RE: Water Right No. 47-07636

Dear Water Right Holder(s):

On May 19, 1992, the department sent you a letter advising that you might be required to temporarily cease diverting water from the Snake River or its tributaries if the established minimum stream flow of the Snake River in the amount of 4,750 cubic feet per second measured near Weiser is not satisfied or likely will not be satisfied.

The flow of the Snake River at Weiser is now less than 4,750 cfs. You are, therefore, directed to immediately cease diverting water under the above referenced water right and to not resume use until authorized by the department.

Past flow records show that the duration of seasonal low flow periods typically last several days to a week. Since your use of water is extremely important to you and since mail notification includes a delay associated with mail delivery time, feel free to call the toll-free telephone number 1-800-451-4129 to determine when you are again authorized to divert and use water under your water right. Please use this phone number only in connection with resumption of use.

You need to be aware that Section 42-351, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversion.

Thank you for your cooperation in this matter. Please feel free to contact L. Glen Saxton (phone: 208-327-7955) or Gary Spackman (phone: 208-327-7946) of my staff if you have questions.

The flow of the Snake River at Weiser is now above 4,750 cfs. You are, therefore, authorized to again divert water under your water right. If the minimum stream flow is not met later this year, however, the department will again notify you to temporarily cease diversion.

RE: Water Right No. 47-07636

Dear Water Right Holder(s):

Department water right records show that you divert water from the Snake River or its tributaries under a water right that has a priority date later than December 29, 1976. This is the priority of the established minimum stream flow of the Snake River at the Weiser Gage (Weiser) in the amount of 4,750 cubic feet per second.

Because of the continuing drought conditions in the Snake River Basin, department hydrologists project that during 1992, there could be periods when the required minimum flow will not be satisfied due to low flows of the Snake River. The department urges you to not divert at a higher rate than authorized by your water right and to not use your right in any manner different than authorized. In addition, when the minimum flow will not be satisfied or is not being satisfied, you are required to cease diverting water under your water right, because your right is of later priority than the minimum stream flow at Weiser.

If the department determines the minimum flow will not be satisfied, the department will advise you and will provide as much lead time as possible in requiring that you temporarily cease your diversion of water. The greatest likelihood for this to occur is during a period from mid-June to late June.

While the department expects good cooperation from junior water right holders, water users should be aware that Section 42-352, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversions of water.

The department has contacted both the Idaho Power Company and the U.S. Bureau of Reclamation with respect to the timing of storage releases from upstream reservoirs for flow enhancement purposes. This type of coordination could minimize the impact on

existing water users and reduce the need to curtail diversions.

The department has scheduled public information meetings relative to this potential regulation as follows:

Mountain Home - June 4, 1992 - 10:00 a.m. - gymnasium at
North Elementary School, 290 E. 12th N.

Caldwell - June 4, 1992 - 7:00 p.m. - Ballroom in the
Student Union Building, Albertson College of Idaho,
2112 Cleveland

If you have questions concerning this letter or wish to provide the name of a different contact person or address to receive department correspondence, please contact the department.

Sincerely,

L. GLEN SAXTON

Dear Mr. Millard:

I have received your correspondence concerning the above referenced permits and offer the following in response.

Permit No. 47-7635 does not require an amendment. We simply sent a copy of the proposed license for your review. There were no changes in the legal descriptions or natures of use from what was originally filed, therefore, an amendment is not needed.

Permit No. 47-7636, however, requires an amendment. Enclosed is a copy of the original filing which I have highlighted to show the areas needing amendment. Also enclosed is another complete amendment form for your signature. This form needs to be returned to us within 30 days along with the \$20.00 filing fee.

As to your final concern regarding the advancement in the dates of priority on these rights, our files indicate that an examination fee notice was sent for each of the permits on August 12, 1986. The notice stated that you needed to submit within 60 days either a fee to cover the examinations by one of our departmental personnel or a statement from a certified examiner (such as Mr. Brockway) stating that he had been retained to complete the examinations. We have nothing in our files to indicate that you originally planned for Mr. Brockway to conduct the exams. Because the fees and the information sheets were not received within the 60-day period, lapse notices were subsequently sent on August 12, 1987. It was then on September 18, 1987 that the fees and information sheets were received by

our office. The permits were reinstated and the priority dates were adjusted to reflect this delay in submitting the fees.

Once the amendment is received along with its filing fee, licenses will be issued for both permits. If you have any further questions, please feel free to contact me.

RE: Permit Nos. 47-7635 & 47-7636

Buhl, ID 83316

Gentlemen:

The Department has reviewed the above referenced files and some aerial photography available here at the state office. Based on this review, it appears that the lands under these permits which have been recommended for licensing were irrigated prior to July, 1985. As a result, the permits are not subject to the additional public interest review requirements of Section 42-203D, Idaho Code.

Due to this determination, you should disregard both the Department's cancellation notice dated May 23, 1989 and the April 6, 1989 trust water information letter and questionnaire. It is also not necessary for you to submit the \$20.00 re-advertisement fee which was requested in the April 6 letter.

The Department will proceed with review of the field examinations and work towards issuance of final licenses.

On behalf of the Department, I apologize for any inconvenience we may have caused.

Sincerely,

TIM LUKE

RE: SWAN FALLS PROCESSING
PERMIT NO. 47-7635 & 47-7636

DATE: 6-5-89

The above referenced permits have recently come up for review under Section 42-203D, Idaho Code. In response to the department's trust water questionnaire, the permit holder called me directly and stated that the lands were irrigated prior to July of 1985.

The files do contain evidence indicating that the lands described under the permits were developed prior to July of 1985. Proof of beneficial use for both permits were filed on September 3, 1985. The proof due date for both permits was September 1, 1985. The permit holder may have submitted proof in direct response to Glen Saxton's letter of September 1, 1985. This letter directed permit holders to file proof if their permits were developed before July of 1985. Field examinations have since been conducted for both permits. The field report recommends that licenses be issued for considerably less acreage than what was originally identified on the permits.

In addition to the above file review, I have also looked at 1983 aerial photography which covers these lands and is available here at the department. Since the proposed irrigated lands lie along the Snake River and are intermixed with riparian lands, it was difficult to clearly identify whether certain lands were riparian or irrigated. The field reports provide an indication that the irrigated lands consisted of pasture or grass. The lands are apparently flood irrigated with ditches. This type of irrigation system often does not show up well on aerials as irrigated ground and can often be interpreted as riparian or bare ground coverage. Bill Kramber, a remote sensing specialist with the department, has studied the 1983 photo and has stated that portions of the lands can indeed be classified as irrigated.

MICROFILMED

FEB 07 1991

Based on the above reviews, there appears to be sufficient evidence on file with the department indicating that the lands recommended for licensing were irrigated prior to July of 1985. Permits 47-7635 and 47-7636 should be exempt from any further review or process requirements of Section 42-203D and be removed from the Swan Falls process list. The department can proceed with reviewing the field exams for licensing.

Re: Permit No. 47-7636

Dear Permit Holder(s):

NOTICE OF PENDING ORDER CANCELLING PERMIT

On September 5, 1980, the Department of Water Resources (Department) issued Permit No. 47-7636 which authorized the diversion of 4.82 of water from Twin Falls Canal #39A wasteway tributary to Snake River for the irrigation of 241 acres.

The Department mailed a letter and questionnaire to you on April 6, 1989 in connection with the permit. The letter provided notice that the Department was reviewing the permit in connection with development which was not complete prior to July 1, 1985.

This letter also requested that you return the Department's questionnaire concerning any prior development under the permit and/or your plans for pursuing completion of the proposed project. The correspondence further requested that you submit with the questionnaire either a re-advertisement fee in the amount of twenty dollars (\$20) and/or evidence showing that development under the permit was complete prior to July 1, 1985. Finally, the letter notified you that failure to submit the required fee or information within thirty (30) days of the date of the letter was cause for the Department to cancel the permit.

The purpose of this letter is to provide a second and final opportunity for you to submit the requested information. If you fail to respond to this inquiry within fifteen (15) days of the date of this letter, the Department will issue an order cancelling the permit pursuant to Water Appropriation Rule 4,2,3,4.

If no development has been completed as authorized by the permit, and you are no longer interested in pursuing the development, please complete and return the enclosed relinquishment form.

Please feel free to contact me if you have any questions concerning this matter.

Sincerely,

TIM LUKE

RE: PERMIT NO. 47-7636

Dear PERMIT HOLDER:

Due to the Swan Falls litigation, development proposed by the enclosed permit may have been delayed. The Department is presently reviewing the permit and may authorize completion of development proposed under the permit.

The purpose of this letter is to determine: (1) the extent of development under the permit, and (2) your continued interest in developing or completing development under the permit.

Enclosed are two forms which will help the Department expedite the reprocessing of the permit.

Please complete and return the enclosed questionnaire if you wish to continue with your plans of development or have completed all or a portion of your development before July 1, 1985.

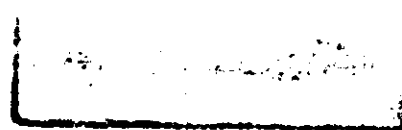

Please complete the enclosed relinquishment form and return it to the Department if you have abandoned or have no interest in continuing with your plans for development of the project.

If the entire project was not completed prior to July 1, 1985, and you still wish to proceed with your plans of development, then you must submit a \$20.00 re-advertisement fee to the Department as required by Water Appropriation Rule 4,2,3. and Section 42-221F, Idaho Code.

Failure to return the questionnaire and pay any required re-advertisement fee within thirty (30) days of the date of this letter is cause for the Department to cancel the permit.

If the incomplete portion of your project is for irrigation of more than 200 acres, the Department will issue a notice of [REDACTED] information as required by Water Appropriation Rule 4.5 [REDACTED].

Dear Permit Holder:

LAPSE NOTICE
License Examination Fee

You are hereby notified that under the provisions of Section 42-217 and 42-218a, Idaho Code, the above referenced permit will lapse and be of no further force nor effect on October 12, 1987, for failure of the permit holder to submit either the license examination fee or an acceptable field examination report prepared by or under the supervision of a certified water right examiner.

Provisions of § 42-217, Idaho Code, and the Beneficial Use Examination Rules and Regulations provide that failure of the permit holder to submit either the fee or an acceptable field examination report within one (1) year and sixty (60) days after notification by the director that the submittal is due is cause for the director to reject the proof of beneficial use and lapse the permit. The Department notified you of the required submittal on August 12, 1986.

The lapsed permit can be reinstated upon a showing of reasonable cause for late submittal of proof of beneficial use, if you submit to the Department on or before December 11, 1987, either the license examination fee or an acceptable field examination report prepared by or under the supervision of a certified water right examiner.

Enclosed is a fee information sheet that must be completed and submitted to the Department to keep the permit in good standing. If you have questions, please contact any office of the Department.

Sincerely,

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers or geologists certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time.

MAILED

FEB 07 1987

right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

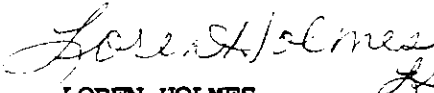

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department office.

IF THE DEPARTMENT FINDS THAT THE PERMIT SATISFIES THE CRITERIA ESTABLISHED IN CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL ENTER AN ORDER CONTINUING THE PERMIT.

Re: Applications No. 47-7635 and 47-7636

Dear Loren:

The Twin Falls Canal Company Board of Directors has two concerns about the above applications as filed by Crystal Springs Ranch, Inc., near Cedar Draw.

While the Company has no objection to the use of the water for irrigation, fish propagation or power in the canyon, the purpose of this is to advise that wasteways 39 and 39A are mossed with chemical on an ongoing basis for operation and maintenance purposes. While such chemical is generally applied a substantial distance away, under certain conditions, traces of the chemical may find their way into the Snake River Canyon. The applicant has been made aware of this procedure which the Canal Company has employed for an excess of 20 years for demossing their system.

In addition, we would anticipate that the last use of this water will be made by Crystal Springs Ranch, Inc. To the extent that the water quality is degraded, I am sure that applicant is aware of his water quality problem. We would anticipate that if the Canal Company is ever sued for alleged water quality violations concerning these waters, that they will look to this user for indemnification.

Please do not consider this an official protest to the permit, but we request that the letter be included in the file for both permits. I have previously discussed this Company policy with Mr. Bylund.

Respectfully submitted,

John A. Rosholt

Re: Application for Permits in the name of Crystal Springs Ranch, Inc.

Dear John:

Please find enclosed the two original applications in the name of Crystal Springs Ranch, Inc. and the two corrected applications I re-typed as per our phone conversation dated 2/25/1980.

Please review the corrected applications noting the changes made regarding irrigated lands, ect. If the corrected applications appear correct, attach the maps from the original applications and have Mr. Bylund sign the corrected applications. Then re-submit the application and our office will proceed to process the applications.

Please also find enclosed an affidavit of residence which must accompany the applications involving power generation and a rough draft letter which requests additional information with regard to fish propagation applications. Please inform Mr. Byland that he must submit this additional information as soon as possible because our office cannot recommend action on the applications without having this additional information included in the files.

If you have any questions please don't hesitate to contact me.

Sincerely,

Allen Merritt
