RE: CHANGES TO EXAMINER RECOMMENDATIONS

DATE: 27-FEB-1989

The diversion capacity and rate of diversion should be changed from the examiner's recommendations. The capacity of the system is .3757 cfs, as measured for 32 nozzles; the recommended volume should likewise be limited to .38 cfs. An error was made in summing the diversion capacity at the well (.452 cfs) and the diversion capacity at the nozzles (.3757 cfs), to equal the total diversion capacity of the system (.83 cfs). The diversion capacity and volume should both be limited to the .38 cfs diversion capacity measured for the nozzles.
