One of the conditions of approval of your water Permit No. 47-7007 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before November 1, 1971. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen:

We have been handed your letter concerning the above-referenced permit, dated September 1, 1969, by Clarence L. Young, applicant under said permit.

We herewith request, on behalf of Mr. Young, an extension of the time for proof of application of the water to beneficial use for a period of two years from November 1, 1969. The reason for this request for additional extension is that Mr. Young has not been financially able to complete the project and he has become a member of the Mudd Creek Water Users Association, which said Association is practically ready to close a loan with the Farmers Home Administration at Twin Falls. The loan will provide monies for construction of a conduit for the transportation of waters from Mudd Creek to lands owned by Mr. Young and the other members of the Water Users Association. For confirmation of this fact, I am sure that Mr. Jack Allen, Manager of the F. H. A. office at Twin Falls, will be happy to accommodate you. It is proposed that the loan will be closed within the next two weeks and that construction should be completed and water available for application to beneficial use in the spring of 1970.
