CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 4.0 afa per acre for the lands above.

The following adjustments¹ were made on the field report to reflect department standards:

1. Rate of diversion.
 - a. Irrigation = acres x cfs/acre
= 1.5 x 0.03
= **0.05** cfs.
 - b. Domestic, 1 home, in-house use = **0.02** cfs.
 - c. Maximum rate of diversion = a + b
= 0.05 + 0.02
= 0.07 cfs.

MEMORANDUM

DATE: JULY 31, 1992 139351
TO: WATER RIGHT HOLDERS AND APPLICANTS IN TWIN FALLS
LOW-TEMPERATURE GEOTHERMAL MORATORIUM AREA
FROM: NORM YOUNG
RE: EXTENSION OF MORATORIUM

Enclosed is a copy of an order extending the order designating the Twin Falls Low-Temperature Geothermal Moratorium Area. I appreciated the attendance of many of the users at the public information meeting on this matter held in Twin Falls last week. I understood those in attendance favored an extension of the moratorium, and some of the users were encouraging that the size of the area be increased and that additional actions be taken to protect artesian pressures. I indicated at the meeting that the moratorium would be extended without modification to keep its continuity and that IDWR will schedule as time and resources permit a review of the following matters:

- Expansion of the area.
- The need for repair or reconstruction of wells in and adjacent to the area.
- Evaluate the adequacy of the agreement to manage pumpage to prevent withdrawal in excess of the average rate of recharge or to maintain artesian pressures in the public interest.
- Review need for and adequacy of monitoring programs.

With respect to monitoring, the data recorded by the USGS from the well at the Nazarene Church is an important part of the information now being collected. The Church will soon be finished and will be using water from the well. Data from an unused well is more reliable for evaluating aquifer conditions. USGS and IDWR are evaluating alternatives for replacing this source of data. If you are aware of a well that is finished into the low-temperature geothermal aquifer and is not being used, please call Loren Holmes, IDWR Regional Manager at Twin Falls, a call at 736-3033.

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF THE TWIN FALLS	)	ORDER EXTENDING A
GROUND WATER MANAGEMENT AREA	)	FIVE YEAR
	)	MORATORIUM

WHEREAS, on January 11, 1984 the director of the Idaho Department of Water Resources (IDWR) designated an area in Twin Falls and Jerome Counties as a ground water management area (GWMA) pursuant to Section 42-233B, Idaho Code, because the thermal - artesian ground water system appeared to be approaching the conditions of a critical ground water area; and

WHEREAS, on July 24, 1987 the director of the IDWR established a five year moratorium pursuant to Section 42-1805(7), Idaho Code, in the area within the GWMA lying within Townships 9 & 10 South and Ranges 16,17 and 18 East of Boise Meridian, because the area continued to experience significant interference between wells as evidenced by a continued decline in artesian pressures; and hydrogeologic data was not available to adequately evaluate the rate that thermal ground water is recharged to aquifers in the area; and

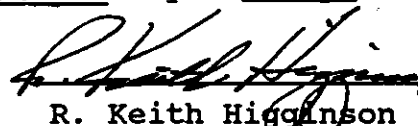

WHEREAS, hydrogeologic data collected over the past five years indicate artesian pressures have not reached equilibrium and continue to decline. Data needed to make an accurate determination of the average rate of recharge to the thermal aquifer are not yet available.

NOW, THEREFORE, pursuant to Section 42-1805(7), Idaho Code, and Rule 7 of the adopted rules and regulations for water appropriation, it is hereby ordered that:

(1) The order which established a moratorium on applications for the use of low temperature geothermal ground water in the Twin Falls GWMA dated 22nd day of July, 1987 is extended.

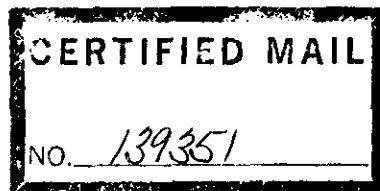

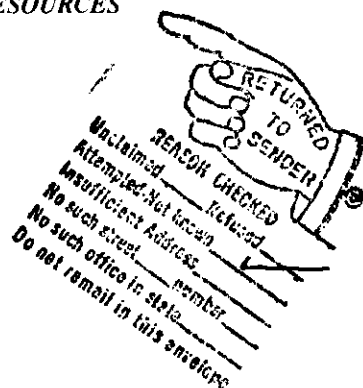

(2) The provisions of this order are effective for five years from the date issued unless rescinded or modified by the order of a court of competent jurisdiction or unless extended by the order of the director.

Re: Permit No. 47-7908

This office acknowledges receipt of the assignment conveying the above referenced permit to you. The assignment has been entered into the department's records.

The department received the proof of beneficial use form. The next step is for the department to conduct the field inspection to confirm and determine the extent of beneficial use. I cannot tell just when the representative from our Southern Regional office will conduct the exam, but he will try to contact you or your representative prior to being in the area.

If you have any questions, please contact me.

RE: Assignment of Permit 47-7908 to Robert & Louise
Scharnhorst

We have made several attempts to contact the original permit owner, David M. Carty, to have the assignment form notarized. His current address is unknown. I finally sent the original assignment form to the Scharnhorst's in hopes they would know the whereabouts of the Cartys and kept a copy of it for the file. They cannot locate them either.

In discussion with Sharla, it was decided to accept the Warranty Deed in lieu of a notarized assignment form.

Dear Property Owner(s):

This office has sent out a copy of the enclosed letter and some forms to David M. and Gwen M. Carty, the permit holder(s) of record. The letter was returned to the department. I contacted the County Assessor's office and found that you are either now acquiring or have acquired a portion or all of the property covered under this permit.

If you are using the water for the uses described on the permit and you wish to continue with the process of developing a water right under this permit, you may want to have the permit in your possession or have both your names on the permit. If so, I suggest you complete the enclosed assignment form by having it signed by either David or Gwen Carty before a notary public and returning it to this office. At that time, the department will acknowledge the assignment, conveying the permit to you.

If this office can be of further assistance, please feel free to contact me at 327-7900.

RE: PERMIT NO. 47-07908

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

Dear Mr. Saxton:

Department of Water Resources

I am writing to request that
my water permit application
number 47-7908 be approved.

I believe that the application should
be approved because of the small use
from the well, there is apparently no
decline in the water level and
we are not seeking hot or warm
water for geothermal use.

The well was drilled over two
years ago and is currently being used
for domestic purposes. The well is
drilled to a depth of 300 feet with
standing water at 196 feet. The
water temperature is 52 degrees F.
The well is the only ^{reliable} source of water
for our residential use and for yard
irrigation.

Thank you
