TO Loren Holmes

SUBJECT Field inspection 47-7543

A field inspection on the above date showed that the system consisted of a Rock lined hole approx. 4' in diameter and 6' deep. which provides access to 2 6" wells drilled by The Canal Co. for drainage purposes and a drain pipe approx 18" in diameter. Mr. Kimpton stated that they tried putting a stand pipe in the well & sealed it to see if they could get the water to come to the surface & it would only come to within about 3'. As the purpose of the wells are drainage & they empty into a drain pipe. causing no one harm I would recommend to ~~action~~.

SUBJECT Wells covered by 47-7563

There is insufficient information on the exam to tell whether or not these wells would flow at land surface if confined. If they would not they would not meet the definition of Artesian well in 42-1604 and 42-1601 would not apply. Therefore the wells ~~would~~ not meet well construction standards for casing.
