Dear Mr. Campbell:

The information you submitted to us concerning the proposed modification of water right license 45-2198 has been reviewed.

You requested this license be modified since 200 acres of land are now being irrigated from the present well. However, the present well was not drilled until sometime after the original license was issued. The water right license was issued for the amount of irrigation that existed in 1948 which according to the enclosed report of the Engineer was 160 acres. Therefore the water right cannot now be expanded for more than the 160 acres being irrigated by that water right license.

This area was closed to any further appropriation of groundwater on July 23, 1963, and therefore, any land irrigated after that time does not have a valid water right. If the additional 40 acres of land was first irrigated sometime between the 1948 date when the examination was made and the July 23, 1963 date when the area was closed, then perhaps a water right has been established by the diversion and beneficial use of the water.

If a water right was established in this manner then you may want to file a claim to a water right form which is also enclosed for your consideration.

Dear Gentlemen:

In regards to your telephone call from the Twin Falls office concerning the well permit 45-2198. When the water was originally put on the land, they only attached it to 160 acres out of the 200, and we was wondering since we have put in a sprinkler system if we could have it read where it is appurteante to all the land.

The following description of the land is T. 11S., R. 19 EBM, SEC. #30., E $\frac{1}{2}$ of SW $\frac{1}{4}$, W $\frac{1}{2}$ of SE $\frac{1}{4}$., SW $\frac{1}{4}$ of NE $\frac{1}{4}$.

Dear Mr. Hamilton:

We acknowledge receipt of your letter of September 27th, enclosing the depositions of Ona M. Larson and two witnesses, also the affidavit of publication in the Twin Falls Times-News, all in proof of beneficial use under the above numbered permit.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department. For that reason we return your check for \$10.00 tendered in connection with this final proof, and when this examination has been made, and report filed, we shall notify you as to the correct amount of fees; which, as you state, will be at the rate of \$2.00 for each 40-acre subdivision on which the water has been beneficially applied.

We cannot say just when this examination will be made, since this department has but one field engineer, who makes examinations all over the State; but Mr. Tolman, our field engineer, will try and contact Mrs. Larson at the time he makes the examination, so that she may arrange to show him over the grounds.
