Dear Water User:

As you are aware a large area in Twin Falls and Cassia Counties was designated as a critical ground water area in 1962. Since that time the State Reclamation Department has entered into a cooperative agreement with the U. S. Geological Survey to study the ground-water resources of the area. That study is now completed, and a report is being prepared. The state reclamation engineer is reviewing the hydrology and water level changes while considering the possibility of modifying the area that is designated as critical and closed to additional water development.

With regard to this the State Reclamation Engineer, R. Keith Higginson, will conduct a public meeting in the Murtaugh High School Auditorium at 7:30 P.M. on January 25, 1967. The locations and amounts of present water rights will be reviewed, and alternatives for modification of the area will be presented. In addition U. S. Geological Survey personnel will be present to relate what is now known of the ground water resources of the area.

Water users are encouraged to participate in the discussion, and all interested parties are urged to attend.

Very truly yours,

Jack A. Barnett

Attention Mr. W. R. Nutting

Dear Mr. Nutting:

In replying to your letter of August 27 it is first necessary to explain that our research is based on the deduction that you referred to licensed permits filed on or owned by Mr. W.A. Coiner. However, after a permit has matured to a license this office does not as a rule record any other matter, ownership or otherwise. Hence, our records do not show any permits under the name of Coiner Land & Livestock Co.

Therefore, our search was limited to eight licensed permits enumerated on the attached exhibit "A". At present there is no well defined trend indicated in regards to water level in this area. No doubt great changes have taken place since licenses were issued which could have changed the amount of water available.

Schedule "A" refers to the list of 10 questions in your letter.

The cost of this research is \$10 for which you may send a check to this office at your earliest convenience.

Very truly yours,

Dear Mr. Stephan:

We acknowledge receipt of your letter of June 4th, enclosing depositions of W. A. Coiner, and two witnesses, also affidavit of publication in the Twin Falls Times-News all in proof of beneficial use under Permit No. 18265.

Before final action is taken in the matter the law requires that a field examination be made by an engineer from this Department.

We can not say just when this examination will be made since this Department has but one field engineer who makes examinations all over the State.

However, Mr. Tolman, Field Engineer for this Department will try and contact Mr. Coiner at the time he makes the examination so that arrangements may be made to show him over the ground.

L. W. MADDEN, being first duly sworn, deposes and says:

That on or about May 2, 1936 affiant filed with the Department of Reclamation an Application for Permit to appropriate the Public Waters of the State of Idaho and specifically to develop well located on Southeast Quarter of the Northwest Quarter (SE $\frac{1}{4}$ NW $\frac{1}{4}$) of Section One (1), Township Twelve (12) South, Range Eighteen (18) E. B. M., Twin Falls County, Idaho and on or about May 23, 1941 the Proof of Completion of works was made by Affiant and Permit No. 18265 issued to Affiant May 23, 1941 by the Department of Reclamation.

That by inadvertence and mistake the land on which Affiant intended to develop wells was described as being located in Township 11 South, Range 18 E. B. M. when as a matter of fact the land on which Affiant intended to develop wells was actually located in Township 12 South, Range 18 E. B. M.

The land on which the wells were to be developed is now owned by W. A. Coiner of Hansen, Idaho and Affiant has this day assigned to the said W. A. Coiner all his right, title and interest in and to Permit to appropriate the Public Waters of the State of Idaho, No. 18265.

Dear Mr. Stephan:

I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

E. V. BERG
Commissioner of Reclamation.
