Dear Mr. Creed:

We received the legal notices in duplicate with authorization for publication.

The legal notice for Permit No. G-27953 is in order with the deletion of Creed Concern, Inc., as Noma M. Creed is the holder of the permit.

The legal notice for Permit No. 21737 also shows Creed Concern, Inc. which must be deleted. It also shows land in Section 5, Township 12 S., Range 19 E., and Section 32, Township 11 South, Range 19 E., which is not in our record of the permit. That land must be deleted or you can amend the permit to include that land on the enclosed form.

You can also assign the permits on the enclosed forms if you want the certificates in the name of Creed Concern, Inc.

Kindly reply promptly or the date for making the proofs will have to be advanced. There is a recording fee of \$1.00 for each amendment and \$0.50 for each assignment.

He apparently wished to inspect

Permit #21489.

Permit #21489 was issued to

Because we had been writing
you concerning the other later
permits requiring completion I
foolishly leaped to the conclusion
that he was checking them in
advance because he was in area.
Mr Herbergen

27953

Now - our farm manager
will mail from Hansen the
papers on Permit ~~XXXXXX~~ 21737
and Permit # G 27953.

I hope you can simplify
the land listing. However, the
fact remains that all that
area is farmed as a unit
and water is not only sent ^{to} ~~to~~ ^{any}
places needed (regardless of
earlier boundaries) but we
re-use much of our water as
well as pick up a neighbors' waste.

Because the above sounds
more complex on paper than it
will show to your inspector,
we became overly eager to
"show" him the water plan.

Mrs. Nona M. Creed

Dear Mrs. Creed:

We have the report of the field engineer on Permit No. G-26055, Well No. 7, in S¹NE¹, Section 6, Twp. 12 N., R. 19 E., S. 11., drilled under Permit No. 21737. One-eighth of the production of this well was assigned to land under Permit No. G-26055, 11/25 to land under Permit No. G-27953, with the balance to land in Section 6, under Permit No. 21737.

The report shows all of the water from this well is pumped through a 10" pipe to the NW¹4, section 5, T. 12 N., R. 19 E., S. 11. to irrigate land under Permit No. G-27953 and to the SW¹4, section 32, T. 11 S., R. 19 E. to irrigate land under Permit No. G-26055. None going to the NE¹4, Section 6 under Permit No. 21737. This well was measured at 2.7 cubic feet per second, or 135 miners inches.

Well No. 10, NW¹4, Section 5, drilled under Permit No. G-27953 irrigates land in Section 5; also land in Section 6 under Permit No. 21737. This well is not shown under Permit No. 21737. The flow from the well was measured at 70 miners inches. This well was measured due to a misunderstanding that the proofs were to be made in the near future.

This leaves our records on these three permits in a wonderful state of confusion.

We suggest that you should make the necessary proofs under Permits No. 21737 and G-27953 as soon as possible. We should be able to arrive at some solution with the three reports of the water and lands under the three permits.

This report will be filed to wait for the other reports, if we do not hear otherwise from you.

Dear Mrs. Creed:

Enclosed are approved amendments to point of diversion for Permits G-26055 and G-27953, and the amendment to place of use of the water under Permit No. 21737. Photo-copies are in our file and the changes have been recorded. Two photo-copies of the change in point of diversion for Permit G-27953 and the amendment to the land list under Permit 21737 are being sent to the Bureau of Land Management with a copy of this letter.

You have four irrigation wells:

Well No. 7, SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 6, T. 12 S., R. 19 E., produces 200 inches of which 25" goes to SW $\frac{1}{4}$, Sec. 32, T. 11 S., R. 19 E., $\frac{11}{25}$ or 88" goes to N $\frac{1}{2}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 5 and 87" remains in NE $\frac{1}{4}$, Sec. 6.

Well No. 9, NW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 6, produces 80" to irrigate the land in Sec. 6.

Well No. 8, SE $\frac{1}{4}$ SE $\frac{1}{4}$, said Sec. 6 produces 90" of which $\frac{2}{9}$ or 20" goes to W $\frac{1}{2}$ SW $\frac{1}{4}$, Sec. 5 and 70" remains on Sec. 6 and 7.

Well No. 10, W $\frac{1}{2}$ SW $\frac{1}{4}$, Sec. 5, produces 75" for Sec. 5, under Permit No. G-27953

Total inches from four wells 145.

Permit G-26055, 130 acres in SW $\frac{1}{4}$, Sec. 32, T. 11 S., R. 19 E. will have 25" from well in SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 6, T. 12 S., R. 19 E. plus your waste water, about 75", from Sec. 5 and Sec. 6.

Re: Permits No. 21680; 21737; G-26055
G-27953

Mrs. Nona M. Creed
194 Tyler Street
Twin Falls, Idaho

Dear Mrs. Creed:

You relinquished Permit No. 21681 on July 31, 1959.

Permit 21737 is for 6.4 c.f.s. to irrigate your land in Sections 6 and 7. Points of diversion on your permit checks the wells shown on your map. Production from the three wells, Nos. 7, 8 and 9, will total 370 inches according to your plan. From Well No. 7 you will use 25 inches to land under Permit No. G-26055 and 88 inches to land under Permit No. G-27953, which will also get 20 inches from Well No. 8. A total of 133 inches will be used on other land, leaving 237 inches under Permit No. 21737.

Permit G-26055 will have only 25 inches from Well No. 7 plus waste water from higher land for land in Section 32.

Permit G-27953 will have 75 inches from Well No. 10, 88 inches from Well No. 7 and 20 inches from Well No. 8 or a total of 183 inches for land in Section 5.

Permit No. 21680 will have the water from the well in SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 33, for which you have a Certificate of Completion of Works for 1.5 c.f.s., plus your waste water from Section 5. Beneficial use of the water is due August 31, 1961.

The above checks your summary of the water.

To accomplish this our records must be amended.

Permit No. G-26055 amend the points of diversion to show well you drilled and 0.5 c.f.s. from well in SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 6, T. 12 S., R. 19 E.

Permit No. G-27953 amend the points of diversion to show NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 5; 1.76 c.f.s. from SE $\frac{1}{4}$ NE $\frac{1}{4}$ and 0.4 c.f.s. from SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 7, T. 12 S., R. 19 E.

Permits 21680 and 21737 will not have to be amended.

The amendment forms are simple. The existing points of diversion are the points shown on your permit, if they have not been changed by prior amendments. The points you wish to use go on the next blank line as indicated on the form. Reason for the amendment could be "better distribution of water".

This plan will work very satisfactory as long as these lands are operated as a unit. If later sold to different parties, there may be an argument about the water from Wells No. 7 and 8 if the production does not remain at the quantities you have proposed. Instead of the definite amount of water it might be better to show $2/9$ of the water from well No. 8 to Section 5, $1/8$ of the water from Well No. 7 to Section 32 and $11/25$ to Section 5.

Kindly complete the amendments to Permit G-26055 and enclose with the completed Forms 36 and 11 at your earliest convenience before that permit is cancelled. Forms 36 and 11 relate to the legal notice of intention to make proof of completion of works and beneficial use of the water.

Dear Mr. Thomas:

We do wish to show Completion of Works and Beneficial Use on G-26055. We accept the fact that present well used as a domestic ~~is~~ ^{is not} to be counted, nor is waste water from any ^{source}. Thus only 25" is to be shown. This comes from our Well #7 in Range 19E Twp 12S - SE 1/4 NE 1/4 Section 6.

We have the Permit on that location listed as number #21737. Will you check that number please? Then Woodson can allot or correct on blanks you gave me in your office.

Please see enclosed map of our 'all over' plan. You can see that we never violated any permit as only next season (1961) will pumping be increased to obtain maximum amounts listed on sketch.

Woodson is willing to allot to my filing #01437 - 88" from Well #7 - Range 19E Twp 12S SE 1/4 NE 1/4 Sec 6

20" from Well #8 in Range 19E Twp 12S SE 1/4 SE 1/4 Sec 6

I list as Water Permit on filing #21681

Please also check that number for us before we fill out the forms here.

You can see by enclosed sketch why these transfers can be made. Actually water from my well # 10 flows on down to water lands under his Permit before being caught in pond, run by gravity across one forty to be piped across two forties to cross road to land under Permit G-26055. The you don't count it, neighbors waste to all used. I show in sketch (though it has no value in 'proving' up) that if waste water results in 1961 when we farm Lots 1, 2, 3 in Range 19 Twp 12S - Section 5 it can be taken across road to SW 1/4 Sec. 33 Twp 11 Range 19E

It is very important to use ~~all~~ waste water; we feel the pond set up as earlier OKed by FHA appraisers proved its value in 1960. We will deepen but not widen pond.

I seem lost in all the details. - Do feel free to suggest or pencil into a form the exact changes we need to show. For instance drilling in NE 1/4 NE 1/4 Section 7 proved impossible so that well location may have to be corrected also to SE 1/4 SE 1/4 of Section 6.

We try to follow your rules.

Sincerely
Norma Creed
