Re: Application Nos. 47-4140, 47-4141, and 47-4142
Carl Dalos

Dear Loren:

This letter is written on behalf of the Twin Falls Canal Company. While the above three applications contemplate a diversion and use of "developed" waters which spring forth from seepage tiles planted by the Canal Company, the proposed uses below our last diversion. However, depending on where the ponds would be constructed, and whether or not this "pure" water would be commingled with other waters, it may well make the ponds susceptible to traces of mossing chemical since this lateral system has been mossed by the Canal Company for over 20 years. While we recognize that the applicant already has trout facilities on his property, please advise him that the Canal Company does not plan to change their mossing procedures.

In addition, since the seepage water presently flows into Snake River in a "pure" condition, if the Canal Company is ever accosted by the water quality agencies concerning the quality of this water, we would bring the permit holder in and assert that the water quality problem is his since he makes the last use of the water.

Please include this letter in the file concerning all three permits.

Respectfully submitted,

John A. Rosholt
