Buhl, ID 83316

Dear Mr. Ahrendsen:

One of the conditions of approval of your water Permit No.'s 47-7018 & 47-7073 (see last page of your approved permits) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1974. Enclosed are affidavit forms which must be used to submit the required proof of beneficial use.

If you have not fully completed your projects, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted on each permit.

Either the beneficial use affidavits, or a request for extensions of time must be received by this Department on or before the above mentioned date, otherwise the permits will lapse and be of no further force or effect.

development.
John Ahrendsen R-3
Buhl, Idaho

Dear Sir:

The above party has been a favorite customer of this bank for over 35 years and has continuously carried a good account at this bank.

We feel John is financially able and capable to develop the water for fish raising purposes that now originates on his property.

The location of this property is as follows:

NW $\frac{1}{4}$ of NW $\frac{1}{4}$ Sec. 3, T-10S, Range 14.
Twin Falls County, Idaho

Very truly yours,

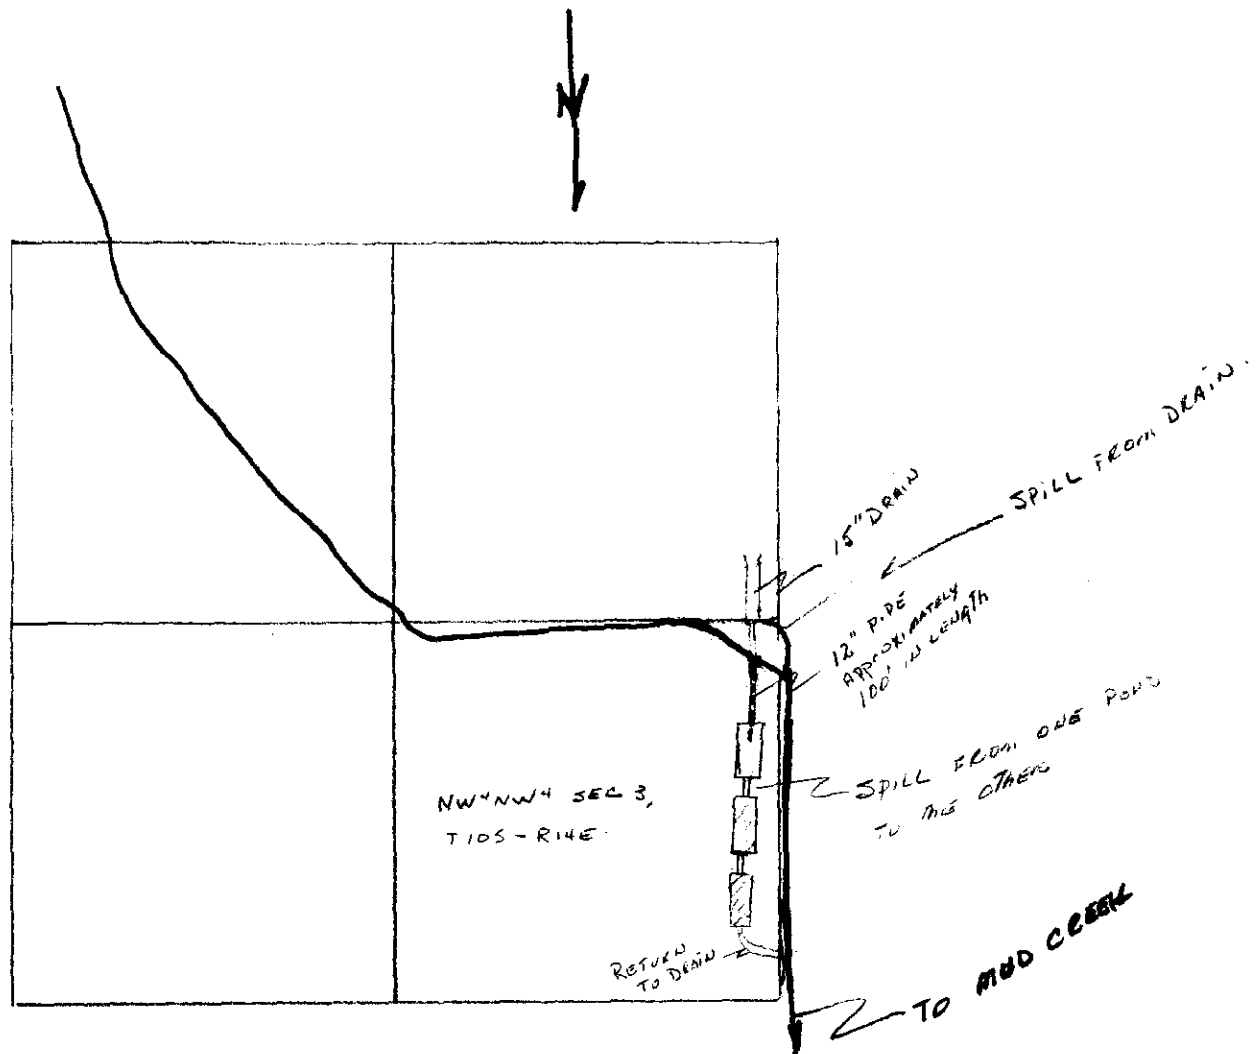

President

This non-consumptive use of the water is for the production of approximately 5000 pounds of fish each rearing season. Three different crops or supplies of fish can be raised each year. The amount of water claimed is to provide adequate water to keep down disease and fungus or other fish problems. The greater the amount of water the less chance for disease.

This project should start not later than the fall of 1970 with at least two raceways to be completed and in use by 1971 in the spring. The completion of additional ponds or raceways to continue on a regular schedule with all to be completed within or before the five year period.

FOR PERMIT 47-7018

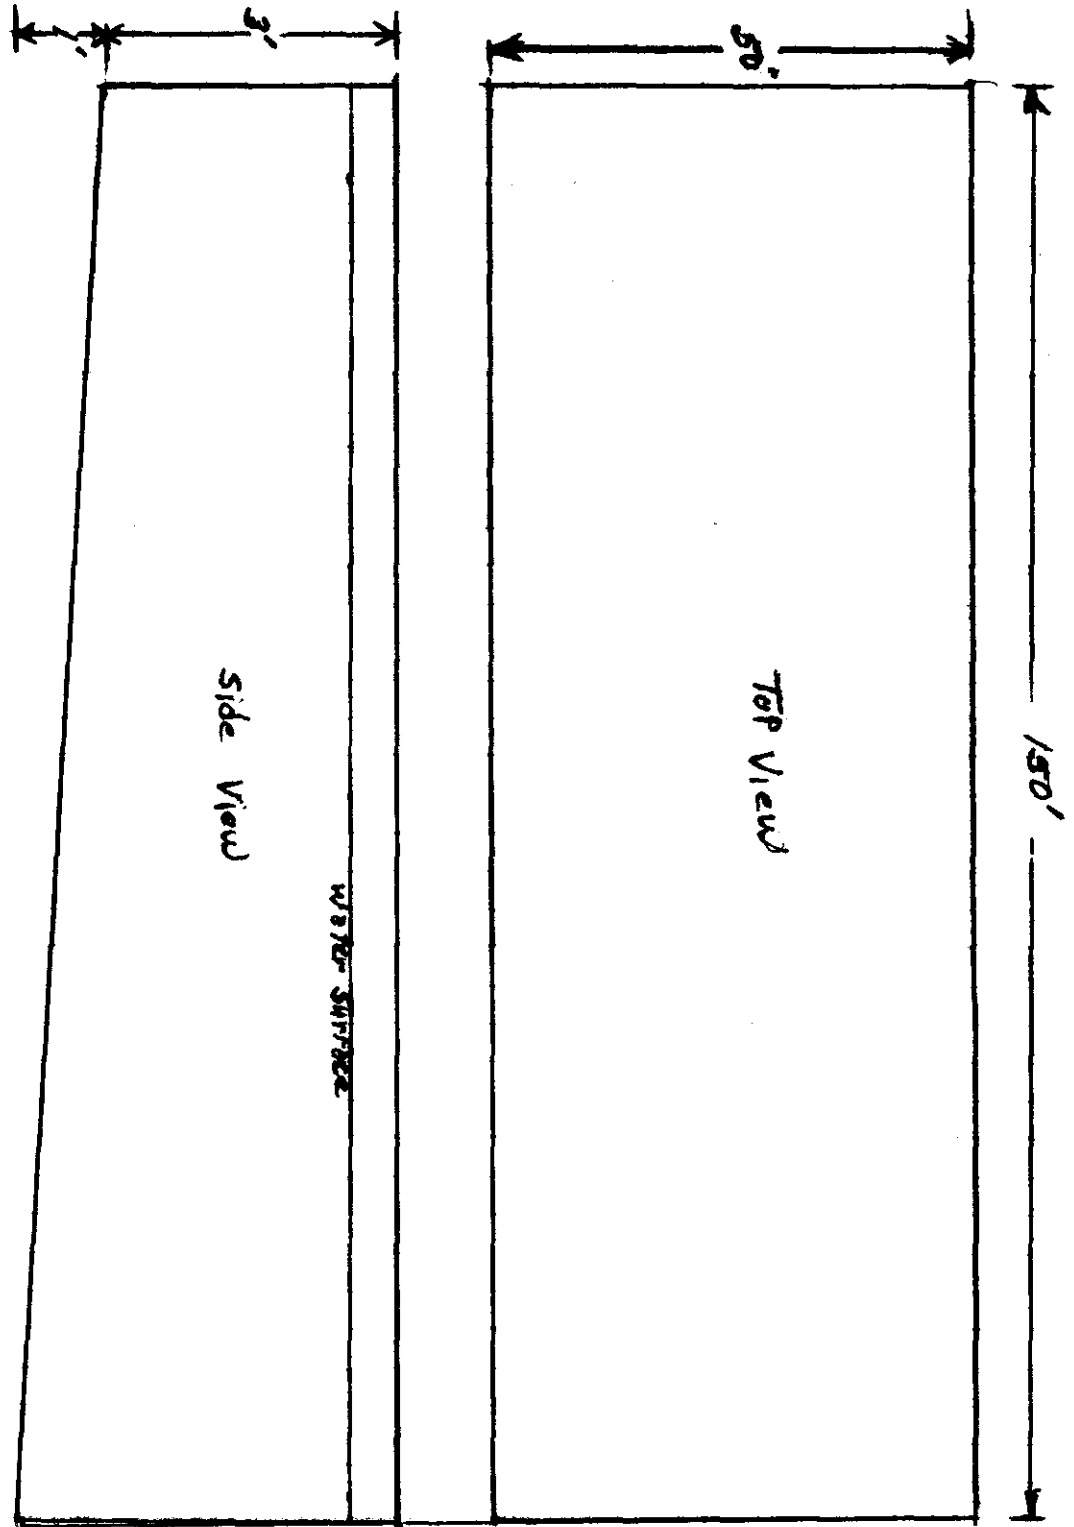

WATER FROM DRAIN & FROM UNNAMED STREAM BOTH TO BE USED
THE BLUE LINE INDICATES UNNAMED STREAM & PENCIL SHOWS DRAIN. THIS
PERMIT IS TO USE ALL WATER AS IS 47-7073, WHEN COMPLETED
IN FIVE YEARS. AT THAT TIME UP TO SIX RACEWAYS COULD
BE BUILT ON BOTH PERMITS.

Re: Application for Permit No. 47-7073 and no. 47-7018__

Mr. John C. Ahrendsen
Route 3
Buhl, Idaho

Dear Mr. Ahrendsen:

In order to further consider your application for permit, we will require additional information not included with your application.

1. A financial statement indicating the resources available to complete the project as described in the application (see Section 42-203, IC).
2. A preliminary design of the hatchery facilities, indicating the size of raceways, general layout, the size of pipelines or other diversion works and such other information as will fully describe the method and means of diversion and verify the need for the quantity of water you have asked to appropriate.
3. A justification, based upon the preliminary design and the estimated production of the hatchery, for the amount of water requested.
4. An estimated schedule of construction giving dates for the start of construction, the finish of construction, and the date that full operation of the hatchery is anticipated.

You should be aware that all applications, if approved, will require the installation and maintenance of adequate measuring devices, both at the point of diversion and the point of return of the water to the creek. These devices must be of a type approved by the Department of Reclamation. They can be of any generally recognized standard measuring device type. You should include the installation of these devices in your preliminary plans for construction.

I would appreciate receiving this information by October 22, 1969. Thank you for your cooperation.

Very truly yours,

C. Stephen Allred, P. E.
Assistant State Reclamation Engineer
