FALLS County

PLACE OF USE: IRRIGATION

Total Acres: 214

CONDITIONS OF APPROVAL

1. This right is for the use of trust water and is subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.
2. This right is limited to the irrigation of 200 acres within the place of use described above in a single irrigation season.
3. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right.

MICROFILMED
FEB 25 2002

State of Idaho
Department of Water Resources
Water Right License

WATER RIGHT NO. 47-08075

4. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
5. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 800 af at the field headgate for the 200 acres authorized to be irrigated under this right.
6. This right when combined with all other rights shall provide no more than 4.0 afa per acre at the field headgate for irrigation of the lands above.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed and sealed this 30th day of November, 2001.

REQUEST FOR EXTENSION OF TIME

TO PROVIDE ADDITIONAL TIME IN WHICH TO SUBMIT PROOF OF
BENEFICIAL USE FOR A WATER RIGHT PERMIT

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time under the provisions of Section 42-204, Idaho Code in which to complete development of a water right.

RECEIVED

Permit No. 47-08075

MAR 28 1995

Name(s) of Permit Holder: John D. Courtney Department of Water Resources

Mailing Address: 2664 E 2400 N Twin Falls, ID 83301

Date Proof is Due: 7-1-95 Telephone No. 655-4329

Describe what work has been completed toward the development of this water right:
(This must be filled out! If no work has been completed, show "none".)

Four wells have been drilled ranging in depth from 250 feet to 800'. Partial water has been found.

Costing \$ 21,000

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Unable to complete project because time is too short. Monetary shortage because of \$30,000 1994 Salmon River Canal Co water assessment for payment of lawsuit.

Permit holder(s) request an extension to July 1, 19 97.

FEE: \$50.00

(Signature)* John D. Courtney

*If other than permit holder, Power of Attorney must be supplied.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

IT IS HEREBY ORDERED that the above request for extension of time be DENIED since the department is not authorized to grant additional extension requests.

Signed this 28th day of April, 19 95.

RECORDED & INDEXED

JUN 25 1992

BEFORE THE DIRECTOR OF THE DEPARTMENT
OF WATER RESOURCES OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATION FOR PERMIT
TO APPROPRIATE WATER NO. 47-8075 IN THE NAME
OF JOHN D. COURTNEY

ORDER ISSUING
PROPOSED MEMORANDUM
DECISION

R. Keith Higginson, Director of the Department of Water Resources, having reviewed the attached proposed decision prepared by this appointee, Gary Spackman, who conducted the hearing or who has read the record in this case, hereby approves the same as a proposed decision pursuant to Idaho Code, Sec. 67-5211.

Each party to these proceedings who appeared at the hearing is given the opportunity, pursuant to Idaho Code, Sec. 42-1701A and 67-5211, to file exceptions to the proposed decision and to present briefs and oral arguments. If no timely and proper exceptions are received, an order by the Director will be entered adopting the proposed decision as his final decision.

I.
EXCEPTIONS

A. To be considered by the Director, exceptions must:

1. be received by the Director on or before the 15th day following the day of service of this Order and the proposed decision,

2. specifically identify the portions of the proposed decision to which exceptions are made and specifically state the grounds for those exceptions, and

3. be sent to each of the parties who appeared or their attorneys.

II.
BRIEFS

A. Any briefs in support of exceptions to the proposed decision shall be filed with the Director at the same time that party's exceptions are filed with the Director.

B. All response briefs to the exceptions must be filed with the Director within 15 days after the exceptions were served upon the responding party.

[Handwritten signature]

JUN 25 1992

III.

A. No oral arguments before the Director on the proposed decision will be held unless specifically requested by a party filing exceptions to the proposed decision and unless that request is filed with the Director concurrently with the filing of that party's exception.

B. If oral arguments have been properly requested by a party filing exceptions, any other party, upon reasonable notice to the Director, shall have the right to present oral argument in response to the exceptions filed.

C. Oral arguments before the Director on exceptions to the proposed decision shall be heard at the discretion of the Director, pursuant to Idaho Code, Sec. 42-1701A. If oral arguments are to be heard, the Director will, within a reasonable time, notify each party of the place, date and hour the oral arguments will take place and of the period of time allocated for the arguments of this case. Unless the Director orders otherwise, all oral arguments shall be heard in Boise, Idaho.

IV.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and other matters filed with the Director in connection with the proposed decision shall be served on all other parties to these proceedings in accordance with Rule 7.2.

V.

FINAL DECISION

Following the submission of all exceptions, briefs and oral arguments, if they are heard, the Director shall issue a final decision adopting, modifying or rejecting and replacing the proposed decision. Copies of the decision and order shall be served on all parties.

Dated this 22nd day of May, 19 91.

R. KEITH HIGGINSON
Director

MICROFILMED

JUN 25 1992

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATION FOR PERMIT	)	
	)	
TO APPROPRIATE WATER NO. 47-8075 IN THE	)	PROPOSED MEMORANDUM
	)	DECISION AND ORDER
NAME OF JOHN D. COURTNEY	)	
	)	

This matter having been heard by a hearing officer appointed by the Director of the Department of Water Resources, the Department proposes the following findings, conclusions and order:

FINDINGS OF FACT

1. John D. Courtney filed application for permit no. 47-8075 on December 21, 1987. The application proposes the diversion of 2.0 cubic feet per second for the irrigation of 280 acres. If approved, supplement ground water will surface water diverted from Salmon Falls Creek Reservoir.

2. The timing of processing of the application was in accordance with the policy and implementation plan for processing Swan Falls trust water filings.

3. The applicant amended his application, reducing the number of acres proposed for irrigation from 280 acres to 200 acres. The latest application for permit, as amended, proposes one well within each of eight legal subdivisions defined in the place of use.

4. The application was protested by Jones Corporation.

5. A hearing was conducted on April 10, 1991. The applicant appeared representing himself. Jones Corporation was represented by Roger Jones.

6. Roger Jones alleged that the applicant's proposal would injure water rights held by Jones Corporation, and also alleged that the water supply is insufficient for the purpose sought.

7. The proposed wells will be drilled at least two miles north of the location of any of the Jones Corporation wells. Water withdrawn from the Jones Corporation wells for irrigation is low temperature geothermal water.

MICROFILMED

JUN 25 1992

8. Courtnay is not seeking to appropriate low temperature geothermal water, but is seeking to intercept cold water with his wells. Courtnay testified that the cold wells in the area have a temperature of approximately 65 degrees.

9. A hot water well is located approximately one-half mile south of the location where Courtnay plans to drill his wells. This well, located near Nat-Soo-Pah Spring, is the nearest warm water to the proposed wells.

10. Roger Jones testified that withdrawals of water from the Nat-Soo-Pah well have affected the water levels in earlier-in-time Jones Corporation low temperature geothermal wells. Other exploration in the vicinity of the Jones Corporation wells, particularly wells drilled and used by the City of Hollister, has reduced the water levels in the Jones Corporation wells. Initially, the Jones Corporation wells free flowed with artesian pressure prior to additional use of the low temperature geothermal water in the area.

11. Both parties testified that ground water moves generally in a northwesterly direction. The wells proposed by Courtnay are located due north of the Nat-Soo-Pah wells and the Jones Corporation wells.

12. All wells in the area appear to be either cold water wells of approximately 60-70 degree temperature, or warm water wells with temperatures in excess of 90 degrees. No wells with temperatures in the intermediate range have been found.

13. The applicant established that the application is not filed for purposes of speculation and delay.

14. The applicant has the financial ability to construct the proposed project.

15. Except for the first two criteria regarding injury and sufficiency of water, there were no public interest issues identified.

16. Water diverted would be applied efficiently to the land by sprinkler system.

17. John Courtnay testified that members of his family have not experienced substantial fluctuation in the cold water wells they own. He does not recall any general decline in water levels, except those that might be associated with drought periods.

CONCLUSIONS OF LAW

1. Idaho Code § 42-203A(5) states as follows:

RECORDED

JUN 25 1992

The director of the department of water resources shall find and determine from the evidence presented to what use or uses the water sought to be appropriated can be and are intended to be applied. In all applications whether protested or not protested, where the proposed use is such (a) that it will reduce the quantity of water under existing water rights, or (b) that the water supply itself is insufficient for the purposes for which it is sought to be appropriated, or (c) where it appears to the satisfaction of the director that such application is not made in good faith, is made for delay or speculative purposes, or (d) that the applicant does not have sufficient financial resources with which to complete the work involved therein or (e) that it will conflict with the local public interest where the local public interest is defined as the affairs of the people in the area directly affected by the proposed use, or (f) that it is contrary to conservation of water resources within the State of Idaho; the director of the department of water resources may reject such application, refuse issuance of a permit therefor, or may partially approve and grant a permit for a smaller quantity of water than applied for, or may grant a permit upon conditions.

2. Rule 4,4,2,1. of the Water Appropriation Rules and Regulations states that the applicant shall bear the initial burden of coming forward with evidence of the evaluation of criteria (a) through (d) of Idaho Code § 42-203A.

3. Rule 4,4,2,2. of the Water Appropriation Rules and Regulations states that both the applicant and the protestant have the burden of coming forward with evidence regarding local public interest of which they are each most cognizant.

4. The local public interest criterion of Idaho Code § 42-203A(5) is defined by Rule 5,1,5. of the Water Appropriation Rules and Regulations to include, but not to be limited to:

The effect the project will have on the economy of the local area affected by the proposed use as determined by the employment opportunities, both long and short term, revenue changes to various sectors of the economy, short and long term, and the stability of revenue and employment gains;

The effect the project will have on recreation, fish and wildlife resources in the local public area affected by the proposed use;

Compliance with applicable air, water, hazardous substance standards, and compliance with planning and zoning ordinances of local or state government jurisdictions.

5. Rule 4,4,3. of the Water Appropriation Rules and Regulations states that the applicant has the ultimate burden of

JUN 25 1992

persuasion for all of the criteria of Section 42-203A, Idaho Code.

6. The applicant established that there is sufficient water for the purposes sought; the application is not filed for purposes of speculation or delay; the applicant has sufficient financial resources; the application is generally in the local public interest; and the proposed project will be efficient and conserve the water of the State of Idaho.

7. The applicant established that there is not a direct relationship between the cold water and the low temperature geothermal water. This is shown by testimony concerning nondeclining cold water levels, and the existence of a confining layer between cold and hot water aquifers.

8. If the applicant only taps the cold water aquifer, his withdrawal should not affect the warm water wells of the protestant.

9. A consistent reading of Idaho Code § 42-203C(2), the Water Appropriation Rules and Regulations and the Policy and Implementation Plan for Processing Water Rights in the Swan Falls Area leads to a conclusion that this application does not cause a significant reduction, and does not need to be reviewed against the public interest criteria. The proposed place of use is already irrigated from a surface water source, and approval of this application is sought to augment irrigation when surface water is in short supply. Places of use listed in supplemental filings are not counted in the annual development limitation of 20,000 acre-feet. The filings are not deemed to cause a significant reduction because the land has already been irrigated.

ORDER

IT IS HEREBY ORDERED that application for permit no. 47-8075 is APPROVED subject to the following conditions and limitations.

1. If a bottom hole water temperature of 75 degrees or greater is encountered while drilling a well, the applicant must immediately cease drilling, and make a showing before the Department, through the hearing process, that his withdrawal of water will not affect or injure Jones Corporation rights, or any other water rights.

2. Construction of the well shall satisfy Idaho well construction standards.

3. Proof of construction of diversion works and beneficial use of water must be submitted on or before July 1, 1993.

MICROFILM

JUN 25 1992

4. Any license issued by IDWR pursuant to the permit or portion thereof for the use of trust water is subject to a term review of 20 years after the date of this approval to determine availability of water for the use and to re-evaluate the public interest at the end of the term.

5. Diversion and use of water under this permit is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

6. The Director retains jurisdiction of the permit and/or subsequent licenses issued to change, add or remove any requirement as determined to be appropriate.

7. When combined with other rights, diversion pursuant to this permit shall not exceed 3.5 acre-feet per acre.

Dated this 22nd day of May, 1991.

GARY SPACKMAN, Hearing Officer
Department of Water Resources

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

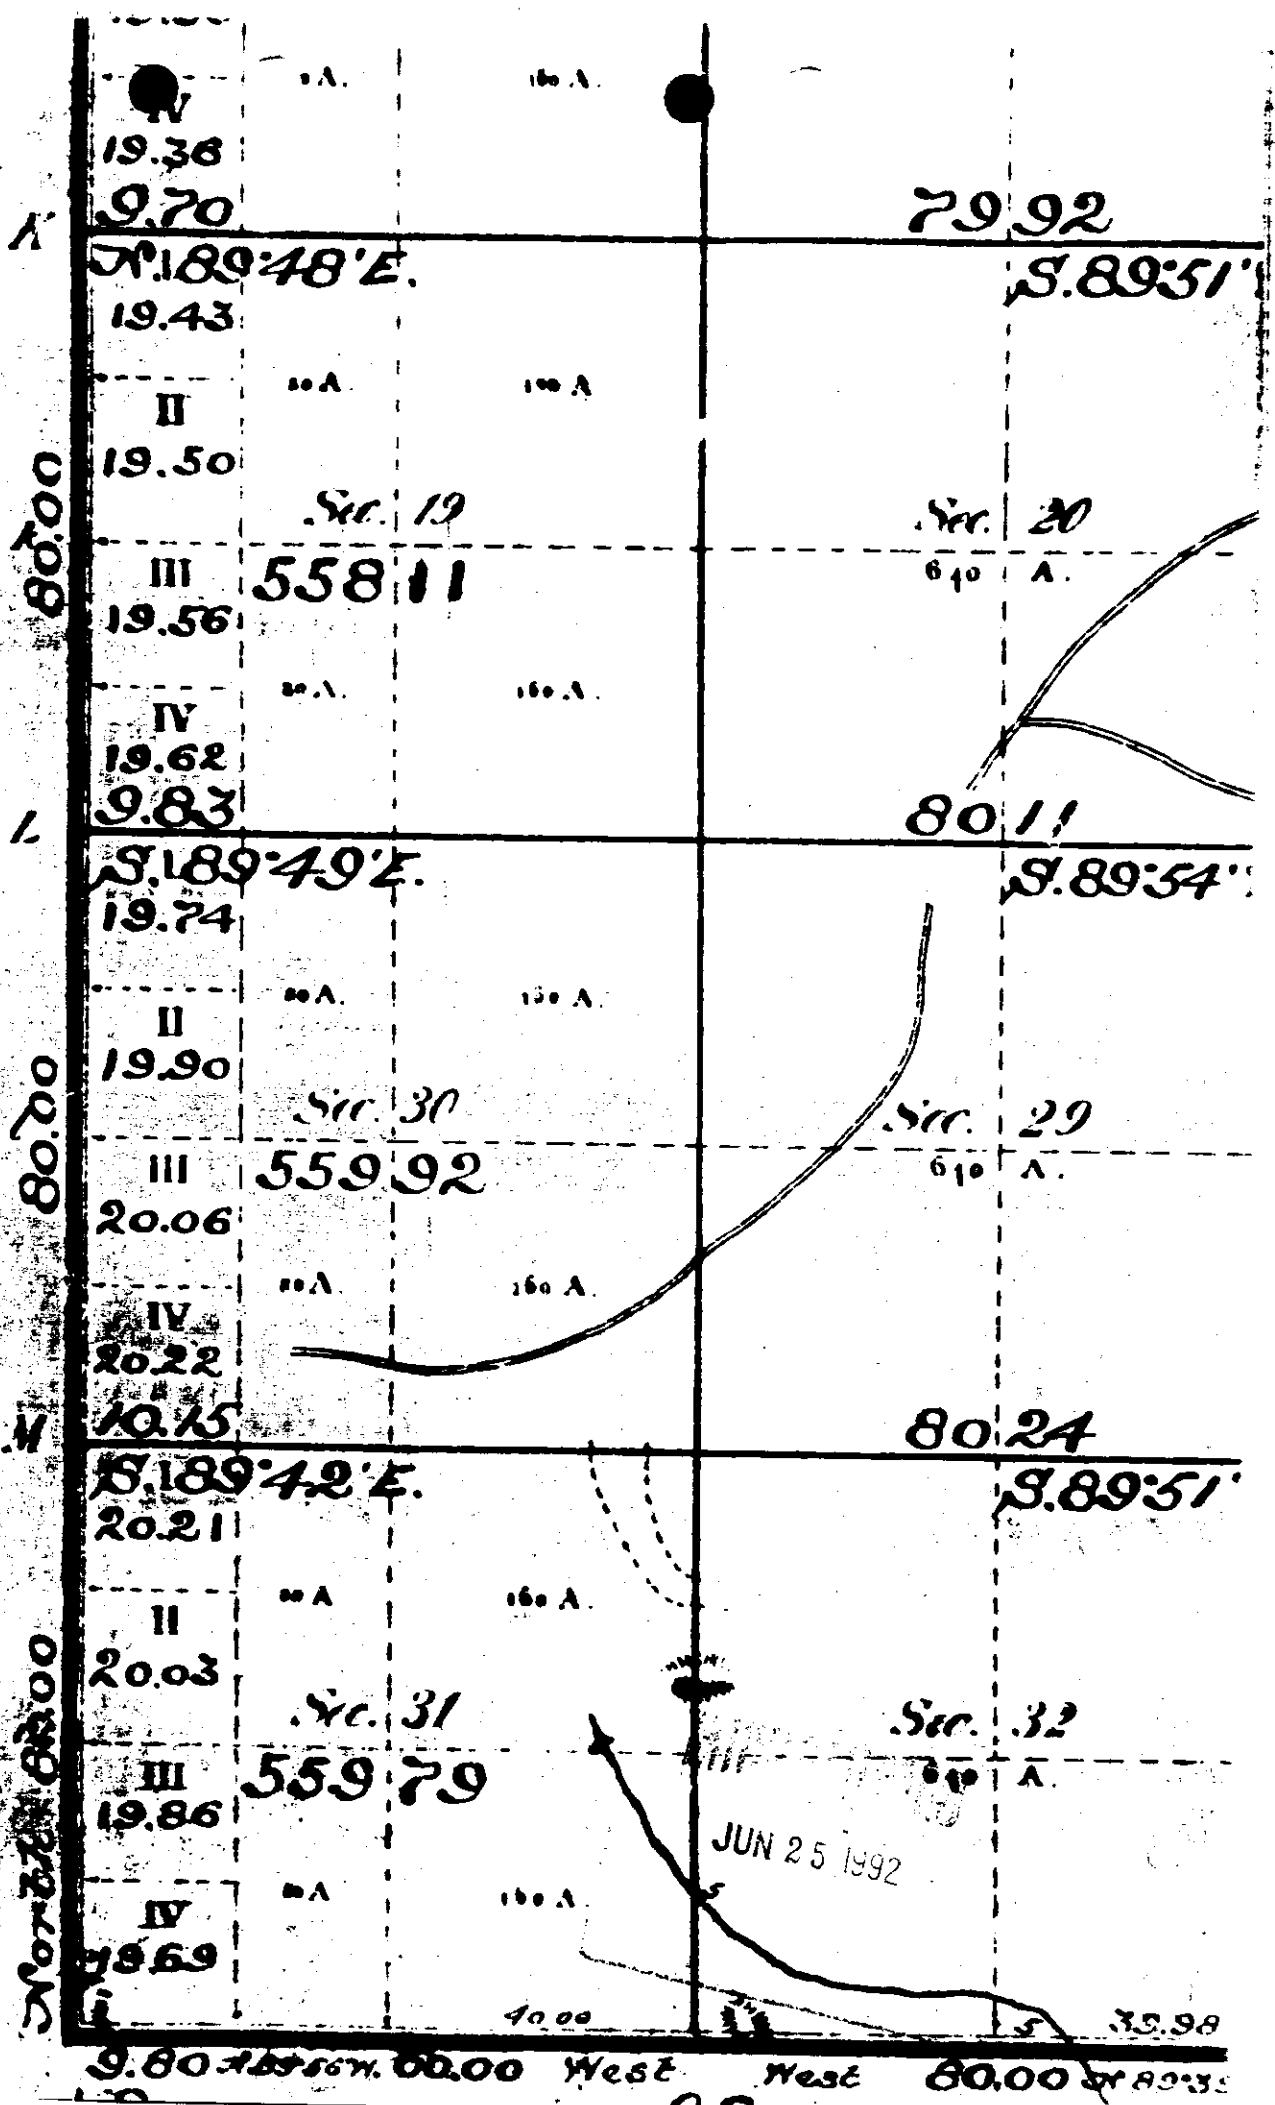

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

Affidavit of Publication

STATE OF IDAHO
COUNTY OF TWIN FALLS } SS.

No 21925

I, Linda Capps McQuire being first duly sworn upon oath, depose and say that I am Business Clerk of the TIMES-NEWS, published daily, at Twin Falls, Idaho, and do solemnly swear that a copy of the notice of advertisement, as per clipping attached, was published in the regular and entire issue of said newspaper, and not in any supplement thereof, for Two consecutive Weeks, commencing with the issue dated January 3, 1991, and ending with the issue dated January 10, 1991.

And I do further certify that said newspaper is a consolidation, effective February 16, 1942, of the Idaho Evening Times, published theretofore daily except Sunday, and the Twin Falls News, published theretofore daily except Monday, both of which newspapers prior to consolidation had been published under said names in said city and county continuously and uninterruptedly during a period of more than twelve consecutive months, and said TIMES-NEWS, since such consolidation, has been published as a daily newspaper except Saturday, until July 31, 1978, at which time said newspaper began daily publication under said name in said city and county continuously and uninterruptedly.

And I further certify that pursuant to Section 60-108 Idaho Code, Thursday of each week has been designated as the day on which legal notice by law or by order of any court of competent jurisdiction within the state of Idaho, to be published weekly, will be published; and that at the head of the editorial column of said combined newspapers, and in each issue thereof, Thursday is announced as the day on which said legal notices will be published.

STATE OF IDAHO
COUNTY OF TWIN FALLS

On this 10 day of January in the year of 1991, before me, Notary Public, personally appeared Linda Capps McQuire, known and identified to me to be the person whose name subscribed to the within instrument, and being by me first duly sworn, declared that the statements therein are true, and acknowledged to me that he executed the same.

RE: License No. 47-8075 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

for Shelley W. Keen
Water Rights Supervisor

TWIN FALLS ID 83301**

**Kari Lynn Townsend
Secretary**

MICROFILMED

FEB 25 2002

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

MICROFILMED
FEB 26 2002

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Comment Report

47-8075

1. skeen 11/29/2001 License Review
Comment: License review by S. Keen on 11/29/2001.

Point of diversion overlaps -- Permit 47-7803A was permitted for a well in the NESW, Section 30, but according to the examiner that point of diversion was not used to irrigate the POU. Claim 47-10586 is for lawn irrigation on a nearby farmstead.

Place of use overlaps -- Licenses 47-2444 and 47-2063 are for old sources that appear to be no longer used. They have not been claimed in the SRBA. SRBA claim 47-10 is for deliveries from the Salmon River Canal Co., as explained by the field examiner for this right.

When I digitized the place of use, I largely agreed with the examiner. However, I am recommending one additional acre in the NWNW of Section 30 because it is supported by the infrared aerial photography.

Even though a permissible place of use is being implemented via this license, a licensing amendment is not required because the total number of irrigated acres remains the same and no new legal subdivisions are being added to the place of use.

E. NARRATIVE/REMARKS/COMMENTS

Two well & pumps, buried mainlines &/or ditches. Well co-mingle with 238.55 shares of Salmon River Canal Co. water. Runs $9\frac{1}{4}$ $\frac{1}{4}$ -mile wheel lines. Well #2 also gravity irrigates 8-9 acres in SE corner of farm. A 6.8-acre field in the NW corner of Sec. 30 is also under gravity from canal shares & Well #1.

Well #2 also provides winter stockwater via a flexible hose & stock trough.

Re-lift pumps at pond: Bldg 40 hp motor w/ Cornell pump
GE 25 hp motor w/ Cornell pump

The re-lift pumps, located just north of the pond, tie the 2 wells together in a common mainline. Canal water also enters the mainline at this point.

Not to exceed 3.5 acre feet per acre per year for all rights combined on this property, = 745.5 AFA for 213 acres.

Although licenses 47-02063 & 2444 also cover this property, neither has been claimed in the SRBA. So no overlap analysis is included for these rights. Owner did not mention any other water sources except for the two on-farm wells & canal shares.

One canal allows delivery of 0.2 acre foot to 1.0 acre foot of water depending on how much water is stored in Salmon Falls Reservoir.

Have conditions of permit approval been met? ☒ yes ☐ no

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 47-08075

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)736-3033.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

RE: Permit No. 47-08075

Dear Permit Holder:

Enclosed is a copy of the denied request for extension of time which you submitted to the department in connection with the above referenced permit. Section 42-204, Idaho Code, provides that the department can only grant one extension of time based on due diligence. Please note that the department has previously granted an extension of time in connection with this permit.

Your best option at this point would be to file proof of beneficial use for the portion of the water right that has been developed. I have enclosed the necessary form for your convenience. Be advised that since the extension was denied, the permit will lapse on July 1, 1995, and will be of no further force nor effect unless it is reinstated by submitting proof of beneficial use.

If you have any questions or if the department can be of any assistance, please feel free to contact us or any of the regional offices.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

RE: Permit No. 47-08075

Dear Permit Holder:

I am holding the Request for Extension of Time you submitted to the Southern Regional Office on March 27, 1995. Proof of beneficial use is not due until July 1, 1995. The department will not consider an extension request for denial or approval which is submitted earlier than sixty (60) days prior to the proof due date.

The department will not make a final determination on the extension request until May 1, 1995.

If you have any questions or concerns, please do not hesitate to contact me at (208)327-7900.

Sincerely,

JULIE L. YARBROUGH

Re: Permit No. 47-08075

Dear Permit Holder:

Enclosed is a copy of the approved request for extension of time. The time within which to submit proof of beneficial use is extended to July 1, 1995. Please note that the department has granted this extension based on due diligence. It is important that you work diligently toward the completion of this project during the construction period allowed since the department will not be able to grant additional extensions based on due diligence

If you have any questions or if I can be of any further assistance, please feel free to contact this office.

Sincerely,

Karen L. Gustafson

Dear Mr. Courtney:

Enclosed is a copy of your approved application for permit. At the time the Proposed Memorandum and Decision Order was adopted approving your permit, you should have been sent an actual permit in conjunction with the Order adopting the decision.

I do apologize for this oversight. This type of situation can happen when an application deviates from the usual processing procedures.

Thank you for your patience in this matter.

Sincerely,

Brenda L. Miller

Dear Mr. Jones:

Please find enclosed a copy of the Proposed Memorandum Decision and Order and Order Issuing Proposed Memorandum Decision for application for permit to appropriate water no. 47-8075 in the name of John D. Courtney.

Any party who disagrees with the Proposed Decision may file exceptions to the decision within fifteen (15) days of service of the Proposed Decision.

Respectfully,

GARY SPACKMAN, Manager
Water Right Permits Section

RE: Testimony in support of Application for Permit #47-8075.

Dear Sirs:

We offer the following information in support of our Application for Permit #47-8075 for appropriation of groundwater for use in irrigation.

RESPONSE to Rule 4,5,3,1.

There are two well sites within one-half mile of the proposed drilling site. One is a domestic well located on the property of the applicant. The other site is located at the Nat-Soo-Pah.

Water from the proposed project will be used in a comingled system with Salmon River Canal water. The system is sprinkler irrigation. This system is water conservative.

We believe this system will have no effect on other water users.

RESPONSE to Rule 4,5,3,2.

We project our average water use will be 1.9 cfs for the 200 acres covered in the proposed project. The peak water use will be 2.8 cfs. The total annual use will be approximately 3 acre feet per acre for a total annual volume of 600 acre feet.

For proposed aquifer information see the attached well logs.

RESPONSE to Rule 4,5,3,3.

We submit this application in good faith.

RESPONSE to Rule 4,5,3,4.

We have the financial resources needed to develop the proposed project.

RESPONSE to Rule 4,5,3,5.

We believe this project will have no impact on local public interests.

RECEIVED
JUN 25 1992

RESPONSE to Rule 4,5,3,6.

The water from the proposed project will be used in an irrigation system composed entirely of sprinkler irrigation. Our irrigation system is very water efficient and water conserving.

Respectfully submitted,

John D. Courtney

John D. Courtney

REPORT OF WELL DRILLER
State of Idaho

Department of Reclamation

State law requires that this report shall be filed with the State Reclamation Engineer within 30 days after completion or abandonment of the well.

WELL OWNER:
Name Jonas Corporation

Address Route 1
Twin Falls, Idaho

Owner's Permit No.
NATURE OF WORK (check): Replacement well ☐
New well ☐ Deepened ☐ Abandoned ☐
Water is to be used for: Enlarged ☐

METHOD OF CONSTRUCTION: Rotary ☐ Cable ☐
Dug ☐ Other ☐

(explain)
CASING SCHEDULE: Threaded ☐ Welded ☐

"Diam. from ft. to ft.
"Diam. from ft. to ft.
"Diam. from ft. to ft.
"Diam. from ft. to ft.
Thickness of casing: Material:
Steel ☐ concrete ☐ wood ☐ other ☐

(explain)
PERFORATED? Yes ☐ No ☐ Type of
perforator used:

Size of perforations: by
perforations from ft. to ft.
perforations from ft. to ft.
perforations from ft. to ft.
perforations from ft. to ft.
WAS SCREEN INSTALLED? Yes ☐ No ☐

Manufacturer's name
Type Model No.
Diam. Slot size Set from ft. to ft.
Diam. Slot size Set from ft. to ft.

CONSTRUCTION: Well gravel packed? Yes ☐
No ☐ Size of gravel Gravel
placed from ft. to ft. Surface seal
provided? Yes ☐ No ☐ To what depth?
Material used in seal:

Do any strata contain unusable water? Yes ☐
No ☐ Type of water:
Depth of strata ft. Method of sealing
strata off:

Surface casing used? Yes ☐ No ☐
Cemented in place? Yes ☐ No ☐

Locate well in section

LOCATION OF WELL: County
 N S Sec. T. N/S R. E/W

Size of drilled hole: in. Total
depth of well: ft. Standing water
level below ground: ft. temp.
Fahr. Test delivery: gpm
or cfs Pump? ☒ Bail ☐
Size of pump and motor used to make test:

Length of time of test: hrs. min.
Drawdown: ft. Artesian pressure: ft.
above land surface Give flow cfs
or gpm. Shutoff pressure:
Controlled by: Valve ☐ Cap ☐ Plug ☐
No control ☐ Does well leak around casing?
Yes ☐ No ☐

RE: Protest By Jones Corp. of Application for Permit #47-8075.

The proposed application will not reduce the supply of water available for the existing rights of the Jones Corp.
We submit the following reasons:

1. The Jones Corp. wells have water temperatures of 98°F. The groundwater temperature of the existing well on the land subject to this application is 62°F.
2. The Jones Corp. wells and other warm water wells in this area were flowing wells. None of the cold water wells in this area have ever been flowing wells. This difference in artesian pressure supports our assertion that the Jones Corp. wells exist in a different aquifer than all the cold water wells in the area.
3. A well drilled in 1977 by Gerald Robbins located approximately 1½ miles north of the Jones Corp. well had water temperature of 65°F. Our proposed drilling site is over two miles from the Jones well.
4. In the Proposed Memorandum Decision and Order for Application for Amendment of Permit 47-7803A dated August 2, 1990, the following Conclusion of Law was stated:

"3. The applicants submitted sufficient information at the hearing to establish that their proposed wells were unlikely to cause injury to Jones. This is evidenced by the colder water characteristics of wells in the area where the applicants intend to drill their wells. Furthermore the Department could protect against any possible interference by conditioning the applications for amendment."

The proposed diversion points in our application are the same as the diversion points referred to in the above statement.

Sincerely,

John D. Courtney

INTER-DEPARTMENT MEMO — 1

FROM Allen

DATE 9/26/77

TO Mike Steele

SUBJECT Gerald E. Robbins Applic. #47-7351

On 9/26/77 I inspected the well site near Nat-Soo-Paw.

Lloyd Hayden was operating the well rig for Arnold Elsing.

The well was drilled to a depth of 300'; Mr. Hayden stated that there was about 25 inches of water developed by the well and the water temperature was approx. 65°. Mr. Hayden

stated that a 4" hole had previously been drilled at this site to a depth of 387'. The hole was then enlarged to the 300' depth.

BEFORE THE DIRECTOR OF THE DEPARTMENT
OF WATER RESOURCES OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATION FOR AMENDMENT OF
PERMIT 47-7803A IN THE NAME OF JOHN K. &/OR DESSIE
COURTNAY AND APPLICATION FOR AMENDMENT OF PERMIT
NO. 47-7803B IN THE NAME OF MIKE &/OR DEBRA COURTNEY

ORDER ISSUING
PROPOSED MEMORANDUM
DECISION

R. Keith Higginson, Director of the Department of Water Resources, having reviewed the attached proposed decision prepared by his appointee, Gary Spackman, who conducted the hearing or who has read the record in the this case, hereby approves the same as a proposed decision pursuant to Idaho Code, Sec. 67-5211.

Each party to these proceedings who appeared at the hearing is given the opportunity, pursuant to Idaho Code, Sec. 42-1701A and 67-5211, to file exceptions to the proposed decision and to present briefs and oral arguments. If no timely and proper exceptions are received, an order by the Director will be entered adopting the proposed decision as his final decision.

I.
EXCEPTIONS

A. To be considered by the Director, exceptions must:

1. be received by the Director on or before the 15th day following the day of service of this Order and the proposed decision,

2. specifically identify the portions of the proposed decision to which exceptions are made and specifically state the grounds for those exceptions, and

3. be sent to each of the parties who appeared or their attorneys.

II.
BRIEFS

A. Any briefs in support of exceptions to the proposed decision shall be filed with the Director at the same time that party's exceptions are filed with the Director.

B. All response briefs to the exceptions must be filed with the Director within 15 days after the exceptions were served upon the responding party.

DESSIE COURTNEY AND APPLICATION FOR AMENDMENT OF	)	PROPOSED
PERMIT NO. 47-7803B in the name of MIKE &/OR	)	MEMORANDUM
DEBRA COURTNEY	)	DECISION AND
	)	ORDER
	)	

A hearing having been conducted to resolve protests against the above applications for amendment, the hearing officer, as a representative of the Director of the Department of Water Resources, finds, concludes and orders as follows:

FINDINGS OF FACT

1. John &/or Dessie Courtney (who will hereafter be referred to as John Courtney) filed an application for permit to appropriate water on March 12, 1982, proposing to divert 3.0 cfs from ground water for irrigation purposes. The Department of Water Resources (Department) granted the permit.

2. The place of use described in the original application located the proposed place of use as a single block of land within the NE1/4, SW1/4 and SW1/4 of Section 24, T12S, R16E, B.M. The total proposed place of use was 440 acres.

3. In November of 1987, the Department granted an amendment to the permit which authorized 20 points of diversion in addition to the one point of diversion initially identified by the permit. The amendment granted John flexibility to locate wells in the

JUN 25 1992

most convenient places. John Courtney did not intend to develop all 21 points of diversion.

4. In March, 1990, John Courtney assigned 0.50 cfs of permit no. 47-7803 to Mike &/or Debra Courtney. The residual portion of the right retained by John Courtney was assigned no. 47-07803A. The portion assigned to Mike &/or Debra Courtney (who will hereafter be referred to as Mike Courtney) was assigned water right no. 47-07803B.

5. Shortly after the assignment to Mike Courtney, both John Courtney and Mike Courtney filed applications to amend their respective portions of water right no. 47-7803.

6. John Courtney does not propose any additional points of diversion, but proposes a change in the place of use. His application for amendment proposes irrigation of fewer acres within the boundaries of the place of use described by the original application and also proposes irrigation of fragmented parts of the NE1/4 of Section 5, T12S, R16E, and the W1/2 of Section 30, T12S, R17E.

7. Mike Courtney's application for amendment proposes the addition of two more points of diversion in Sections 35 and 36, T12S, R16E. The application also proposes changing the place of use to irrigate portions of the NE1/4 of Section 35, and the NW1/4 of Section 36, all located within T12S, R16E.

8. After proper publication, the applications for amendment were protested by Jones Corp., Roger Jones appearing as the principal for the company (hereafter referred to as Jones).

9. A hearing was conducted on July 9, 1990, in Twin Falls, Idaho. John Courtnay and Mike Courtnay appeared representing themselves. Roger Jones appeared representing Jones.

10. Jones diverts water from several wells located in Section 6, T13, R17E, and in Section 12, T13S, R16E, for irrigation of lands located in Section 35, T12S, R16E, and Sections 1, 2, 11 and 12, in T13S, R16E, B.M. The wells produce low temperature geothermal water. The minimum temperature of any of the wells is 95 degrees Fahrenheit.

11. Jones is concerned that diversion of water from wells proposed by Mike Courtnay in Sections 35 and 36, and also development of any of the multiple points of diversion not yet constructed by John Courtnay, will result in a decline in water levels. Jones established that the original low temperature geothermal wells drilled by the ancestors of Roger Jones were free flowing artesian wells, and that water levels have now declined to where Jones must pump from a level of approximately 200 feet below ground surface.

12. The applicants seek to divert cold water, not low temperature geothermal water. With the exception of the Nat-Soo-Pah wells and some other wells located within Section 31, T12S, R17E, wells located north and west of wells owned by Jones are not low temperature geothermal wells.

13. The wells proposed by Mike Courtnay's application for amendment will be located approximately one to one and one-half miles from the nearest Jones well.

RECEIVED
JUN 25 1992

14. John Courtney submitted several well logs as proof that the formations intercepted by the Courtney wells were substantially different than the formations intercepted by the Jones wells. After reviewing the well logs, I find that there is insufficient information contained in the wells logs to draw any conclusion about the relationship of the Jones wells to other wells in the immediate area. I also cannot determine whether there is a relationship between the water in the wells from ground water elevation information submitted by the applicants.

15. John Courtney proposes to reduce the number of acres that he personally proposes to irrigate after assignment from 440 acres to 366 acres. He has added places of use in Section 25, T12S, R16E, and in Section 30, T12S, R17E, which were not previously authorized as a place of use. Each 40 acre tract in Section 25 and 30 lists either 5.5 acres or 12 acres of irrigation. In addition, the number of acres irrigated within several other 40 acre parcels has been reduced from the number of acres previously listed in the proposed place of use.

16. Some of these acreage reductions are a better representation of the actual acres that can be irrigated. John Courtney admitted, however, that within Section 24, and for all places of use within Section 25 and 30, more lands within each 40 acre tract are currently irrigated with Salmon River Irrigation Company water than are proposed as a place of use pursuant to his application for amendment.

JUN 25 1992

17. When asked whether he could guarantee that ground water would only be applied to the specific acres listed in the amendment, particularly when Salmon Falls water is no longer available, John Courtnay stated that he could not guarantee it. He stated that the proposed system will be an integrated system which will irrigate all of the acreage, and that the Salmon Falls water and the ground water will be commingled.

18. If more land is being cultivated than is listed as the place of use, the owner of the land will not restrict irrigation to only that portion listed as the place of use.

19. Mike Courtnay was asked whether the place of use listed in his application for amendment was all of the land he presently irrigates. He stated that in both Sections 31 and 36, he irrigates more land than is listed as the place of use in his application for amendment. He also intends to irrigate all of his land with ground water, either by mixing surface and ground water together, or, after the Salmon Falls water is no longer available, by irrigating solely with ground water.

CONCLUSIONS OF LAW

1. Idaho Code § 42-211 sets forth the criteria that the Department must consider in determining whether an application for amendment should be approved:

. . . [I]f approval of thereof would not result in the diversion in use of more water than originally permitted and if the rights of others will not be adversely affected thereby, the director of the department of water resources shall approve said application and return the proof copy to the permit holder. The director of the department of water resources shall give such notice to other affected water

JUN 25 1992

users as he deems appropriate and may grant the amendment, in whole or in part or upon conditions, or may deny the same.

2. The applicant carries the burden of coming forward with evidence and proving that his proposed amendment will not result in an enlargement of use and will not injure other water users.

3. The applicants submitted sufficient information at the hearing to establish that their proposed wells were unlikely to cause injury to Jones. This is evidenced by the colder water characteristics of wells in the area where the applicants intend to drill their wells. Furthermore, the Department could protect against any possible interference by conditioning the applications for amendment.

4. The proposal for a change in the place of use is not a true representation of the system that will be actually installed and used. Lands in excess of the proposed place of use will be irrigated by the applicants, and the applicants, by their own admission, will not be able to selectively irrigate with ground water the place of use proposed.

5. Although the applicants have submitted applications for amendment in which the total number of acres permitted for development pursuant to the original permit will not be exceeded, the applications for amendment do not represent what the actual system operation will be. Actual operation of the system will result in an enlargement of use.

6. The applicants have split the permit, apparently hoping that they will be able to irrigate all of their lands with ground

JUN 25 1992

water, although all of their lands are not fully described as a place of use by the applications for amendment.

7. The applications for amendment should be denied, and the place of use authorized for development should be limited to the original place of use listed in permit no. 41-7028.

8. Furthermore, wells drilled pursuant to permit no. 47-7803 should not be allowed to intercept low temperature geothermal water.

ORDER

IT IS HEREBY ORDERED that application for amendment of water right no. 47-7803A, filed by John K. Courtney, is DENIED.

IT IS FURTHER ORDERED that application for amendment of water right no. 47-7803B, in the name of Mike Courtney is DENIED.

IT IS FURTHER ORDERED that the place of use and points of diversion listed in the original application for permit no. 47-7803 as previously amended may be developed.

IT IS FURTHER ORDERED that if a well hole bottom water temperature of greater than 85 degrees is encountered in the development, that the permit holder must immediately cease drilling, and either abandon the well pursuant to Idaho well construction standards or construct the well to prevent withdrawal of the low temperature geothermal water.

IT IS FURTHER ORDERED that proof of beneficial use is due on water right no. 47-7803 on or before October 1, 1990.

RECEIVED
JUN 25 1992

Dated this 1st day of August, 1990.

RE: Applicants Water Right to Salmon River Canal Co., LTD.

The property has 238.55 shares of Salmon River Canal water.
The average water allotment per share for the years 1924 through
1990 inclusive is 0.78 acre feet per share.

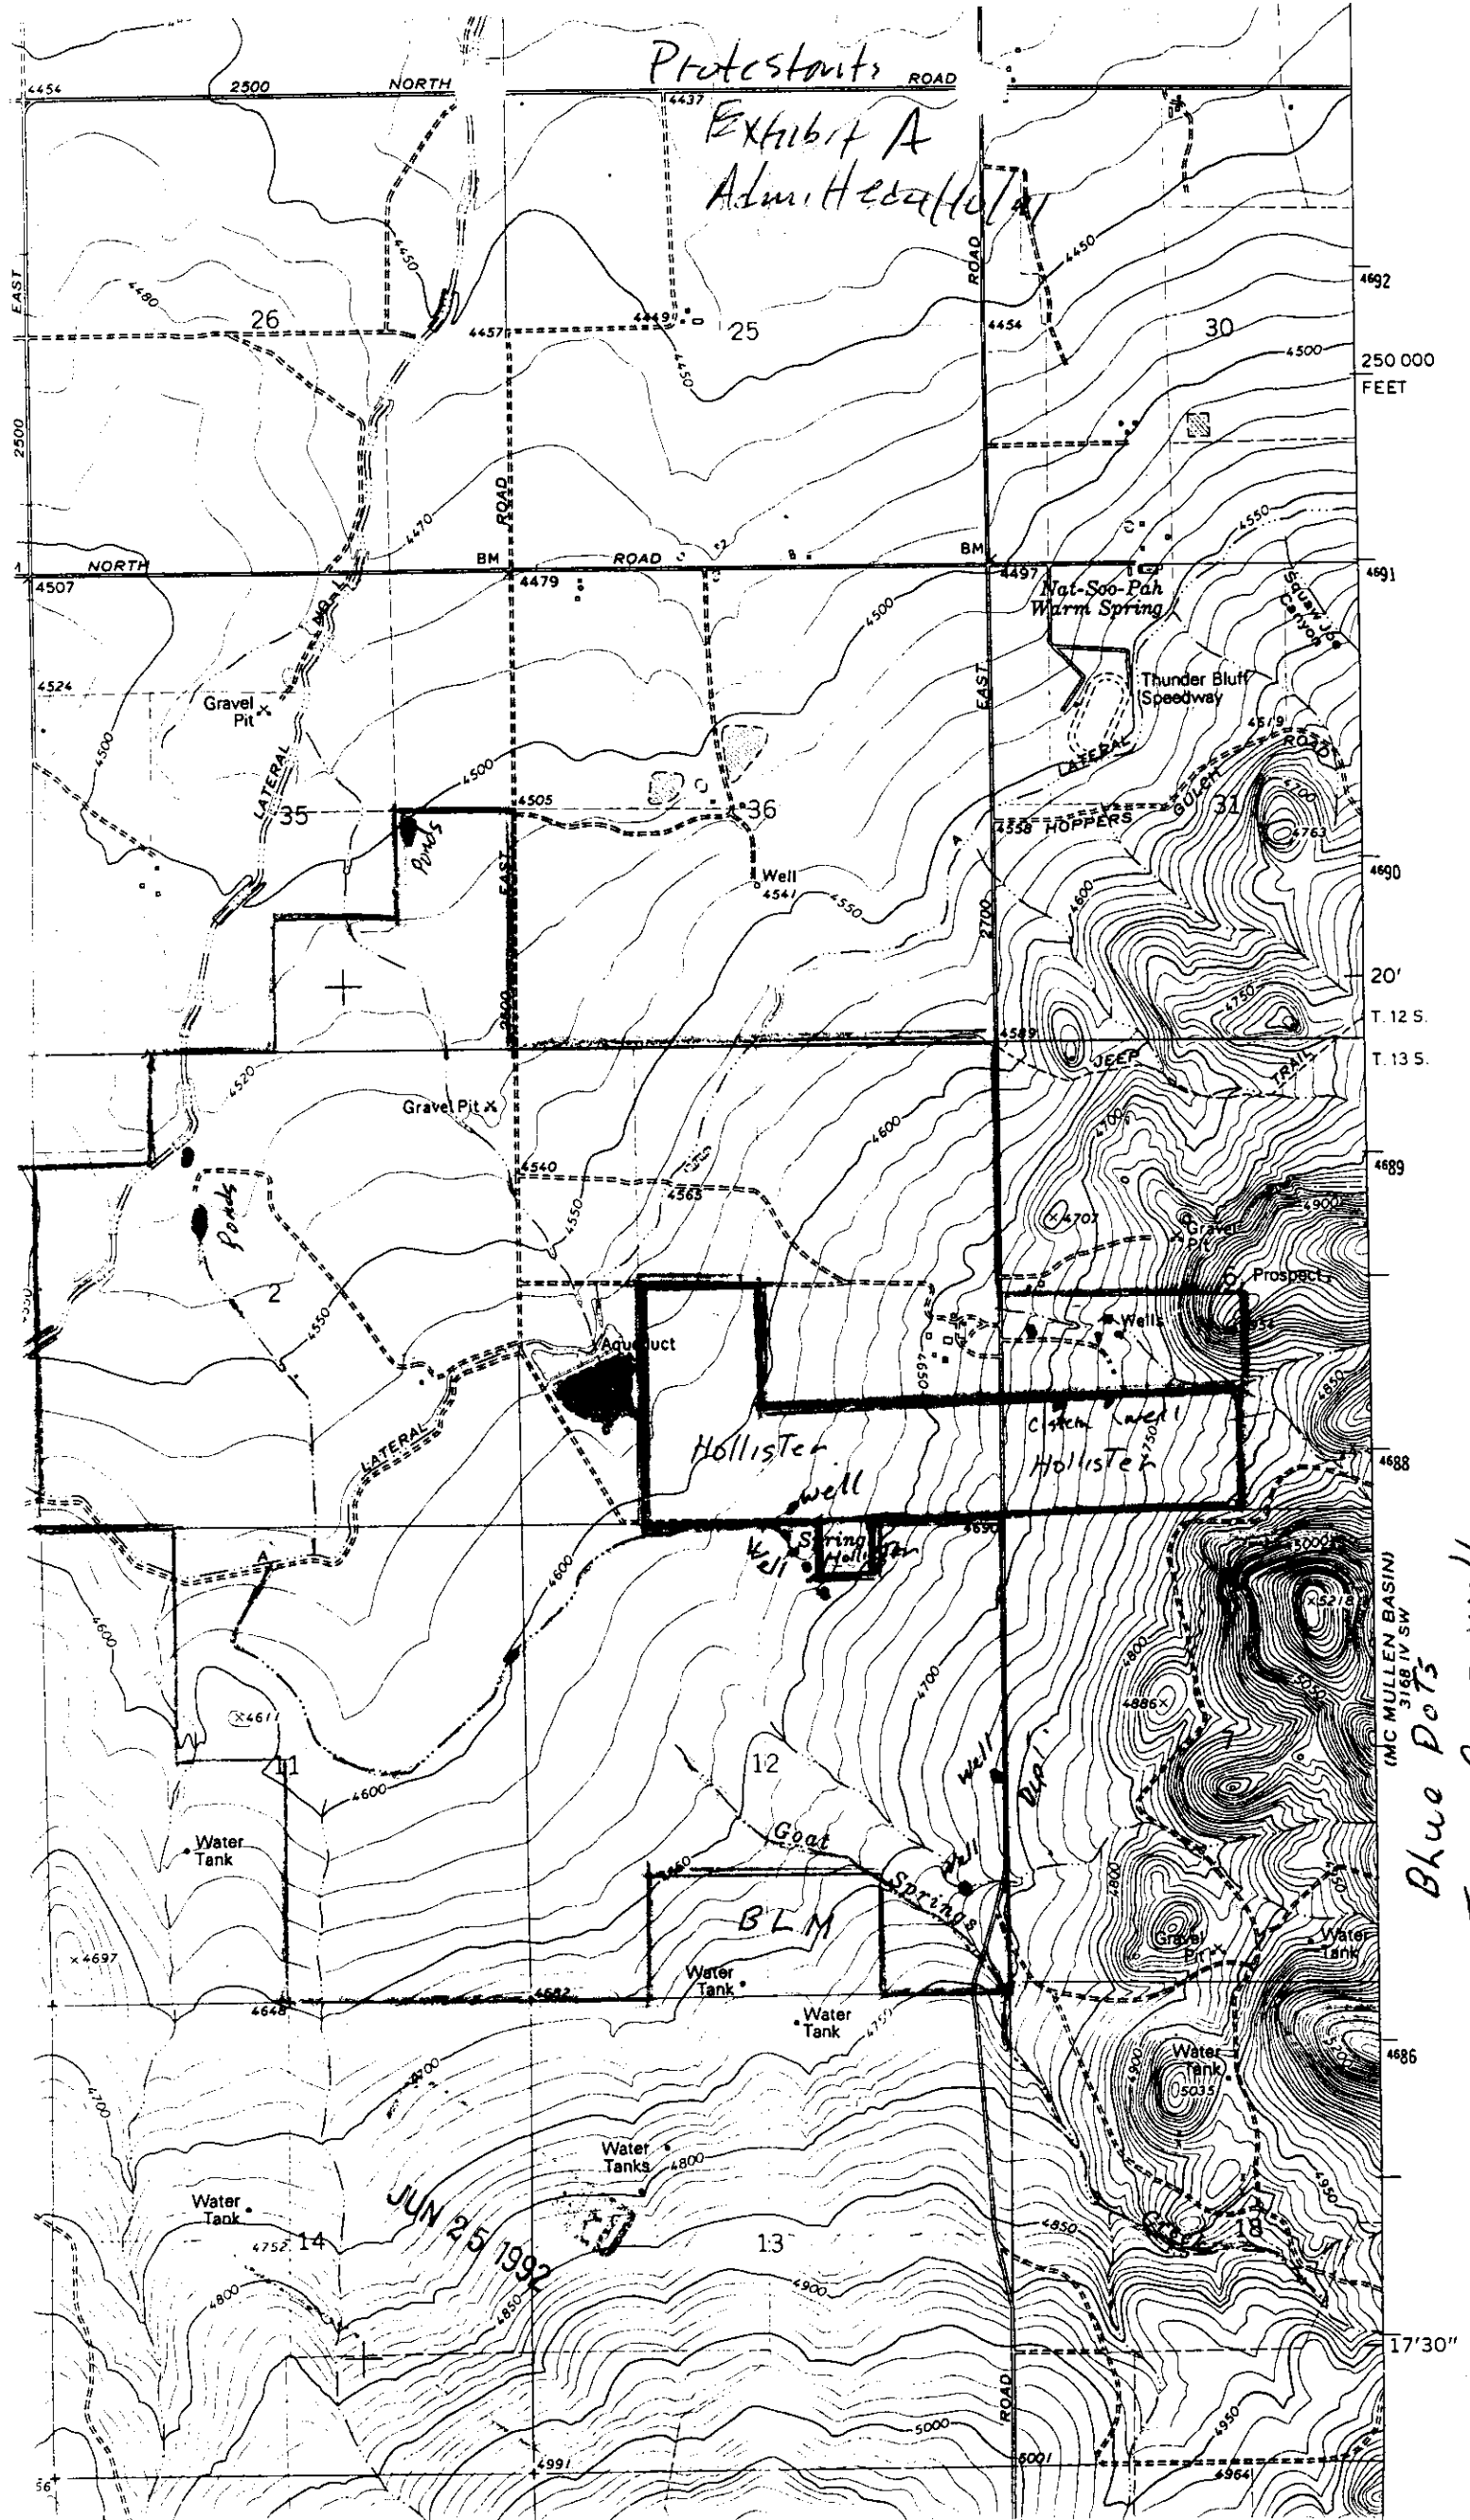

This totals 186 acre feet per year for our Salmon River Canal
Co. water right.

Respectfully submitted,

John D. Courtney

Courtway Application

Condition No. 5 51, 52, & 53 are the standard trust conditions we use w/ all trust permitting. (see attached)

You could also perhaps add condition that "when combined w/ other Rts, permit shall not exceed 3.5 AFA." - We usually reserve this type of condition in licensing & not on permits.

I can^{not} think of any other applicable conditions.

MEMORANDUM

DATE: 03-Apr-1991

FROM: Loren Holmes *LH*

TO: File 47-8075

SUBJECT: Outcome of pre-hearing conference 03-Apr-1991

Ruth Owen did not appear at the conference. She had been sent notice with a cover explaining that her protest was late and that she could not be considered an original party.

The parties present were advised of the criteria to be considered and of their burdens of proof under each criteria.

The main points at issue are sufficiency of water supply and injury to existing rights.

My preliminary research indicated an overlapping license, 47-2063, on the Courtney property. Mr. Courtney said he thought it had been cancelled through some previous action of the department.

The hearing is set for 9:00 AM, Wednesday, April 10, 1991 in our conference room.

CONFERENCE AND HEARING PROCEDURE

IN THE MATTER OF A PROTESTED APPLICATION FOR PERMIT

In accordance with IDAHO CODE, Section 42-203, the following issues are involved in the consideration of the application and protest(s):

- 1) Will the proposed use reduce the quantity of water under existing rights?
- 2) Is the proposed water supply insufficient for the purposes intended?
- 3) Is the application made in good faith or for delay or speculative purposes?
- 4) Has the applicant sufficient financial resources with which to complete the proposed project?
- 5) Will the proposed use conflict with the local public interest?
- 6) Is the proposed use contrary to conservation of water resources within the state of Idaho?

BURDEN OF PROOF

The Applicant has the initial burden of proof on issues 1,2,3,4,& 6 above, that is, the applicant has the burden of coming forward with evidence for evaluation of those criteria.

The initial burden of proof on issue 5, local public interest, lies with the both the applicant and protestant as to factors which they are most knowledgeable and cognizant of. The applicant has the ultimate burden of persuasion with respect to this issue.

PROCEDURE

The procedure normally followed by the department in arriving at a decision on the issues which must be considered is to first hold a conference in the matter and then, if necessary, hold a hearing. If a hearing is held a written decision is issued based on the hearing record.

CONFERENCE

Preliminary to holding a hearing, a pre-hearing conference is held to familiarize the department and the parties with the matter and to determine if a resolution of the protest(s) is possible without the need for a hearing.

At the conference the department may formulate and simplify the issues, obtain admissions of fact and of documents which will avoid unnecessary proof, arrange for the exchange of proposed exhibits or prepared expert testimony prior to the hearing, limit the number of witnesses, consolidate the examination of witnesses, and advise the parties of the procedure which will be followed at any subsequent hearing.

HEARING

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes at the expense of the requesting party. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

If the hearing is conducted by a hearing officer appointed by the Director, rather than the Director himself, a proposed decision will be issued and the parties will be afforded the opportunity to file exceptions to the proposed decision and present briefs and oral arguments to the Director prior to the issuance of a final decision by the Director. This procedure is required by IDAHO CODE, Section 42-1701A.

The parties by written stipulation, may waive their right to a proposed decision, however, the failure of either party to waive a proposed decision will not prejudice the director's review of a party's evidence and arguments. However, such a waiver will shorten the decision making process and may expedite substantially the issuance of a final decision. Whether compliance with Section 42-1701A is waived will not affect a party's right to petition for a rehearing of the final decision pursuant to rule 12 of the Department's Rules of Practice and Procedure or affect a party's right to appeal the final decision to the District Court.

Under the provisions of the IDAHO CODE, Sections 42-1701A and 67-5215, any court review of the department's decision on appeal shall be confined to the record created before the department.

EFFECT OF FAILURE TO APPEAR AT A CONFERENCE OR HEARING

Failure to appear at the time and place set for a conference or hearing by the applicant or protestant(s) may allow the department to dismiss without prejudice the protest(s) or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

MEMORANDUM

TO: FILE

FROM: TIM LUKE

RE: APP. NO. 47-8075

DATE: 12-20-90

This application is a trust water filing which has come up for sequential processing under the appropriate rules and statutes. The applicant returned a trust water questionnaire and states that the groundwater source represented by the application has not been developed, and that the groundwater source will supplement surface water from Salmon Falls Reservoir. The applicant has amended the application by reducing the total number of acres from 280 to 200 acres.

The attached place of use overlap report shows that 130 of the 200 acres under the applications are already licensed. The priority dates of the licensed rights are old and the licenses have not been claimed in the adjudication. The remote sensing report for 1986 shows that 175 acres were classified as irrigated in that year. My review of 1980 infrared aerial photography on file at IDWR confirms the irrigated acreage reported by IDWR for 1986. Lots 2 and 3 in section 30 do not appear fully irrigated in 1980, whereas the 1986 report shows those lots as irrigated. If the place of use is irrigated according to the amendment, the total number of undeveloped acres should be no more than about 25 acres. There is evidence that at least 175 acres within the farm unit was developed prior to 1984.

I recommend processing the application as a trust filing and counting 25 acres as trust acreage.

Application No. 47-8075

INSTRUCTIONS: IF YOU ARE NOT INTERESTED IN HAVING THE APPLICATION PROCESSED, PLEASE COMPLETE AND RETURN THE ENCLOSED WITHDRAWAL FORM.

IF YOU WISH TO HAVE THE APPLICATION PROCESSED, PLEASE ANSWER THE FOLLOWING QUESTIONS AS THOROUGHLY AS POSSIBLE. FAILURE TO RETURN EITHER THE WITHDRAWAL FORM OR QUESTIONNAIRE IS CAUSE FOR THE DEPARTMENT TO VOID THE APPLICATION.

1a. Are you the current owner of the land or place of use described under this application? Yes ☒ No ☐

b. If you are not the property owner, please describe the arrangement enabling you to develop the proposed project.

2a. Has the source of water listed on this application been used to irrigate any of the land described under this same application prior to October 1, 1984? Yes ☐ No ☒

b. If yes, please describe the extent of development and number of acres irrigated. (Note: Uses developed after October, 1984 are considered trust water diversions and may be subject to certain conditions. You may be asked to verify uses established prior to October, 1984.)

3. If you answered NO to ques #2a, please state the number of acres you have irrigated with this source after October 1, 1984. 0

4. If you have not irrigated lands under this application, please state the number of acres you plan to complete. 200

5. If the permit is a supplemental filing please identify other water rights which are used on the same land.

Salmon Falls Reservoir water as listed in original application

Use the reverse side of this form if you wish to add any comments. You may mark changes on the enclosed application to designate any proposed amendments. (Note: Proposed changes which result in an expansion of use will not be considered by the department.)

I hereby assert that the responses provided above are true to the best of my knowledge. I understand that any willful misrepresentations may result in voiding of the application.

Applicant John D. Courtney

RE: APPLICATION FOR PERMIT NO. 47-8075

Dear APPLICANT:

Due to the Swan Falls litigation, Department approval of the enclosed application may have been delayed. The Department is presently reviewing your application and may authorize the proposed development.

The purpose of this letter is to determine: (1) if you are still interested in developing the project, and (2) the extent of development, if any, that has already occurred under the application. Enclosed are two forms requesting information which will help the Department expedite the processing of the application.

1. If you have abandoned or have no interest in continuing with your plans for development of the project, please complete the enclosed withdrawal form and return it to the Department. If you request a withdrawal of the application and the application was not previously advertised, the department will refund your original filing fee.

2. If you wish to continue with your proposed development plans, or have completed all or a portion of the proposed development before October 1, 1984, then you must complete and return the enclosed questionnaire. You may use the questionnaire and enclosed application to make any comments &/or amendments concerning the application. Your completion of the questionnaire will expedite processing and help the department determine if the water diverted under the application is public water or trust water. Approved trust water applications may be subject to additional conditions.

Failure to return either of the above forms within thirty (30) days of the date of this letter is cause for the Department to void the application.

Please be further advised that if any undeveloped portion of your proposed project is greater than 200 acres, the department will issue a notice requesting additional information as required by Water Appropriation Rule 4,5. (copy enclosed). In particular, rules 4,5,3. through 4,5,3,5. apply to your project if it is more than 200 acres. If necessary, the rule 4,5. information notice will be sent to you after you return the questionnaire.

If you have questions concerning the content of this letter or about completing the forms, please contact Tim Luke at the address below or by calling directly at 327-7864. The enclosed forms and all other relative information must be returned within thirty (30) days to:

Idaho Department of Water Resources
Statehouse Mail
Boise, Idaho 83720-9000
Attn: Tim Luke

Please note that a copy of your application is enclosed. The application number is also shown on the enclosed questionnaire.

Sincerely,

TIM LUKE
Sr. Water Resource Agent

Re: Application for permit No. 47-8075

Dear Mr. Courtney:

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned identification No. 47-8075. Please refer to this number in all further correspondence.

Because your application proposes to appropriate water which has been identified as "trust water" in the Swan Falls agreement, it will be processed under rules and regulations for water appropriation that have been adopted as required by law.

Under the rules, applications will be processed at a rate which allows development of 20,000 acres per year. The oldest applications will be processed first, provided that applicants are willing and able to proceed.

For this reason, it is not possible to estimate at this time when action will be taken on your application.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Loren O. Holmes, P.E.
Southern Region Manager

STATE OF IDAHO

Water License No. 7809

WHEREAS, On the 1st day of June, A. D. 1911, John C. Bledsoe

of Twin Falls, County of Twin Falls, State of Idaho, duly made application (No. 10046) to me for a permit to use for (10)

County of Twin Falls, State of Idaho, for irrigation and domestic purposes, and,

WHEREAS, On the 1st day of August, A. D. 1911, Permit No. 7809 was issued to said applicant for the diversion of said water and providing for the completion of the works of diversion therein described on or before the 1st day of August, A. D. 1912, and for the application to beneficial use of said water on or before the 1st day of August, A. D. 1914, and,

WHEREAS, On the 1st day of August, A. D. 1912, John C. Bledsoe

the holder of said permit, duly made proof of the completion of adequate works for the diversion of 1.5 cubic feet per second of said water, as evidenced by my Certificate No. 7809 dated August 1, 1912, confirming the completion of works of sufficient capacity for diverting and conveying to the place of intended use 1.5 cubic feet per second of said water, with date of priority of June 1, 1911, and

WHEREAS, On the 1st day of August, A. D. 1912, John C. Bledsoe

the holder of said permit, duly made proof of the application to beneficial use of 1.5 cubic feet per second of said water.

NOW, THEREFORE, by virtue of authority vested in me by the laws of the State of Idaho, I hereby grant and confirm to John C. Bledsoe

of Twin Falls, County of Twin Falls, State of Idaho, the holder and owner of said Permit No. 7809, a perpetual right, dating from June 1, 1911, to the use of 1.5 cubic feet per second of the water of an artesian well

in the County of Twin Falls, State of Idaho, or so much thereof as may be necessary for the purposes hereinafter mentioned to be diverted at a point on the 1st day of August, A. D. 1912, to the 1st day of August, A. D. 1914.
