Dear Mr. Allred:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

Field examinations must be done while the system is in operation. For this reason we concentrate on irrigation permits during the summer months and do examinations on permits for other uses during the non-irrigating months.

If you have any questions regarding the field examination, please contact our office.

INTER-DEPARTMENT MEMO — 1

DATE 3/28/77

FROM Allen Merritt

TO File #47-7374

SUBJECT Surface Water Pre-Permit Field Exam

On March 28, 1977, I visited the site of the proposed fish pond located on a drainage stream tributary to Deep Creek. On the day of the visit the stream was flowing in the range of 2-3cfs of water. The water was clear and the growth in the bottom of the stream indicated that the stream probably flows continuously throughout the year. The sides of the stream channel indicated that larger flows of water had occurred in the past.

The drain, named Galloway Drain, flows through a cow lot in Sec. 9, then flows into the N $\frac{1}{2}$ NE $\frac{1}{4}$ of Sec. 8, where the proposed site is located. After flowing by the proposed site the waters flow into the NE $\frac{1}{4}$ NW $\frac{1}{4}$ of Sec. 8, where an existing fish pond is located. Below the fish pond the waters flow into Deep Creek.

From the visual inspection, it appears that adequate water is available to be appropriated as described on the application.
