I have no objection to complete removal of the M.I. Requirement with a stipulation that it can be reinstated if regulation is necessary.

Trout farms can generally be spot checked by "sticking" the control boards at the ends of the Ponds with a staff gage & treating them as rectangular weirs.

The losses from the Ponds are probably not measurable by ordinat means.

Some additional thoughts on this one:

- a. We received the exams on the Snedigar permits. Although he shows many p/d's & places of use on the permits, he developed only 3 sets of ponds, as shown on the attached map.
- b. The proposed locations of the ponds for permits 47-7683 and 47-7684 are downstream, as shown on the map.
- c. Because there is no water district on Mud Creek, and due to the limited proposed development in the area, I can't justify a need to show negligible loss of water in the ponds.
- d. At this point, since the exams have been completed (rectangular weirs used), I would be willing to remove the measuring device requirement totally, explaining that the requirement can be added at some time in the future.

RE: 47-7462 and 47-7463 - Snedigar

The following water rights are diverted in the area of Snedigar's fish farms and are potentially affected:

47-2457 - Irrigation license on land owned by Snedigar

47-7683)
47-7684) - Fish propagation rights from Mud Creek and Silo Creek owned by Collins Bros.

The Collins Bros. permits show fish ponds in the same locations as some ponds at the lower end of Snedigar's permits.

Proof is not due on the Collins permits until 1987 and they are under the same M. D. requirement.

I would recommend that Snedigar be offered the opportunity to show negligible loss of water in his facilities before we remove the 2 M.D. Requirements.

Dear Mr. Saxton,

I need to request a waver of the requirement of a measuring device on both inlet and outlet of my fish farming facility. I feel that one measuring device is sufficient due to the fact there is no apparent water loss thru the facility and there are no competing uses between the diversion point and where the water re-enters the stream. Also there is more than adequate water supply.

Re: Permits 47-7462 - 47-7463

Dear Mr. Snedigar:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

Field examinations must be done while the system is in operation. For this reason we concentrate on irrigation permits during the summer months and do examinations on permits for other uses during the non-irrigating months.

If you have any questions regarding the field examination, please contact our office.

Route #4, Box 235
Buhl, ID 83316

Dear Mr. Snedigar:

Your approved copy of Application for Permit No. 47-7462 is enclosed and we direct your attention to the conditions of approval on the fourth page.

Please note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. Enclosed is a letter describing the different types of measuring devices accepted by this Department.

The exercise of this permit may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power Company's water rights on the Snake River are protected against subsequent upstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

Since the use of water under your permit may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al. (Ada County Civil No. 62237) may determine to what extent the exercise of your permit may be subject to the water rights of Idaho Power.

While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permit.

However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or a subsequent license or water right.

If you have any questions, please let us know.

Sincerely,

A handwritten signature in cursive script that reads "L. Glen Saxton".
