Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. **A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

MICROFILMED
DEC 2 9 1999

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

(a) the petition for reconsideration is disposed of; or
(b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

i. A hearing was held,
ii. The final agency action was taken,
iii. The party seeking review of the order resides, or
iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Dear Ms. Skaggs:

MEMORANDUM

TO: Files 47-04477 & 47-04478

FROM: Pam Skaggs/State Office

SUBJECT: Transfer 5240

DATE: November 3, 1999

Transfer 5240 adds a new point of diversion, corrects the legal for an existing point of rediversion and changes the place of use under Rights 47-04477 & 47-04478. The applicant is modifying the place of use to reflect changes resulting from the installation of sprinklers and other modifications creating a 1569.0 acre permissible place of use.

The applicant provided proof of ownership of the land these rights are appurtenant to except for two (2) quarter quarters that are being removed through this transfer. 30 acres in the NENE and 25 acres in the NWSE, S21, T12S, R17E are being shifted to other lands. These quarter-quarters are owned by USDI, BLM according to the Twin Falls County Assessor's office. I have requested that the applicant obtain a letter of agreement/release from BLM. The approval will be withheld until the release has been received.

These rights were transferred in 1995 verifying the extent of historic use at that time. Recommended conditions include non-confirmation of claim, subject to review of SRBA & recommendations, drilling permit requirements, supplemental groundwater, irrigation overlap, right-of-way, multiple points of diversion/measuring devices, injection & rediversion/measuring devices, future annual reporting, permissible place of use limits, combined right limits, extended season of use limits and standard transfer conditions.

TO: TRANSFER FILE NO. 5240

FROM: KELLY K CHRISTENSEN KKC

SUBJECT: ADJUDICATION REVIEW OF TRANSFER

DATE: 12/23/98

As the place of use has been 'set' by the previous transfer I am accepting that place of use and acre limitation as valid as set forth by Corey and Allen.

The only additional element that has been missed was the priority date for 47-04477. The claimed priority date was 04-15-1954. An affidavit for this right submitted by Tom Williams states that the system was first put to beneficial use at the beginning of the irrigation season in 1960. Therefore, I recommend that the transfer be approved with the priority date being advanced to 04-15-1960. A copy of the affidavit is attached.

The claimed priority date for 47-04478 is supported by evidence and therefore does not require correction. No attachments for evidence of priority date has been attached but the information is available in the adjudication file.

I recommend the transfer be approved with the one change.

RECEIVED
MAR 29 1998

MEMORANDUM

TO: W. T. Williams Inc. Transfer File (rights 47-04477 & 47-04478)

FROM: Corey Skinner CS

DATE: March 24, 1998

SUBJECT: Staff Review

The enclosed transfer application, filed by W.T. Williams Inc., seeks to modify water rights 47-04477 and 47-004478. Both of these rights (statutory claims) were recently involved with transfers #4570 and #4571 (both approved 10/31/95). Due to transfers #4570 and #4571, both rights currently reflect three points of diversion (wells), 2 points of injection (into North Cottonwood Creek), and two points of rediversion (from North Cottonwood Creek). In addition, transfers #4570 and #4571 created a 1,477 acre permissible place of use (limited to 1,257 acres in a single season) between the two rights.

The enclosed transfer application seeks to add an additional point of diversion (a well) and change the place of use by increasing the 1,477 acre PPU to a 1,569 acre PPU. The additional point of diversion is desired because water from two of the existing wells is pumped by diesel pumps due to the wells' remote locations. The additional point of diversion will enable the applicant to use electric power as a pumping power source. The change in the permissible place of use is to record changes in acres that are capable of being irrigated due to recent irrigation system modifications (mostly due to the installation of sprinkler systems).

The enclosed transfer application should be pretty straight forward due to recently approved transfers #4570 and #4571. Basically the same conditions and limits will and should apply (surface water overlaps, acre and volume limits, etc.) and the application should be approvable as proposed.

NOTE: It should be noted that it appears that the rediversion point located in Section 35 (T12S, R17E) was incorrectly described in the approval of transfers #4570 and #4571. The transfer applications and maps indicate that the correct location for this rediversion point is the NE¼SW¼ of Section 35, but the approval document for the transfer (and the database) describes the rediversion point as being located in the NE¼NW¼ of Section 35. I verified that the correct location of this rediversion point is the NE¼SW¼ of Section 35 with Mr. Williams. In addition, the McMullen Basin Quadrangle map (CC73) shows the head of the rediversion ditch as being located in the NE¼SW¼ of Section 35. Part one of the enclosed transfer application reflects the correct rediversion location.

==========

Mr. Williams telephoned today in response to my letter of 10-25-95 regarding the draft approval for Transfer Nos. 4570 and 4571. We discussed the transfers and I answered his questions regarding the measuring device requirements. He will discuss his plans with the region office prior to installation.

After reviewing the draft, Mr. Williams checked the exact location of the rediversion point listed on the application as SWNW, S26 and confirmed that it is actually located in SENE, S27. The approval will be modified to reflect Section 27.

The total diversion rate was incorrectly identified as 6.18 cfs and will also be corrected to 6.68 cfs per review.

RE: Transfer Application Nos. 4570 & 4571
Water Right Nos. 47-04477 & 47-04478

Dear Mr. Williams:

I have just completed review of the above referenced transfers that were forwarded from our regional office in Twin Falls. Some minor adjustments were made in preparing these transfers for approval to reflect the use of these rights in a common system. This should provide you with more flexible use of these rights within the irrigated land parcel while including the use of the new well.

A "draft" approval has been prepared and enclosed for your review. If you have any questions or objections to this approval, please respond to this office within 10 days of receipt of this letter. If no response or inquiry is received within that time, the transfer will be forwarded for approval and signature.

I hope I have answered all your questions regarding this matter. If you require any further assistance, please contact me directly at 327-7943 and I will be happy to help you.

Sincerely,

Pamela Skaggs

MEMORANDUM

TO: FILE NO. 47-04477 & 47-04478

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: TRANSFER NO. 4570 & 4571

DATE: October 23, 1995

==========

These transfers were filed simultaneously to add points of diversion and change the place of use under both of these rights. These groundwater rights supplement surface water rights to irrigate a total of 1,257 acres within 1,477 irrigated acre land parcel.

The applications described minor differences in use of these rights and included the addition of both original wells. Either of these wells could serve any of the irrigated acres using the same system to deliver surface and groundwater.

The approval has been prepared including all the points of diversion, injection and rediversion, old and new, under both rights to serve a common permissible place of use. This will allow for more flexibility for the right holder in the use of these rights within the common system and more accurately reflect the use of water under these rights. A single transfer approval has been prepared for both transfers.

The total number of acres under Right No. 47-04477 was reduced from 1,331 acres to the 1,257 acres confirmed irrigated. The rate of diversion under Right No. 47-04478 was reduced from 2.0 cfs to the 1.68 cfs actually measured from the original well. These rights are limited to the historical use of water from the wells to supplement surface rights. The reduced, non-standard season, reflects the annual use of these rights and limits the maximum diversion volume as recommended.

Other recommended conditions include non-confirmation of claims, right-of-way, irrigation overlap, future annual reporting, multiple points of diversion/measuring devices, supplemental groundwater, combined right limits and standard transfer conditions.

SUBJECT: Review and Recommendation

These two transfers are related. They propose to add diversion points to two beneficial use rights and identify the place of use of the rights. The beneficial use rights stem from two wells drilled in North Cottonwood Creek Canyon years ago which have historically been used to augment the creek flows. Transfer #4570 deals with 47-04477 (south well; 5.0 cfs) and transfer #4571 deals with 47-04478 (north well; 2.0 cfs). 47-04477 was originally claimed statutorily for irrigation of 1331 acres then in the SRBA it was claimed on 1477 acres. 47-04478 was originally claimed statutorily for irrigation of 856 acres which are included in the 1331 above and then in the SRBA it was claimed on the same 1477 acres as
47-04477. Physically either well could serve any of the lands irrigated since each well dumps into North Cottonwood Creek and then the water is then re-diverted from the creek below to the place of use.

Transfer #4570 (south well) proposes to use both old wells in Section 11 (north & south wells) and also add another well in Section 16 that exists but presently not in service. It also splits the right into two different use areas within the 1477 acre place of use with associated flow rates.

Transfer #4571 (north well) proposes to use both old wells in Section 11 (north & south wells) but does not propose to be diverted from the other well in Section 16. It does not split the right but spreads the right over the entire 1477 acres.

The logic behind both of these transfers escapes me other than they want to add another well to the system. For some reason when Mel Schulte helped Mr. Williams draft the transfers he seemed to put a lot of emphasis on the number of acres originally claimed in the statutory claims; so much so that he placed limits on these transfers based on these claimed acreage amounts. I do not believe this is warranted and more weight should be given the SRBA claimed acres or to the place of use review done in the SRBA. Jim Stanton has reviewed the place of use and found approximately 1028 acres under the system. I have checked Jim's figures against landsat mapping and giving the benefit of doubt to the applicant I find 1257 acres irrigated. (See attached sheet) Jim's analysis of the rate of diversion and volume appear to be appropriate.

RECOMMENDATION

NOV 07 1995

I recommend that both transfers be approved with the same points of diversion, points of re-diversion, and same PPU of 1477 acres limited to 1257 acres in any one season. The total diversion rate

from all three wells is limited to (5.0+1.68) 6.68 cfs at any one time. The total diversion volume from all three wells is limited to 1669 afa. When combined with other rights the diversion rate shall not exceed 0.02 cfs/acre nor the diversion volume exceed 4.0 afa/acre. Additionally all wells must have totalizing meters installed and the volumes subject to reporting to the department annually. All rights are subject to SRBA review and specifically the 1477 acres PPU may be adjusted downward in the process.

SUBJECT: W T Williams Apps. for Transfer

On 8-25-95, I accompanied Tom Williams to these two wells in North Cottonwood Creek Canyon. Using a Polysonic flow meter, the smaller north well was measured at 1.54 to 1.68 cfs. I tried to measure the larger (south) well, but was not able to get a steady R value at higher discharge rates. The SRBA claim file has a driller's pump test showing up to 5.3 cfs. So this well appears to be capable of pumping the 5.0 cfs claimed. Both wells pump open discharge into the creek. Both wells are run with variable-speed diesel engines and gear heads. Mr. Williams said that the big well runs 90-120 days a year, whereas the smaller well is only used as needed in dry years. The small well may be used for 4-5 years in a row, followed by 2-3 years of no use. Well has been used for up to 150 days a year, but averages 120 days in years when it is pumped. At an average flow of 1.61 cfs, 150 days of use would pull 479 AFA. At 120 days of use, 383 AFA would be pumped.

It is time-consuming and expensive to operate these wells due to their location and the lack of electric power, so it would certainly be reasonable to re-locate them to a better site. But instead of doing this, the transfers propose to add an additional well while keeping the two existing wells. So there is a potential for expansion of historic groundwater usage if these transfers are not properly conditioned. At a rate of 5.0 cfs for 120 days, the large well would pump 1190 AFA. Based on the usage data supplied by Mr. Williams, it appears that the maximum historic usage of these two wells is 1669 AFA; transfer, if approved, should be limited to this amount. Totalizer meters should be required for all wells, as this is the only way to be sure of how much water is actually used.

With regard to the place of use, the latest ASCS photos show 986.3 acres by adding up the listed field acreages. By using a dot grid, the same photos show 1028 irrigated acres. Although the transfers state that they only wish to describe the land that is presently irrigated, the transfers as filed constitute an enlargement of at least 449 acres. This is obviously not allowable under Sec. 42-222 of the Idaho Code. I have prepared a list of the apparent present p/u, which I recommend as what we allow if the transfers are approved. The SRBA claims obviously show an incorrect p/u. I have rounded off my figures to the nearest whole acre. I have not discussed this discrepency with Mr. Williams; my figures come from the aerial photos supplied with the transfer app. There is a 34.7-acre field south of the pivot in Sec. 16, that is marked "surface water only". This field is not included in my acreage figures for this reason, although I don't know how groundwater would be kept off of the parcel.

FROM: Mary Baldwin

DATE: May 10, 1995

SUBJECT: Times News Publications

Camera ready legals for T#4570 and T#4571 were scheduled for publication on 3/30 & 4/6/95.

Affidavit #26991 for T#4571 was received on 4/20/95. An telephone inquiry was made on 4/24/95 to Linda McQuire of the Times News regarding the lack of a publishing affidavit for T#4570.

A follow-up telehone call to Ms. McGuire on this date reveals the following:

Affidavit # 26991 on T#4571 published on 3/30 & 4/6/95 should be for T#4570.

T#4571 was published solely on 3/30. No affidavit has been received.

Plan of action:

Ms. McGuire will send a corrected affidavit for T#4570.

IDWR will submit a camera ready re-publication of T#4571 scheduled for 5/18 and 5/25/95. The Times News would not accept a camera ready legal for the 5/11/95 newspaper.
