Dear Sir:-

We have tested the well at the Twin Falls Cemetery
and now have the following information to give you.

Depth of Well	1170 feet
Water level	49 feet
Water flowing	37 miner's inches

A test was made a day or so ago with a 2 inch air pipe
down 270 feet. This was run approximately 5 hours which resulted
in a flow of 37 miner's inches of water, with a draw down of 31
feet in the well.

The hole is 10 inches in diameter for several hundred
feet, and at the present time there is 6 feet of 10 inch pipe,
and 1000 feet of 6 inch pipe in the well. We probably would in-
stall a hundred feet of 8 inch casing and cut off and pull out
the 6 inch pipe except where the formation was bad.

I would like to have complete information and a price
from you on the installation of a pump that would deliver at least
225 gallons per minute from this well. The installation of the
pump and the electrical work would be done by you. We would make
the concrete base for the pump of such size and thickness as you
would determine to fit the pump.

I will be glad to hear from you within the next few
days if possible.

Yours very truly,
