Dear Mr. Shoolroy:

One of the conditions of approval of your water Permit No. 45-7099,
45-7098,
45-7097 (see last
page of your approved permit) was that evidence of the extent of development be sub-
mitted as proof of application of water to beneficial use to this office on or before
August 1, 1977. Enclosed is an affidavit form which must be used to sub-
mit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Re: Claim Nos: 45-4038, 45-4039 & 45-4040

Ross S. Shoolroy
Shoe Sole Ranch
Route #2
Kimberly, Idaho 83341

Dear Mr. Shoolroy:

In reviewing the claims that you left in our office April 24, 1972, we find that the information on these claims should have been recorded on the Department's regular application for permit forms.

The claim form should be used to record only those ground water rights established prior to March 25, 1963 and those surface water rights established after May 20, 1971. As you will note, your above referenced claims are referring to 1970, 1971 and 1972 priorities for a ground water source. We have, therefore, taken the liberty of transposing the information from the claims onto our regular application for permit forms for your convenience.

Under normal conditions, the maximum quantity of water the Department could consider for appropriation would be 1 miners inch, or 0.02 cubic feet per second, per irrigated acre. Please fill in the quantity of water requested under item #4, keeping in mind your 1 inch per acre limitation. Item #5a and #6c should also be completed.

The filing fee for each of these applications is based on the quantity of water that you are intending to appropriate. This fee may be determined from the fee schedule on page three of the enclosed instructions. You will also note that we have enclosed the Department's da-8 form, for your signature, so that we may return the filing fees for the original claims.

We are sorry for any inconvenience this may have caused you. Please return the new applications properly executed, so that we may begin the processing. If you should have any questions in reference to this matter, please do not hesitate to contact the Department.

Very truly yours,

Jorian Clay
Appropriation Examiner
