Dear Mr. Mead:

Your letter dated March 13 has been received. You state that Mr. Morrill has the water licenses and permit for the wells. I am wondering why you want the same information from this office.

Water License No. 19873, Point of Diversion in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 28
20660, Point of Diversion in the SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 28

Permit No. G-30312, Point of Diversion in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, NE $\frac{1}{4}$ NE $\frac{1}{4}$ of
Section 28, all in Township 11 South, Range 19 East.

We have generally considered the original license will hold if it is necessary to deepen the well to obtain the amount of water on the license. I don't believe the question has really been decided by the courts. Possibly the answer would differ with different circumstances such as if deepening the well would tap water from a different aquifer which was first tapped by a later priority well, or the different depths may have a common water.

The closest case to consider a deepened well was Case No. 2169, District Court, Owyhee County, Givens et al vs Peer et al, Charles E. Winstead, District Judge, dated October 1, 1948. In this case certain amounts and priority were given. In one well 16 miners inches was allowed from the 350 foot depth, with priority of May 1, 1936, and 14 miners inches from the 550 foot depth, with priority of April 25, 1940. This was artesian

water from both depths, with a concrete plug at about 350 foot depth with separate casing to the 550 foot depth.

Different priorities were given water from one other well, however I do not know whether that was on account of the date of first use or as a result of deepening the well.

RE: Permit No. 21847

Mr. Charles R. Morrill
Route 2
Hansen, Idaho

Dear Mr. Morrill:

We have placed on file the depositions of yourself and two witnesses together with the affidavit of publication from the Twin Falls Times News all in proof of completion of works and beneficial use on Permit No. 21847.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

MARK R. KULP

Mr. C. A. Morrill
Murtaugh, Idaho

Dear Mr. Morrill:

In reply to your request, we enclose herewith an Application for Permit to appropriate the Public Waters of the State of Idaho, together with a pamphlet giving regulations and instructions in regard to filing same.

The same form is used for filing on a well as for surface water, but in describing the point of diversion as called for in Question 4, you should give the location of the well by subdivision, Section, Township and Range.

When this application is approved, it will be signed by the proper State Officials and sent you as a use permit under which you may proceed with the construction of the work described in the application. In order to complete your water right, two proofs are required as follows:

First, proof of completion of works which is made by affidavit before a Notary Public. The time required for making this proof should be stated under Question 12 in the application.

The final proof is made when the water has been completely applied for irrigation or whatever purpose it is intended. Notice of such proof must be published for four consecutive weeks in a county newspaper at your expense, and at the time set for proof, depositions are to be executed by yourself and two witnesses in proof of such beneficial use. The additional time required for making this proof should be stated under Question 13 of the application.
