Re: Permit #47-7418

Dear Mr. & Mrs. White

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

Field examinations must be done while the system is in operation. For this reason we concentrate on irrigation permits during the summer months and do examinations on permits for other uses during the non-irrigating months.

If you have any questions regarding the field examination, please contact our office.

Gary L. Funderburg

TO Mike Steele, Regional Supervisor

SUBJECT Pre-Permit Exam For Application 47-7418, Terry G. &/or Mary White

In connection with Application 47-7418, by which Terry & Mary White propose to divert 20.0 cfs of water from Mud Creek for fish propagation, I have on this date examined the water source, point of diversion, and place of use. Although 20 cfs is not now available for diversion, it was apparent that at least that much water has been present in the past. Mr. White Said that much more water flowed during the winter, and that his fish ponds would only be in full operation during this period. Although an irrigation ditch leaves Mud Creek near the point of diversion, Mr. White stated that this project would not decrease flows in this ditch during the irrigation season. There is an established fish-raising facility within $\frac{1}{4}$ mile of where Mr. White's effluent will re-enter Mud Creek; the effect of the White application on water quality for this established facility is unknown, although the swift & rocky nature of the stream in this area should maximize its self-purification ability. Other aspects of this application appear to be as stated.
