**NOTICE OF APPLICATION
FOR PERMIT TO
APPROPRIATE THE PUBLIC
WATERS OF THE
STATE OF IDAHO**

Notice is hereby given that the City of Hansen, Hansen, Idaho, has on June 30, 1970, submitted Application No. 45-7066 to appropriate the public waters of a ground water source.

The application proposes a maximum diversion and appropriation of 2.0 cubic feet per second of water to be diverted by well, pump and motor within the NE¹/₄NW¹/₄ (Lots 23 and 24, Block 11, Hansen Townsite), Sec. 25, T. 10S; R. 18E, B. M., Twin Falls County, and is to be used within the NE¹/₄NW¹/₄ Sec. 25, T. 10S, R. 18E, B. M. for municipal purposes from Jan. 1 to Dec. 31.

Any permit issued pursuant to this application will be subject to ALL PRIOR WATER RIGHTS and subject to the CONTROL OF A STATE WATERMASTER. Any protest against this application must be filed with the Idaho Department of Water Administration on or before August 10, 1970.

Re: Permit No. 45-7066

City of Hansen
Hansen,
Idaho 83334

Gentlemen:

One of the conditions of approval of your water Permit No. 45-7066 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before November 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Yoder:

Thank you for your letter of November 2, 1970, concerning the City of Hansen's application and also the Parr's recently drilled well.

The application for the City of Hansen is being processed at present and they should be receiving their advertising authorization shortly.

We have sent a letter to Mr. Parr advising him that he is required to have a valid permit on the well he has just recently drilled, if he will be appropriating underground water.

Dear Mr. Fleenor:

Enclosed are copies of a letter and an application for a permit that we have received from the City of Hansen. It appears that maybe they are confusing the permit from your department with our approval of plans showing the construction of wells for public water systems. I understand this well has already been drilled and they are a little late in getting the proper authorizations. At any rate, I would appreciate it if you would determine the City of Hansen's status with the Department of Water Administration in respect to this well and so notify them. The Engineer for the City is Jack Straubhar of Riedesel & Straubhar, Consulting Engineers, Twin Falls. We now have approved with some contingencies the plans that were submitted to us.

45-7066

I am also including copies of two letters in regard to a well that has been drilled in the back of Parr's Locker Plant in Wendell, Idaho. As you will note, we have made our recommendation to the City in regard to their public water supply and I am making these copies available to you for your information and action, if necessary.

Sincerely,

The Honorable Eugene Soares

Dear Mayor Soares:

This letter is in answer to our telephone conversation concerning the well that has been drilled in back of Parr's Locker Plant in Wendell, Idaho.

I have received a report from our sanitarian in the area and understand that an old sewage disposal well has been deepened to a depth of approximately 200 feet and is now to be used to supply water for the cooling compressor at the locker plant. If the cooling system was connected to Mr. Parr's well only and in no way connected to the city system, there would be no problem. However, I understand that Mr. Parr wants to connect this well to the cooling system and also have a connection between it and the city water in case his well system fails and that the city water was to automatically cut in. This, however, would constitute a cross-connection of the city system with an unapproved source of water and would jeopardize the city's water system approval status with the Department of Health. Therefore, we would recommend to the City that they not allow such a possible cross-connection and that, in no way, should the city water be connected to the cooling compressor system.

If you should have further questions, please do not hesitate to contact me.

Sincerely,

Mr. Jerry Yoder
Environmental Improvement Division
Statehouse
Boise, Idaho 83707

Dear Jerry:

This letter is a follow up of our phone conversation concerning the well that has been dug in back of Parr's Locker Plant in Wendell, Idaho.

I first became aware of this well two weeks ago while talking to the mayor of Wendell. He asked me if Mr. Parr had obtained a permit to drill a well in the city limits for use in Parr's locker plant.

October 20, 1970 I called Marty Bowers, state plumbing inspector, and requested him to accompany me in inspection of said well. The well is located about 6 feet from the edge of the alley and equal distance from the back of the locker plant. While we were discussing the use of the well the mayor stated, "he had asked the well driller if he had obtained a permit from the Bureau of Reclamation for drilling the well". The driller said you didn't need a permit to open up a sewer well. In inquiring further the original well was used for sewage and was approximately 30 feet deep. The present well is close to 200 feet as I understand.

Mr. Parr intends to use the water in the cooling compressor system only; and having a connection between it and the city water in case of failure by his well system the city water would automatically cut in.

It appears to me that the only concern of the health department is the use of the well and its connection to the city. As for the use I don't see any cause to stop Mr. Parr; however, as for the connection to the city line there appears to me to be a violation which should not be allowed under any circumstances.

Any suggestions and or help I may be able to furnish, please advise.

Sincerely,

Robert L. Amoureux

Dear Mr. Yoder:

No reply necessary

Mr. Dingman, Twin Falls Health Department Director, suggested that I write you this letter to be sent with this application for a well.

Evidently the permit for approval for a City of Hansen well were sent to the Bureau of Reclamation. I sent \$25 for a fee, in two checks, one for \$20, sent June 11, 1970, and a few days later, June 27, 1970, one for \$5. I was informed the fee was \$20, and after it was sent I received notice that an error had been made on their part and that an additional \$5 was required. I have heard nothing from them since that time.

I had two copies of the permit application made and I am sending them to you. I notice there is still a place for the Reclamation Engineer's signature.

As you know this is a city well and we would like to get in operation as soon as possible so if the Bureau of Reclamation must give us permission also, perhaps your office could work with them to obtain this permit.

I am sending the two copies of the application permit and survey blueprints, one for your file, and one for our file when you have given the approval.

If there is any added information you need for your consideration please let me know immediately, and I will obtain it for you, as we are anxious to get this well in use.

Thank you.

Dear Mayor Ball:

We have received your check dated June 11, 1970 in the amount of \$20. In reviewing your application, we find that our letter of June 2, 1970 was incorrect. The filing fee for an application is \$25. We are enclosing an instruction set for your use in verifying the filing fee. We regret any inconvenience we have caused you. As soon as the additional \$5 is received, we will process your application.

As to your inquiry concerning a previous permit for a well drilled in 1958, we are unable to locate a permit for the City of Hansen or any well permit for the subdivision, section, township, and range that you indicated the well is located in. If you have any further information that would assist us in finding the well for you, please do not hesitate to contact us.

Dear Mayor Ball:

We have been advised by Mr. Loy Johnson, Well Construction Supervisor, of our office that your city has a new well under construction. As the State of Idaho has been under a mandatory permit system for groundwater appropriation since March of 1963, you will be required to obtain a water permit from this Department.

In checking our records, we fail to find a water permit for your city. Therefore, we are enclosing an Application for Permit to Appropriate the Public Waters of the State of Idaho along with a set of instructions for filing an application.
