# REQUEST FOR EXTENSION OF TIME TO PROVIDE ADDITIONAL TIME IN WHICH TO SUBMIT PROOF OF BENEFICIAL USE FOR A WATER RIGHT PERMIT

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time in which to complete development of a water right under the provisions of Section 42-204, Idaho Code.

Permit No. 47-7741

Name(s) of Permit Holder: David R Millard dba Crystal Springs Ranch Ltd.

Post Office Address: Route 1 Box 119 Filer, Idaho 83328

Telephone No. (208)326-3378 Filer

Date Proof Is Due: April 1, 1991

(206)854-1138 Seattle

Describe what work has been completed toward the development of this water right: Diversion Facilities  
(This must be filled out! If no work has been completed, show "none".)

Hot water well w/4" liner, valving, piping and fourteen (14) concrete  
raceways... Hot water has been diverted to two (2) residents, shop and  
outdoor spa. Repair to ponds is currently underway and tenant farmer is  
preparing to plant lower 10 acres for irrigation. Costing \$ 100,000.00  
with pond effluent. Siltation ponds are complete.

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

A lawsuit with former partner/builder (presently in appeal) stopped  
construction of ponds. Applicant is working to start pond operation and  
field irrigation this season (1991)...

Permit holder(s) request an extension to April 1, 19 92.

This matter having come before the Idaho Department of Water Resources (IDWR) as a requirement of Section 42-203D, Idaho Code, the Department Finds, Concludes and Orders as follows:

FINDINGS OF FACT

1. Section 42-203D, Idaho Code, directs IDWR to review all permits issued prior to July 1, 1985, located within the Swan Falls Trust Water Area, to determine if water was beneficially used prior to said date.

2. If water was not beneficially used until after July 1, 1985, Section 42-203D further directs IDWR to review the permit under the provisions of Section 42-203C, Idaho Code.

3. Section 42-203C requires IDWR to determine whether diversion of water under a permit issued prior to July 1, 1985, causes a significant reduction of trust water available for power production and, if there is a significant reduction, to determine whether the reduction is in the public interest.

4. Permit No. 47-7741 (permit) was issued to David R. Millard, dba Crystal Springs Ranch (permit holder) authorizing the diversion of 2.0 cfs of groundwater for irrigation of 30 acres.

5. IDWR records show that 16 acres authorized to be irrigated under Permit No. 47-7741, are irrigated with other water rights affected prior to July 1, 1985.

**MICROFILMED**

MAR 12 1990

6. Water diverted and used on or after July 1, 1985 for the irrigation of land under the terms of this permit is trust water.

7. The development and use of groundwater authorized under this permit does not cause a significant reduction of trust water.

#### CONCLUSIONS OF LAW

1. The water authorized for diversion under Permit No. 47-7741 is trust water.

2. The use of water under the permit satisfies the provisions of Sections 42-203C and 42-203D, Idaho Code.

3. An order continuing the permit should be issued.

#### ORDER

IT IS HEREBY ORDERED that Permit No. 47-7741 is valid and may CONTINUE as provided in Section 42-203D, Idaho Code, subject to the following additional conditions and limitation

1. Proof of construction of works and application of water to beneficial use shall be submitted to IDWR on or before April 1, 1991.

2. The use of trust water authorized by this right is subject to review 20 years after the date of this order to determine availability of trust water and to reevaluate the public interest.

3. The construction of diversion works must be commenced within one (1) year of the date of this order and shall proceed diligently and uninterruptedly to completion unless temporarily interrupted by circumstances over which the permit holder has no control.

4. Diversion and use of trust water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

**MICROFILMED**

MAR 12 1990

5. The Director retains jurisdiction of this right to change, add or remove any requirement as determined to be appropriate.

6. All conditions of approval contained in Permit No. 47-7741 are incorporated into and made a part of this order.

Dated this 1<sup>st</sup> day of March, 1990.

including well, valving, piping and irrigation system have been completed.

Piping to one residence and shop for heating has been installed. Restoration work on the well, including cleanout and casing to stabilize the flow has been completed. In contemplation of amendment, fish ponds have been constructed.

Costing \$50,000.00

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

A change in the nature of the use of the water has been requested by amendment of the permit. This will allow utilization of the water for a higher and better use under the policy of the State of Idaho. This permit has been a part of the Swan Falls suit commenced by Idaho Power Company in Ada County, Civil Case No. 81375, and has never been dismissed from that suit and said suit has not been dismissed. Uncertainty as to any water rights obtained under the cloud of that legal action has prevented prompt development of this permit.

Permit holder(s) request an extension to October 1, 1990.

Department of Water Resources

David R. Millard dba Crystal Springs of P. O. Box 109, Buhl, Idaho 83316  
(Name) Ranch (Address)

State of IDAHO, deposes and says:

That he is the holder, or the duly authorized agent of the holder\*, of Permit to Appropriate the Public  
Waters of the State of Idaho No. 47-7741.

That under the terms and conditions of said permit, work thereunder was required to be completed on or  
before October 1, 1986.

That he has heretofore performed the following work described under said permit: Diversion  
facilities, including well, valving, piping, and irrigation system, have been  
completed and piping to one residence and shop for heating has been installed.  
Restoration work, i.e., cleanout and casing, on well has been initiated to  
stabilize flow. Costing \$40,000

That he is unable to complete the remainder of the work within the required time for the following  
reasons, to-wit: Original flow of well has decreased due to caving and method of restoring  
flow to that required for proposed project has not been determined. Discharge is  
to be incorporated into expanded project requiring additional facilities now under  
construction.

Wherefore, he asks that the Department of Water Resources extend the time for the completion of  
obligations under said permit to October 1, 1988.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

IT IS HEREBY ORDERED that the above application for extension of time be APPROVED and the time  
within which to submit proof of beneficial use is extended to October 1, 1988.

IT IS FURTHER ORDERED that the permit be REINSTATED and the priority date advanced to  
June 12, 1981, pursuant to Sec. 42-218a, Idaho Code.

Signed this 31<sup>st</sup> day of October, 1986.

PROOF DUE NOTICE

RE: PERMIT NO. 47-07741

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before April 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson

Re: Permit No. 47-7741  
Our File No. 87-1-054

Dear Rita:

I was asked by Dave Millard from the Crystal Springs Ranch partnership to provide you with some information about the litigation pending in the appeals court that affects the ranch's water right permit.

The ranch partnership contracted to build catfish ponds on the ranch property in 1986. The ranch intended to use the water from Permit No. 47-7741 to grow catfish. A dispute arose over the quality of the ponds built and the price to be paid the contractor. On December 3, 1986, the contractor filed a mechanic's lien against the property, including the well. On December 15, 1986, the contractor filed a complaint to foreclose the lien. The trial was held in January of 1988. Part of the action involved a dissolution of the Crystal Springs Ranch partnership. An appeal was filed from the trial court's decision. The primary issues concerned defective construction of the fish ponds. The Idaho Court of Appeals heard oral argument on September 10, 1990. No decision has yet been made by the Idaho Court of Appeals. The Crystal Springs Ranch partnership has been dissolved, but not wound up. No formal dissolution and winding up can be concluded until the decision is received from the Idaho Court of Appeals. I don't expect the fish ponds themselves can be put into use until this litigation is finally concluded.

RE: Extension Of Time Water-Right Permit No 47-7741

Dear Rita:

We just received your letter which was finally rerouted to us in Seattle from the ranch. We have asked our attorney, Jeff Hepworth of Hepworth, Nungester and Lezamiz, to give you a detailed account of the type and extent of the litigation over the construction of the rearing ponds. This litigation continues through the appeal process in the higher courts.

We authorized construction of the ponds in 198\_ to a local contractor, Dan Weaver, who quoted what we understood to be lump sum cost. After he had doubled his quote without finishing the work, we stopped the project. Weaver sued us for non-payment ... The court ruled that he was not due his billings or attorney costs! Our appeal is against a partner, Lupiter, who appeared to be in collusion with Weaver to the detriment of our partnership. This part of the litigation is still pending in the Appeals Court.

One of the key factors in our prevailing against the contractor, was his extremely poor workmanship in constructing the ponds. These deficiencies could not be corrected until the legal action was finalized. Consequently, we were forced to delay these corrective measures, until recently, to make the ponds usable. We have requested an extension of time to optimize the use of our hot water.

Best Regards,

Crystal Springs Ranch

Dear Mr. Millard:

Re: Permit No. 47-7741

The request for extension of time states that the delay in completion of this project is litigation. Before the department takes final action, more information about the litigation is needed.

Please provide documentation regarding the litigation which demonstrates how the litigation brings the title of water into question, when the litigation began and when, if completed, it was resolved. The department will then review this information and if possible, grant an extension for period of delay caused by the litigation.

Please return this documentation within thirty (30) days.

If you have any questions, contact this office.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

OF THE

STATE OF IDAHO

IN THE MATTER OF PERMIT )

NO. 47-7741 IN THE NAME OF )

DAVID R. MILLARD )

CONTINUATION ORDER

This matter having come before the Idaho Department of Water Resources (IDWR) as a requirement of Section 42-203D, Idaho Code, the Department Finds, Concludes and Orders as follows:

FINDINGS OF FACT

1. Section 42-203D, Idaho Code, directs IDWR to review all permits issued prior to July 1, 1985, located within the Swan Falls Trust Water Area, to determine if water was beneficially used prior to said date.

2. If water was not beneficially used until after July 1, 1985, Section 42-203D further directs IDWR to review the permit under the provisions of Section 42-203C, Idaho Code.

3. Section 42-203C requires IDWR to determine whether diversion of water under a permit issued prior to July 1, 1985, causes a significant reduction of trust water available for power production and, if there is a significant reduction, to determine whether the reduction is in the public interest.

4. Permit No. 47-7741 (permit) was issued to David R. Millard, dba Crystal Springs Ranch (permit holder) authorizing the diversion of 2.0 cfs of groundwater for irrigation of 30 acres.

5. IDWR records show that 16 acres authorized to be irrigated under Permit No. 47-7741, are irrigated with other water rights ~~registered~~ prior to July 1, 1985.

**MICROFILMED**  
JUL 21 1991

6. Water diverted and used on or after July 1, 1985 for the irrigation of land under the terms of this permit is trust water.

7. The development and use of groundwater authorized under this permit does not cause a significant reduction of trust water

#### CONCLUSIONS OF LAW

1. The water authorized for diversion under Permit No. 47-7741 is trust water.

2. The use of water under the permit satisfies the provisions of Sections 42-203C and 42-203D, Idaho Code.

3. An order continuing the permit should be issued.

#### ORDER

IT IS HEREBY ORDERED that Permit No. 47-7741 is valid and may CONTINUE as provided in Section 42-203D, Idaho Code, subject to the following additional conditions and limitation

1. Proof of construction of works and application of water to beneficial use shall be submitted to IDWR on or before April 1, 1991.

2. The use of trust water authorized by this right is subject to review 20 years after the date of this order to determine availability of trust water and to reevaluate the public interest.

3. The construction of diversion works must be commenced within one (1) year of the date of this order and shall proceed diligently and uninterruptedly to completion unless temporarily interrupted by circumstances over which the permit holder has no control.

4. Diversion and use of trust water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

**MICROFILMED**  
**JUL 21 1991**

5. The Director retains jurisdiction of this right to change, add or remove any requirement as determined to be appropriate.

6. All conditions of approval contained in Permit No. 47-7741 are incorporated into and made a part of this order.

Department of Water Resources

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time in which to complete development of a water right under the provisions of Section 42-204, Idaho Code.

Permit No. 47-7741Name(s) of Permit Holder: David R. Millard d/b/a Crystal Springs Ranch Ltd.Post Office Address: Route #1, Box 119, Filer, Idaho 83328Telephone No. 326-3378Date Proof is Due: October 1, 1988

(This must be filled out if no work has been completed, show "none".)

including well, valving, piping and irrigation system have been completed.

Piping to one residence and shop for heating has been installed. Restoration work on the well, including cleanout and casing to stabilize the flow has been completed. In contemplation of amendment, fish ponds have been constructed.

Costing \$50,000.00

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

A change in the nature of the use of the water has been requested by amendment of the permit. This will allow utilization of the water for a higher and better use under the policy of the State of Idaho. This permit has been a part of the Swan Falls suit commenced by Idaho Power Company in Ada County, Civil Case No. 81375, and has never been dismissed from that suit and said suit has not been dismissed. Uncertainty as to any water rights obtained under the cloud of that legal action has prevented prompt development of this permit.

RE: PERMIT NO. 47-07741

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before April 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. Dear Mr. Millard:

Enclosed is an order that authorizes you to continue development under Permit to Appropriate Water No. 47-7741. Please note in condition #1., page two of the order that you must develop your system and beneficially use the water prior to April 1, 1991. Failure to beneficially use the water before April 1, 1991, could result in a loss of your water right permit.

Also enclosed is a copy of the approved extension of time request. Please be advised that the department has granted this extension of time based on due diligence. It is important that you work diligently toward the completion of this project during the construction period allowed. The department may not be able to grant additional requests.

Please note the conditions of approval contained in your permit and the continuation order. You must comply with the conditions to fully complete beneficial use.

Re: Permit NO. 47-7741

Dear Mr. Millard:

I am finally writing in response to your letter of November 1, 1989 concerning the above referenced permit. You may recall that my involvement with this permit concerned reprocessing under the Swan Falls rules and regulations. After sending my last correspondence, the file somehow fell through the cracks and I have not been able to review your last correspondence until very recently. I apologize for the delay in response time.

As I review your last letter and attached information along with aerial photo data here at the department, I concur with your claim that approximately 16 acres of land under the application had been irrigated prior to July of 1985. Water which will be used for completing the irrigation of the remaining 14 acres must be considered trust water. The undeveloped portion of the permit therefore is subject to the reprocessing requirements of Section 42-203D, Idaho Code.

Since the amendment of this permit was advertised recently (i.e.; in the past 12 to 14 months), and because the department contributed to the delay in reprocessing of this permit, I am waiving the readvertisement requirement. I have recommended that the department proceed with issuing a continuation order which will allow completion of the projects proposed by the amended permit. The department will simultaneously process your last extension request and assign a new proof due date. The continuation order should reflect this new proof due date. You should receive a copy of the order in the next several weeks.

Please feel free to contact me if you have questions concerning this matter. Again, I apologize for the delays in responding to your last correspondence and in reprocessing the permit.

Sincerely

Tim Luke

Re: Permit No. 47-7741 (Geothermal Well)

Dear Tim:

In response to your letter dated September 7, 1989, wherein you asked for evidence that our hot water was used for irrigation prior to July 1985, we state the water was, in fact, used for irrigation prior to 1985. We attached hereto a print of our 100 scale topographic map whereon we have shown the areas of the ranch which were sprinkled and/of surface irrigated with the hot water. Due to the temperature of the water, it had to be cooled by sprinkling, or run on the surface a distance, before crops could be raised!

Area A was sprinkled with the hot water, which 4" aluminum main-line still is connected from the well across our existing access road to the point where the handlines were connected. The area sprinkled was approximately four acres. At the time of sprinkling, the field was in grass hay.

Area B was surface-irrigated with the hot water. The area so irrigated comprised approximately twelve acres of pasture land. Due to the number of surface boulders, the only practical use for this land is pasture.

It has always been our objective to divert the hot water into the existing concrete rearing ponds shown on the attached plan, in order to cool the water, utilizing the heat to raise fish, and the warm water exiting the most northerly ponds to irrigate the northerly fringe of Area B and Area C. Area C is relatively flat with excellent soil, ideal for a crop like grapes. The size of these two areas proposed to be irrigated by said warm water is approximately ten to twelve acres.

The amendment approved for the hot water well dated August 30, 1989, changed the place of use from Areas A and B to Areas B and

C. The question I have, assuming your aerial photos and a field trip will verify this use, is "Do the four acres of grass hay land and twelve acres of pasture off-set the proposed ten to twelve acres of grapes or similar crop?" Please advise whether or not the department must advertise the new agricultural use.

Best regards,

Dear Mr. Millard:

**NOTICE OF PENDING ORDER CANCELLING PERMIT**

On October 23, 1981, the Department of Water Resources (department) issued Permit No. 47-7741 which authorized the diversion of 2.0 cfs of water from a groundwater source for the irrigation of 75 acres.

The department mailed a letter and questionnaire to you on May 24, 1989, in connection with the permit. The letter provided notice that the department was reviewing the permit in connection with development which was not complete prior to July 1, 1985.

This letter also requested that you return the department's questionnaire concerning any prior development under the permit and/or your plans for pursuing completion of the proposed project. The correspondence further requested that you submit with the questionnaire either a readvertisement fee in the amount of twenty (\$20) dollars and/or evidence showing that development under the permit was complete prior to July 1, 1985. Finally, the letter notified you that failure to submit the required fee or information within 30 days of the date of the letter was cause for the department to cancel the permit.

The purpose of this letter is to provide a second and final opportunity for you to submit the requested information. If you fail to respond to this inquiry within fifteen (15) days of the date of this letter, the Department will issue an order cancelling the permit pursuant to Water Appropriation Rule 4,2,3,4.

If no development has been completed as authorized by the permit, and you are no longer interested in pursuing the development, please complete and return the enclosed relinquishment form.

Dear Mr. Millard:

I have again reviewed the file for the above referenced permit. This latest review shows that the department has officially approved the application for amendment.

You may recall our last conversation in which we discussed the fact that this particular permit had been identified or named in the Swan Falls suit. Our records indicate that the irrigation component of the permit was undeveloped prior to July of 1985. New statutes and rules resulting from the settlement of the suit require that such permits be re-advertised. You may further recall correspondence sent to you by the department earlier this summer which notified you that we were reviewing the permit as required by the Swan Falls settlement. This notice asked that you submit a \$20.00 re-advertisement fee or evidence to show that the lands under the permit had been irrigated prior to July of 1985.

Since the approval of the amendment was still pending during our last correspondence, I believe that we agreed to put the Swan Falls re-advertisement matter on hold. Now that the amendment has been approved, I would like to proceed with getting the permit through the Swan Falls processing requirements. I cannot recall if you had evidence showing that a portion of the irrigation component under this permit was developed prior to July of 1985. Review of your latest extension request (filed in August, 1988) indicates that the irrigation use was not developed.

Please respond to this letter by providing either the \$20.00 re-advertisement fee or evidence of irrigation development prior to July of 1985. Please feel free to call me directly if you have have questions concerning this matter.

\* No change requested for this use, the reduction is based on a more accurate estimate of rate of flow required.

\*\* No information provided on annual volume required.

\*\*\* Total as listed on the Application for amendment.

**CONCLUSION**

**RECEIVED**

MAR 12 1990

The amendment as submitted to the department would result in an expansion of the volume allowed under the right from 300 acre feet to 924 acre feet. Therefore adjustment to the rate of flow is required to prevent more than an annual diversion of 300 acre feet.

#### ADJUSTMENT

The annual volume under this right should not exceed 300 acre feet for all uses identified on the right. The water used for irrigation was reduced from 300 acre feet to 120 acre feet leaving 180 acre feet available for fish propagation. Normally the rate of diversion is based upon the maximum rate needed at peak demand. However in this evaluation the rate of flow adjustment is made by dividing the annual volume available by the period of diversion. This produces a rate of flow of 0.24 cfs.

#### ALLOWED AMENDED USES

|                    | RATE | ACRES | ANNUAL<br>VOLUME | CONSUMPTIVE<br>USE |
|--------------------|------|-------|------------------|--------------------|
| Irrigation         | 0.60 | 30    | 120              | 42                 |

| Fish Propagation   | 0.24 | n/a   | 180              | 42                 |
|                    | ---- | ----  | -----            | -----              |

#### CONDITIONS OF APPROVAL

1. The maximum rate of diversion under this right shall not exceed 0.84 cfs.
2. The maximum rate of diversion for irrigation shall not exceed 0.60 cfs; the maximum rate of diversion for fish propagation shall not exceed 0.24 cfs nor shall the annual volume exceed 180 acre feet.

RE: PERMIT NO. 47-7741

Dear PERMIT HOLDER:

Due to the Swan Falls litigation, development proposed by the enclosed permit may have been delayed. The Department is presently reviewing the permit and may authorize completion of development proposed under the permit.

The purpose of this letter is to determine: (1) the extent of development under the permit, and (2) your continued interest in developing or completing development under the permit.

Enclosed are two forms which will help the Department expedite the reprocessing of the permit.

Please complete and return the enclosed questionnaire if you wish to continue with your plans of development or have completed all or a portion of your development before July 1, 1985.

Please complete the enclosed relinquishment form and return it to the Department if you have abandoned or have no interest in continuing with your plans for development of the project.

If the entire project was not completed prior to July 1, 1985, and you still wish to proceed with your plans of development, then you must submit a \$20.00 re-advertisement fee to the Department as required by Water Appropriation Rule 4,2,3. and Section 42-221F, Idaho Code.

Failure to return the questionnaire and pay any required re-advertisement fee within thirty (30) days of the date of this letter is cause for the Department to cancel the permit.

RE: Permit No. 47-7741  
Request for Extension of Time  
Application for Amendment

Dear Loren:

The existing Permit No. 47-7741 is for 1.5 cfs for the irrigation of 75 acres and .5 cfs for heating and cooling of two residences. Dave Millard, d/b/a Crystal Springs Ranch, has, as you know, expended substantial sums in developing the hot water well under this permit. Under recently established policy of the State of Idaho, the contemplated use of this water is not the highest use recognized by the State of Idaho. This has also been recognized by Mr. Millard and he therefore is submitting herewith his Application for Amendment of that permit. Concurrently, he is also submitting herewith his Request for Extension of Time for Completion of the Works and Application to Beneficial Use.

We recognize that there has been one previous extension of time on this permit. However, this permit was included in the Swan Falls suit commenced by Idaho Power Company in Ada County, Civil Case No. 81375, and to this date has not been dismissed from that action. It has therefore been impossible to promptly proceed in the completion of the works and application of this water to beneficial use in view of the uncertainties caused by the above referred to civil action of Idaho Power Company. In view of these legal proceedings, we respectfully request that a second extension of time be granted for the full development of this water right under Permit No. 47-7741. Although a formal dismissal of Civil Case No. 81375 has not been entered of record, it is our understanding that the Swan Falls Agreement has been fully implemented at this time and that said action has been dismissed in the very near future. It was not until

most recent events that the permit holder could be assured that if he properly proceeded to develop his water right under the permit that a further cloud on the permit would not exist as a result of the civil action.

If you need any further information to consider these matters, please feel free to contact this office at any time. I should also point out to you that the Application for Amendment is conditioned upon receiving an extension of time for completion of the works. If the extension of time is not granted, it will be necessary for the permit holder to proceed to file proof of completion of works and application for beneficial use under the original permit, which includes substantial irrigation with the hot water involved.

Very truly yours,

Re: Application for Amendment, 47-7741

Dear Mr. Millard:

The Department of Water Resources acknowledges receipt of your application for amendment of a permit.

This office will be advertising the application in the Times News on 11/24 & 12/1/88. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

RE: PERMIT NO. 47-7741 - REQUEST FOR EXTENSION OF TIME

Dear Mr. Millard:

The department has reviewed the request for extension of time submitted in connection with the above referenced permit. Since the permit is within the Swan Falls trust water area and has been named in Ada County Civil Case No. 81375 and not dismissed, the department will hold the request without action until the permit is reprocessed in compliance with the provisions of section 42-203D, Idaho Code.

The issuance of an order on March 25, 1988 by the Federal Energy Regulatory Commission (order effective May 24, 1988) made the Swan Falls Agreement effective. As a result of the order, the department is determining which permits can be reprocessed in a given year up to the 20,000 acres per year limitation.

When additional development under the permit can be authorized, the department will consider the request for extension of time and will advise you accordingly of our action.

L. GLEN SAXTON, Chief

LAPSE NOTICE

RE: PERMIT NO. 47-07741

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced water permit has lapsed. This office did not receive either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time. You were provided the proper form in our proof due notice to you dated July 31, 1988.

Your permit cannot be reinstated unless you submit proof of beneficial use or submit an extension of time request showing reasonable cause for delay. Either the completed proof of beneficial use submittal (including the examination fee or a completed field examination report) or the extension request form together with the \$15 fee must be received by this department within sixty days of the date of mailing of this lapse notice or the permit will no longer be of any force or effect.

A proof of beneficial use form and a request for extension of time form are again enclosed for your use. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a governmental agency or by litigation which might bring title to the water in question.

RE: PERMIT NO.        47-07741

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

FROM: John Beal *JB*  
DATE: April 5, 1988  
SUBJ: Fred Henry, Crystal Springs Well

I agree that I should have requested more information and perhaps a drilling permit for this well repair. Since I did give Mr. Henry the go ahead in 1987 and since the term modification is not currently defined and since he did not remove or alter the existing casing, I am not requesting a drilling permit.

RE: Crystal Springs Ranch Well

Dear Mr. Henry:

Subsequent to your discussing this well with Gary Funderburg in our Twin Falls Office, I have reviewed your well log, Idaho Code, and rules and regulations.

Based upon this review, I believe the work you performed could require a drilling permit but I believe it may also be excluded from the permit requirement. In accordance with our discussion in October of 1987, no drilling permit or fee is required.

You and the well owner are advised that this allowance or approval does not constitute approval of well construction.

I suspect the well is in better condition from a waste standpoint than it was, but additional requirements of the Department are not being waived.

If you have not already done so, please send the original well log and a sketch of the construction back to the Department.

If you have any requests like this in the future, please submit a written proposal so that we both know what is occurring. Thank you for your consideration.

 FROM: John Beal  
 DATE: March 30, 1988  
 SUBJ: Well Repair -  
 Does not require drilling permit & bond per 42-233

- On October 16, 1987, driller Fred Henry (No. 86) called to ask - If he runs a liner inside existing well and "cleans-out" well, will drilling permit be needed. He told me it was the Crystal Springs well. No deepening or cement work was anticipated.

I told him no drilling permit required.

- I told Loren Holmes and Leah, but I apparently failed to inform Gary Funderburg of this approval. See letter dated March 15, 1988.

- Does job require drilling permit?

- To say well was deepened is not a good argument. Originally drilled to 1420'. Henry says 1430'. This is not enough to dispute.

- What was done?

1. Hole was cleaned out.

2. Liner? Casing?

4" placed from 505' to 1419'

6 5/8" placed from 82' to land surface.

- What was not done?

1. Existing casing was not changed.

2. Existing seal was not changed.

- Idaho Code requires a drilling permit prior to constructing or drilling a well.

Drilling is defined as constructing a new well or deepening or modifying an existing well.

Modifying is not defined by Idaho Code.

Our proposed rules state modifying is change in the construction of the well which deepens the well, enlarges the

MICROFILMED

well or may cause the well to not meet minimum standards.

I do not think that Henry modified the well by this definition.

In the future this will require a drilling prospectus before any approvals are given. I should have done this here.

RE: Well Modification

Dear Mr. Millard:

The Department has reviewed your well modification proposal. As you may be aware, there is substantial concern for the hot water resource in the Twin Falls and Buhl area. The well driller report for your well indicates that the well bore has not been sealed from 110 feet to total depth. It is probable that several distinct zones are present rather than a continuous aquifer and that your well is causing mixing of the zones.

While the Department does not object to your proposal of adding a liner and drilling deeper, staff personnel do not believe, however, that this well will produce at the stated temperature and flow at the depth and diameter proposed.

The well construction should be modified to case and seal out the upper, cold water zones. Based upon the well driller's report submitted by Elsing and well reports for nearby wells, the well should be sealed at least to the 620 foot depth.

Please notify the Department when you begin work. Your driller must provide a detailed report on well construction to show that the upper zone was adequately sealed.

If you have any questions or comments, please contact me.

Sincerely,

JOHN E. BEAL, Manager  
Groundwater Protection Section

Dear Mr. Brockway:

RE: 47-7741

Enclosed is the Request for Extension of Time on Permit No. 47-7741 with Check No. 1665, 92-1/1241, submitted to the Department September 17, 1986.

However, before we can accept the extension for review, we need to have a copy of the power of attorney authorizing you to act on behalf of the owners of Permit No. 47-7741 or the signature of Dave Millard or Roy Bylund, owners of the permit.

Please return the extension form signed by one of the owners or copy of power attorney along with the check on or before October 9, 1986.

If you have any questions, please do not hesitate to contact us.

Sincerely,

ROBERTA GARRETT  
Records Supervisor

RE: Crystal Springs Ranch Well Restoration Project

My initial reaction to this project - why spend the money? - has not changed. I don't see how the perforated casing is going to buy them more flow. The perforations will eventually fill in with the clay that they're having problems with now. Where are they going to encounter 130°F water? That is too hot for that area. Also, since they drilled the well, the pressures have been declining in all of the geothermal wells. Based upon all of the other geothermal developments, I doubt if the well will again produce 1000 to 1500 gpm. Finally, I don't think that they will gain much by drilling deeper. I doubt if the flow or temperature will increase substantially.

If they want to rehabilitate the well, I would recommend only using perforated casing at the producing zones. Unfortunately, based upon the driller's log that could be anywhere! I think that the well could be rehabilitated, but more information is needed. They would be money ahead to consider other alternatives to their present plan.

In a related matter, The USGS test well north of Filer is back to where it was before this well was cleaned out. Also, it appears that this well is getting clogged up again because the shut-in pressure is back to 12 psi.

If you have any questions, please give me a call.

Subject: Permit No. 47-7741 Application for Time Extension

Dear Loren:

The proof of beneficial use for Permit No 47-7741 issued to Dave Millard and/or Roy Bylund d/b/a Crystal Springs Ranch is due October 1, 1986. This permit is for hot water for heating and cooling and irrigation.

The well for this permit was drilled in April 1981 and water has been used for domestic heating and irrigation. Recent problems with the well resulting in decreased flow indicate that sloughing has occurred in the lower portions of the open hole. As we had discussed, Elsing Well Drilling has attempted to open the hole, however, they were unable to do so without jeopardizing the drilling tools due to caving.. Work has suspended pending decisions on the best approach to opening the hole and sustaining the flow which existed prior to the problem. Some alternatives are to extent casing past the caving area or redrill the hole.

As you know, Crystal Springs Ranch is planning a large development which will incorporate water from this source and additional sources to support heating, irrigation and aquaculture. Applications for permits and amendments to support this development have been submitted to your office within the last six months.

Because of the inability at this time to recover the previous flow rate and the incorporation of this well into the larger project, we are requesting an extension of time to submit proof of beneficial use. It is estimated that it will require at least two years to evaluate the well, make necessary repairs or redrill, and incorporate into the new proposed project. The request for extension is for two years until October 1, 1988. The completed request for extension of time and check for the \$15.00 fee is enclosed.

Thank you for your consideration of this request.

Sincerely,

*C.E. Brockway*

MEMORANDUM

FROM: John Beal  
DATE: September 11, 1986  
SUBJ: Modification of Well

I do not believe that this change is going to effect the well one way or another. I doubt they will get the increase in flow they want.

Original Well Construction

I do not believe the well is properly constructed.

Several cold water wells within one mile are 200 feet deep.

Not having information on temperature and pressures between 140 and 1400 feet, I do not know where the well should have been cased and sealed to.

I propose the attached approval.

I do not expect anything <sup>important</sup> back from Elsing Well Drilling.

Well is in the T.F.G.W.M.A.

Their plan is to deepen the well  
from 1420' to 1620' and add perf. casing  
in the open hole from 620' to 1300'

RE: Crystal Springs Ranch Well -  
Sec. 12, T9S, R15E

Dear Mr. Elsing:

As you may know, Crystal Springs Ranch is proposing to deepen their well. Enclosed is a copy of the log you submitted for the well drilled in 1981. Please provide the following information at your earliest convenience.

- o What was the well bore diameter?
- o Your log reports water from 141 feet to total depth. Were there any dry zones?
- o How did the temperature and pressure change with depth?

Thank you for your time. A quick response would be appreciated.

Sincerely,

JOHN E. BEAL, Manager

SUBJECT: Restoration of Crystal Springs Ranch Well,  
SW1/4SW1/4, Sec. 12, T.9S, R.15E.

The proposed restoration involves placing a perforated 4-5/8 inch diameter casing to a depth of 1300 feet, and drilling the hole an additional 200 feet in depth. My first question is why the yield of the well has declined from 1000-1500 gpm to 600 gpm? Is this a case similar to Royal Catfish (Professional Investors)? The driller indicates encountering water in each and every zone from 141 feet to total depth, which I seriously question. I have no idea what temperature or quality of water is found at shallower depth, but do know the shallower system is used for domestic purposes. With the 6-inch casing not cemented in place, once again we have free communication of waters from bottom to top in the hole, and therefore some potential for contamination of shallower groundwater supplies and waste of the geothermal resources.

casing 8  $\frac{5}{8}$ " cemented to 110'

casing 6  $\frac{5}{8}$ " hung from 80' to 621' a packer or seal was used between casings

T.D. of well 1420'

Well bore dia.? unknown

Well producing from 141' to T.D. I doubt it.

Pressure, Flow or Temp. changes at what depths?

Contact Elsing for answers to these questions.

Is there fluid movement from some depth up around the 6  $\frac{5}{8}$ " casing and out into another unit.

Shutting in the well (surface valving) may not be an indication the well static.

Running logs increases the certainty \$ \$

As the location is close to the Royal Catfish well (mileage wise) and the oil industry is still slack, cost of Temperature, audio + maybe spinner would be \$3 to \$5000.

Regarding: Well Restoration Program - Crystal Springs Ranch

Dear Mr. Beal:

In accordance with a request from Mr. Loren Holmes of the southern region office, we are transmitting, herewith, our program for restoration of our existing geothermal well located on our ranch adjacent to the Snake River between Filer and Buhl, Idaho. For your information, we have attached hereto a copy of a graphical representation of the drillers log. The well is cased down 620 feet with 8" and 6" diameter casing and presently flows approximately 600 GPM. (The well flowed 1,000 to 1,500 GPM when first drilled!)

We first propose to utilize the services of Elsing Drilling Co. to insert a 4-5/8" diameter perforated casing in the existing hole to a depth of 1,300 feet. We then propose to drill down another 200 feet with a 4" bit which we will not case. It is our objective to yield at least 1,000 GPM of hot water 130° F for use in fish propagation.

If you have any questions or want us to revise the program, please contact the undersigned at (206) 631-1407.

Sincerely yours,  
Crystal Springs Warm-Water  
Aquaculture
