MEMORANDUM

TO: FILE NO. 47-02540

FROM: PAM SKAGGS/⁷⁸STATE OFFICE

SUBJECT: TRANSFER NO. 4813

DATE: August 15, 1996

=====

Transfer No. 4813 was filed to change the point of diversion and place of use under Right No. 47-02540, creating a permissible place of use within 256 acres. This groundwater right originally supplemented surface shares on 67 acres. The transfer proposes to combine the right with multiple surface and groundwater rights serving the larger 256 acre system.

Irrigation is identified as the sole use per the transfer application, removing the licensed domestic use. Season of use and diversion volume were adjusted to current standards.

Recommended conditions include irrigation overlap, multiple points of diversion/measuring devices, future annual reporting, supplemental groundwater, permissible place of use and standard transfer conditions.

RECEIVED
OCT 10 1996

FROM: Allen Merritt

DATE: June 7, 1996

TO: Transfer File # 4813

SUBJECT: Review and Recommendation

This transfer proposes to move a groundwater right (47-02540) into an existing PPU which uses other rights from groundwater and decreed rights from Rock Creek. The PPU was established under transfers #4421, #4422 & #4423.

The other rights from groundwater are as follows:

47-02496A 1.39 cfs (402.4 afa) for 100.6 acres in 256 acre PPU.
47-02509 0.52 cfs (219.7 afa) for 84 acres in 256 acre PPU.

Thus, when combined these groundwater rights provide 1.91 cfs (622.1 afa) for irrigation of 184.6 acres in the PPU of 256 acres. This transfer requests adding right 47-02540 for 1.30 cfs (268 afa) on 67 acres so the total rights in the PPU would be 3.21 cfs (890.1 afa) for 251.6 acres. Note that no other rights for groundwater are acknowledged by Funk even though 47-04107B is of record but not claimed in the SRBA. Note that Funk has claimed 47-04107A on other lands in SRBA.

I recommend that the transfer be approved subject to the following conditions:

- Subject to SRBA.
- This right when combined with all other rights shall not exceed 0.02 cfs/acre.
- The total instantaneous diversion rate from all wells shall not exceed 3.21 cfs and the total annual diversion volume is limited to 890.1 afa.
- To the extent possible surface water shall be utilized first on the PPU and the wells used as a supplemental water supply.
- Measuring device with totalizing meter must be installed on all wells and reporting of use as required by IDWR.

Gentlemen:

This concerns examination for completion of works and beneficial use on permit No. 21980 in the name of Mr. W. G. Allen, Route 1, Hansen, Idaho.

Proofs by the owner and witnesses were for 65 inches of water. At the time of your inspection, the pump would produce only 44 inches of water. Mr. Allen informs me that by making adjustments to the pump, the well will produce the total of 65 inches of water.

I am wondering if it would be possible to schedule another examination, after Mr. Allen makes the necessary adjustments, in order to determine if a permit can be issued for 65 inches of water instead of 44 inches. If this is possible, it is satisfactory to Mr. Allen, even though the inspection may not be made until next spring.

Yours very truly,

Mr. W. G. Allen

Dear Mr. Allen:

We now have on file the report of our field engineer on examination for Completion of Works and Beneficial Use on Permit No. 21980.

This report shows that your well in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 18, Twp. 11 S., Rge. 19 E., S. M. will deliver 44 inches of water which has been used to irrigate 67 acres in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ and SE $\frac{1}{4}$ NW $\frac{1}{4}$ of said section.

A Certificate of Completion of Works and License can, therefore, be issued for that amount upon receipt of the statutory fees which amount to \$5.00 for Completion of Works and \$6.00 License fee or a total of \$11.00.

Gentlemen:

I enclose depositions of holder and witnesses and the affidavit of publication for proof of application of water and completion of works under Permit No. 21980.

Concerning procedure for proof, Section 42-234 of the Idaho Code provides that the reclamation engineer "shall determine the time reasonably required to complete the proposed well and other works and apply such water to such proposed use which time, however, shall not be less than two years nor more than five years from the date of the permit;". Section 42-235 provides that the permittee may give notice of completion "within thirty days after the expiration of the time limited in any permit issued under this section or at any time before such expiration".

What does the two year provision pertain to?
Can a well be drilled, a crop irrigated, and final proof made and permit issued the same year?

Yours very truly,

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Mr. W. G. Allen
Route 1
Hansen, Idaho

Boise, Idaho January 2, 1954

Dear Sir:-

Under the terms of your permit No. 21980 you are required to complete your diversion works on or before March 10, 1954. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP
